

## US elections

The United States chooses its next president on 8 November, with implications for international relations, security, trade and fight against climate change. The vote follows an acrimonious campaign, which analysts say points to a deeply divided nation on issues such as the US international role, immigration, social protection, taxation as well as trade and industrial policies.

This note offers links to **recent commentaries and reports published by major international think tanks** and other research centres on the US elections.
