The use of funds for gender equality in selected Member States

STUDY FOR THE FEMM COMMITTEE
The use of funds for gender equality in selected Member States

Abstract
The focus of the study is to assess how gender mainstreaming is applied in the EU funds allocations for 2014-2020. The focus is on ESIFs funding for childcare and gender mainstreaming in the use of Horizon 2020 and the REC Programmes on the Gender Equality Objective and the follow-up of Daphne Programmes on VAW. The selected countries are: Croatia, Germany, Italy, Poland, Sweden and the UK, and the reference period is 2014-2016. The assessment shows that notwithstanding the commitment to gender mainstreaming, gender budgeting is not systematically applied in the EU general budget and the selected programmes.

EXECUTIVE SUMMARY

Aims of the study

The European Parliament’s Policy Department on Citizens’ Rights and Constitutional Affairs commissioned the Institute for Social Research (IRS) to produce this study on the ‘The use of funds for gender equality in selected Member States’.

According to the indications provided by the EP services, the focus of the study is on the following issues:

- The available evidence on how gender mainstreaming is applied in the EU funds allocations on gender equality issues;
- EU funding for childcare under the work life balance policy;
- Gender mainstreaming in the use of Horizon 2020 funding;
- Gender mainstreaming in the use of the REC programme, with focus on the Gender Equality Objective and the follow-up of Daphne programmes on VAW.

The selected countries are: Croatia, Germany, Italy, Poland, Sweden, and the UK, and the reference period is 2014-2016.

The study is based on a desk analysis of the financial data and relevant documentation (programmes, calls for proposals, funded projects) currently available on the EU 2014-2020 funding programmes of interest for the period 2014-2016.

The report is structured into six chapters and a number of annexes. Following the introduction, Chapter 2 provides a brief overview of the application of gender mainstreaming in the 2014-2020 EU Multiannual Financial Framework. The following chapters focus on specific EU programmes, providing an analysis of the budget allocations for each priority and of the projects addressing gender equality among those supported so far, together with an assessment of the involvement of the six selected countries. Chapter 3 focuses on the planned use of ESI funds for childcare in the 2014-2020 Operational Programmes of the selected countries. The unavailability of the annual implementation reports before the closing of this report did not allow us to assess to what extent the planned actions were implemented so far. Chapter 4 illustrates how gender issues have been mainstreamed in the implementation of Horizon 2020; and Chapter 5 on the two REC objectives directly dealing with gender issues: the Gender Equality Objective and the Daphne objective. The concluding chapter provides some policy indications emerging from the study’s main findings.

Main findings

Notwithstanding the commitment to gender mainstreaming, Gender Budgeting is not systematically applied in the EU general budget.

A clear gender strategy, with specific objectives, targets or allocations, does not emerge from the 2014-2020 MFF and often it is not possible to derive the resources allocated to achieving gender objectives. In many programmes information from a gender perspective on financial allocations, on implementation and outcomes are lacking or are incomplete. Important tools for gender mainstreaming, such as gender indicators, Gender Impact Assessment (GIA) and Gender Budgeting (GB) are very rarely adopted in both EU and national institutions.

The EU Multiannual Financial Framework for 2014-2020 includes a joint declaration by the European Parliament, the Council and the European Commission that the annual budgetary procedures applied for the MFF 2014-2020 will integrate, as appropriate, gender-
responsive elements, taking into account the ways in which the overall financial framework of the Union contributes to increased gender equality (and ensures gender mainstreaming). It is regrettable that the MFF does not provide a clear indication of the financial resources earmarked to gender equality measures in the funded Union programmes.

The MFF midterm review (1) also does not address the implementation of gender mainstreaming, and the lack of gender-differentiated and gender-relevant data on selected actions and on beneficiaries and participants in many Union programmes makes it impossible to assess their gender effects.

In addition, the frequent recourse to ad hoc instruments constituted outside the EU budget (such as the Turkey refugee grant facility, the European Development Fund, the European Fund for Strategic Investments – EFSI, etc.), makes it even more difficult to assess the application of gender mainstreaming in the EU budget. It is thus difficult to identify the funds earmarked for gender equality in both the Commission work programmes and the Multiannual Financial Framework.

Due to the lack of an explicit reference to the budget allocated for gender equality measures, it is only possible to assess whether and how the EU 2014-2020 funding programmes address gender equality and provide financial means promoting gender equality and gender mainstreaming in key policy areas.

