

Climate change

The United Nations Secretary General, Antonio Guterres, on 28 March urged governments worldwide to come to the UN summit on climate in September 2019 with concrete plans to boost action against global warming. The call followed the publication of the annual report on climate change by the World Meteorological Organization, which warned about the dire consequences of the continued rise of greenhouse gases in the atmosphere. In the same month, hundreds of thousands of students and pupils in 120 countries have sought to draw politicians' attention to climate change by walking out of classes to stage repeated street protests.

This note brings together **commentaries, analyses and studies by major international think tanks and research institutes** on climate talks and wider issues relating to climate change. Earlier publications on the issue can be found in a [previous edition](#) of 'What Think Tanks are Thinking' published in November 2018.
