

## Latest on Russia's war on Ukraine

On 10 October, Russia began massive missile strikes against Ukrainian cities in another twist to a war launched more than 7 months ago. The attacks followed an explosion which damaged the bridge from Russia to the annexed Crimean peninsula and a successful counter-offensive by Ukrainian forces in the east and south of the country. Earlier Russia declared the annexation of Ukraine's south-eastern provinces, started a mobilisation of hundreds of thousands of additional soldiers and threatened to use its nuclear weapons. In a snub to the United States and the European Union, oil-exporting countries joined Russia in announcing cuts in their oil production, lifting its global price.