According to the Commission Staff Working Document for the Strategic Engagement for Gender Equality 2016-2019 (2), the overall EU funding allocated to gender equality measures in the 2014-2020 period reaches only EUR 6.17 billion, equivalent to around 0.6 % of the overall ceiling commitment appropriations.

Attention to gender mainstreaming and the provision of specific funds for gender equality measures is present mainly in programmes addressing employment and social inclusion issues or fundamental human rights (e.g. the ESF, REC, some of the funding instruments for external action, AMIF and the EaSI funds). A gender equality perspective is rarely adopted in policy fields that are not seen as immediately related to gender equality, but that may have significant gender effects such as ICT, transport, business and investment support and environmental policies.

**The European Structural and Investments Funds (ESIF)**

ESIF are the European Union’s main investment policy tool supporting the EU economic, social and territorial cohesion. They account for 34 % of the overall 2014-2020 ceiling for commitment appropriations.

The 2014-2020 ESIFs are also the main investment instruments for supporting the key priorities of the EU as enshrined the Europe 2020 strategy, and constitute the most important financial support available for the implementation of gender equality policy in the EU. Their importance in supporting investments and growth has greatly increased with the crisis, as the ESIFs have been compensating for decreasing national investments.

The ESIFs’ Common Provisions Regulations on gender mainstreaming have been strengthened in the 2014-2020 programming period. Efforts for gender mainstreaming have focused on policy statements and on procedures and tools. However, gender equality is not

---

The use of funds for Gender Equality in selected Member States

a thematic objective on its own with dedicated resources (technical, human and financial), and requirements to explicitly integrate gender equality into the Operational Programmes’ planning, implementation, monitoring and evaluation phases are lacking. The promotion of gender equality is a horizontal objective, and it is directly addressed in only one of the ESI investment priorities, while the regulations of the other ESI funds do not explicitly mention gender equality objectives and thematic gender aspects. The integration of the dual gender equality approach into Operational Programmes is voluntary, depending on the decisions of Member States and regions on the investment priorities in which to concentrate the ESI funding. This makes the assessment of the financial allocations directly or indirectly committed to gender equality difficult, especially in the absence of gender-relevant monitoring data on the implemented actions.

According to the 2016-2019 Commission Staff Working Document for the Strategic Engagement for Gender Equality, on the basis of the Operational Programmes agreed between Member States, Regions and the Commission, approximately EUR 5.85 billion will be spent in 2014-2020 on measures promoting gender equality, equivalent to around 1.3 % of the overall funding for the 2014-2020 ESI funds.

Of these, approximately EUR 4.6 billion will be spent under the ESF (equivalent to 5.3 % of the total 2014-2020 ESF EU fund budget) and approximately EUR 1.25 billion under the ERDF (0.6 % of the total 2014-2020 EU ERDF EU fund budget). EUR 1.6 billion of ESF funding is programmed under the investment priority directly addressing gender equality (Thematic Objective 08 – Investment Priority 8iv), which has been selected by 12 Member States. ERDF funding is programmed for investment in childcare and other social infrastructures which support the work–life balance of women and men with care responsibilities as well as women’s employment. In addition, under Migration – Commission Priority (2014-2020), the ERDF will also support measures to integrate migrants and asylum seekers through investments in social, health, education and housing including childcare infrastructure.

As for childcare, the Cohesion Funds could provide a crucial support to long-term investments in public care services both for children and other dependents in a context of declining public resources available at the national and local level due to budget cuts and changes in policy priorities.

Among the six countries considered in this study, Sweden is the most successful in balancing work and family responsibilities, thanks to its long-standing tradition of policy measures and funding. Gender mainstreaming has been the guiding principle for achieving gender equality since 1994 and is effectively internalised in all policy objectives. According to Eurostat data for 2014 (3) on achievements in relation to the Barcelona targets for childcare, only Sweden with a coverage rate of 57 % is above the Barcelona objective of at least 33 % of children under 3 years of age cared for in formal childcare. The UK, Germany and Italy with a coverage rate of 29 %, 28 % and 23 % respectively were relatively close, but presented wide differences between urban and rural areas and/or between regions. The coverage rate was much lower in Croatia (17 %), and especially so in Poland (6 %). The Barcelona target of 90 % of children between 3 and compulsory school age cared for in formal childcare was reached in Sweden (95 %) and Italy (91 %). Germany was close at 89 %, followed by the UK with 70 %. Again Croatia (40 %) and Poland (43 %) were lagging behind. Within this framework, no information is currently available on the funds allocated for childcare services, but it is only possible to assess if and how childcare needs have been addressed in the six countries’ Operational Programmes.

