amending Regulation (EU) 2017/825 to increase the financial envelope of the Structural Reform Support Programme and adapt its general objective

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,
Having regard to the Treaty on the Functioning of the European Union, and in particular the third paragraph of Article 175 and Article 197(2) thereof,
Having regard to the proposal from the European Commission,

economies ***and a resilient society*** built on strong economic and social ***and territorial*** structures, which allow Member States to efficiently absorb shocks and swiftly recover from them, contributes to economic and social cohesion ***and unlocks growth potential***. ***Member States should encourage, in accordance with their legal framework, suitable contribution and involvement of national and regional public administration and stakeholders***. The implementation of institutional, administrative and growth-sustaining structural reforms ***that are important for Member States, and the ownership on the ground of structural reforms with European added value are important tools*** for achieving such a development.

- (3) ***Efficient communication of the Programme's actions and activities and their results at Union, national and regional level, as appropriate, is essential, for raising awareness of the achievements of the Programme and ensuring visibility and providing information on its effects on the ground.***
- (4) ***Given that demand for support may exceed the Programme's funding, the requests should be prioritized, where appropriate, by the Member State concerned during the request for support procedure. In this context, attention should be paid to requests for support that have links to European Semester and to policy areas related to cohesion, innovation, employment and smart and sustainable growth. The Programme should complement other instruments in order to avoid overlaps.***
- (5) ***Given that the Programme does not provide funding to Member States, but only technical support, it does not aim to replace or substitute funding from national budgets.***
- (6) Member States have increasingly taken up support under the Programme, beyond the initial expectations. The requests for support received by the Commission during the 2017 cycle have, based on their estimated value, significantly exceeded the available annual allocation. During the 2018 cycle, the estimated value of requests received was five times the financial resources available for that year. Almost all Member States have requested support under the Programme and requests are distributed across all policy areas covered by the Programme.

- (7) Strengthening economic and social cohesion ***through*** structural reforms ***which benefit the Union and are in accordance with its principles and values*** is crucial for ***underpinning economic resilience and*** for successful participation ***and enhanced real convergence*** in the Economic and Monetary Union, ***ensuring its long-term stability and prosperity***. That is ***equally*** important for Member States whose currency is not the euro, in their preparation to join the euro area, ***and for euro-area Member States***.
- (8) It is thus appropriate to stress in the general objective of the Programme – within its contribution towards responding to economic and social challenges – that enhancing ***economic, social*** cohesion, competitiveness, productivity, sustainable growth, and job creation, ***social inclusion and investment could*** also contribute to the preparations for future participation in the euro area by those Member States whose currency is not the euro.
- (9) ***With a view to pursuing the general and specific objectives and within the eligible actions to be financed by this Programme, it should be noted*** that actions and activities of the Programme may ***also*** support reforms that may help Member States ***in their preparation to join*** in the euro area, ***while respecting the principle of equal treatment of all Member States***.
- (10) In order to meet the growing demand for support from Member States, and in view of the need to support the implementation of structural reforms ***of interest to the Union, including*** in Member States whose currency is not the euro ***in their preparation to join the euro area***, the financial allocation for the Programme should be increased to a sufficient level that allows the Union to provide support ***which*** meets the needs of the requesting Member States ***and is used in accordance to sound financial management. That increase should not negatively impact the other priorities of cohesion policy. Moreover, Member States should not be obliged to transfer their national and regional allocations from European Structural and Investment Funds (ESIF)***.
- (11) In order to provide ***quality*** support with the least possible delay, the Commission should be able to use part of the financial envelope also to cover the cost of activities

supporting the Programme, such as expenses related to quality control and monitoring, *and evaluation* of projects on the ground. ***These activities are important to ensure the efficiency of project implementation.***

- (12) Regulation (EU) 2017/825 should therefore be amended accordingly.
- (13) In order to allow for the prompt application of the measures provided for in this Regulation, this Regulation should enter into force on the day following its publication in the *Official Journal of the European Union*,