---

The Operational Programmes (OPs) in the six selected countries show different intervention models on the actions planned for childcare and the work–life balance, reflecting also their achievement of the Barcelona target on the coverage of children in formal childcare services (4).

Given that childcare and the work–life balance is already supported by national policies and funds, Sweden concentrates its effort in implementing gender mainstreaming as a horizontal objective. All ESF projects are required to take account of gender mainstreaming concerns in their activities. To this end, two structures were appointed: the GenderCoP network, dedicated to integrating the gender dimension into the ESF programmes, and the ESF Jämt providing direct support, through training and other specific measures, to the inclusion of a gender perspective in analysis, implementation, monitoring and evaluation.

In Germany early childhood education has been tackled with the use of both EU and national federal funding. The German Federal Operational Programme for the implementation of the 2014–2020 ESF includes the work–life balance among its objectives for the equality of women and men, with specific initiatives programmed within Thematic Objective 8 – Investment Priority 8iv. Specific ESF measures are meant to sensitise employers on the implementation of return-to-work management policies and to encourage companies to support work–life balance working hours and services. In addition to the ESF Federal Programme, gender equality objectives related to the balance of working and family life are also considered in ten regional OPs. In order to achieve gender mainstreaming and enable programme monitoring from a gender perspective, the Federal Ministry of Labour and Social Affairs established the Agency for Gender Equality in March 2009. The Agency provides ongoing support to the ministries involved in programming and monitoring the ESF, as well as specific advisory services to the actors involved in the implementation of the ESF, with the goal of mainstreaming gender equality into the ESF programmes and projects.

In Italy the role of structural funds in the provision of formal care services and in supporting the work–life balance is particularly important, due to the scarcity of affordable and good quality services for children below 3 years old and elderly care, especially in southern regions. However, even if gender equality is formally acknowledged in the Partnership Agreement and in the Operational Programmes, very few references can be found in the national Operational Programmes co-funded by the ESF and the ERDF to system actions and initiatives that might support the work–life balance. Only six Italian national Operational Programmes (five ESF and one ERDF) address these issues, although in a rather generic way, out of a total of eleven national Operational Programmes funded by the ESF and/or the ERDF. Gender equality objectives related to the balance of working and family life are instead considered in all the Regional ESF Ops and in the three Multi-funds programmes. All the regional ESF programmes include interventions to support the reconciliation between working and family life such as service vouchers and working time flexibility. In many cases the ESF programmes envisage specific linkages with the regional ERDF programme in order to support and develop the access to and the creation of care services (for example kindergarten in both companies and in cities) or the development of existing social and care services. ERDF programmes instead show very few specific references to the reconciliation of work and family life, even when addressing the development of social infrastructures.

Poland and Croatia provide extensive support to childcare infrastructures (nurseries and preschools) in order to support women employment and to increase the number of children cared for in based services. Currently the main objective of Polish family policy is to address demographic ageing and to increase the fertility rate through a set of measures that spread

---

4 It was not possible to assess the effective implementation of the actions planned in the OPs, due to the unavailability of the annual implementation reports before the conclusion of the study.
from financial support for families with children, to the provision of childcare services. The national programme directly aiming at the implementation of the gender equality principle (with particular emphasis on children care) is the Knowledge Education Development (POWER) Programme. In addition, all 16 Polish regional OPs support the creation of childcare facilities and indicate the number of expected new places in formal childcare among the target results. Support to childcare infrastructures (nurseries and pre-schools) is expected to create 130 000 jobs which are likely to be covered by women. Poland also allocates EUR 2.95 Billion to investments in healthcare and community care centres. In Croatia, childcare services currently do not ensure access for all families. One of the strategic national priorities is to de-institutionalise social welfare and support access to quality community-based social services by investing in social infrastructures with the support of ERDF and EAFRD (in rural areas). The ESF Operational Programme Efficient Human Resources 2014-2020 (OPEHR) includes measures broadening community-based services (childcare and care for dependant family members) and ensuring equal access to early childhood services among the actions for fighting poverty and social exclusion within Thematic Objective 9. Special attention is devoted to increasing the number of children attending preschool education with a focus on Roma children and children with disabilities. Thematic Objective 10 also includes subsidies to reduce the cost of childcare for disadvantaged children and for increasing the participation rate of Roma children in preschool education.

In the UK the ESI funds are expected to support the recent national strategy for a better work–life balance, especially through ESF investments. Almost all the six UK OPs consider care needs among the barriers to sustained employment and access to formal learning, and focus their actions on disadvantage groups, including lone parents, women returners to the labour market and inactive women. Some OPs invest in actions to support more flexible working practices, and promoting innovative actions to improve the availability of affordable and quality childcare. Childcare support for participants with childcare needs is considered as a target result and as a selection criterion for funding operations. Some OPs also provide for the ERDF to complement the ESF supporting childcare facilities and the creation of inclusive work places, including the reconciliation of work and private life.

The Horizon 2020 Programme

The programme provides for the mainstreaming of gender equality and the gender dimension in research as a cross-cutting issue in each of the different parts of the work programme. In addition to this, the 'Science with and for Society' work programme funds specific initiatives in support of the gender equality strategy (GERI calls).

However, the analysis of the programme implementation up to September 2016 shows that out of a total of 10 128 projects funded and reported in the Horizon database, only 71 projects address gender equality (0.7 % of the total of the funded projects), besides the GERI projects.

The majority (56 %) of the projects that directly and/or indirectly refer to gender equality have been financed under the Pillar ‘Excellent Science’. Out of these projects, 60 % were financed within the priorities related to Marie Skłodowska-Curie Actions which provide grants for all stages of researchers’ careers. Another 33 % of gender-related projects are financed under the Pillar ‘Societal Challenges’ covering activities from research to market with a focus on innovation-related activities. Gender-related topics range from gender medicine, to gender differences in job insecurity, or to the gender balance in sectors (such as aquaculture) not usually considered as ‘feminine’. Another 7 % were funded under the Science and Society Pillar, which is instrumental in addressing the European societal challenges tackled by Horizon 2020, building capacities and developing innovative ways of connecting science to
society. These projects address gender aspects in higher education or are meant to identify innovative approaches to release and disseminate research results.

During the period 2014-2015, five GERI calls with an estimated budget of around EUR 18 Million were issued. The majority of approved projects were supporting research organisations in the implementation of gender equality plans.

On the involvement of the selected countries, while in the 71 Horizon projects there is a strong predominance of UK leading institutions, followed at a great distance by Italy and Germany, the GERI projects are led by German and Italian institutions.

**The Rights, Equality and Citizenship Programme 2014-2020 (REC)**

The REC programme replaces three earlier funding programmes, which expired in 2013: the Fundamental Rights and Citizenship, the PROGRESS and the Daphne III programmes. Only 2 of the 9 objectives of the programme directly address gender equality and women: promote equality between women and men and gender mainstreaming; prevent violence against children, young people, women and other groups at risk (Daphne). Also, the non-discrimination objective presents cross cutting attention to a gender perspective, especially with reference to the integration of the Roma people and multiple discrimination.

The two gender objectives (Gender Equality and Daphne combating violence against women) currently account for around 35 % of the total REC funds (5) allocated for the entire 2014-2020 period.

According to the REC website, a total of 17 grants were issued between 2014 and September 2016 and a total 165 projects were funded. Of these only 7 grants were issued for the two gender-related objectives (4 calls under Daphne, 2 under the GE objective and 1 Framework Partnership Agreement covering both objectives) (6) and 46 projects have been funded, equivalent to 27.9 % of the total number of REC-funded projects.

Overall the resources earmarked in the calls for both objectives (EUR 23.5 million) are about 40.8 % of those allocated in total for these objectives in the programming cycle.

During this period the resources earmarked in the calls under the Daphne objective to fight violence against women and girls were twice those used for the Gender Equality Objective (EUR 15.86 million compared to EUR 7.65 million).

Under Daphne, the majority of resources have been earmarked for fighting and preventing violence linked to harmful practices (39 %) and for supporting victims of gender-based violence, domestic violence or intimate relationship, by specialised services (24 %).

Under the Gender Equality Objective, the majority of resources (44 %) have been spent for promoting both equal economic independence and the reconciliation of work and family life, as well as for promoting good practices on gender roles and overcoming gender stereotypes in education, training and in the workplace.

For the six selected countries, Italy is the most involved country as lead partner (9 projects) for both objectives, mobilising most of the earmarked REC resources (44 %) out of the total resources allocated to the projects led by the six countries. Sweden and the UK follow respectively with 22 % and 20 % of total resources (7). The UK is the most involved partner

---

6 The Daphne calls considered are those directly addressing violence against women and young girls. Three calls addressing children (e.g. corporate punishment, missing children, bullying at school) were not considered.

7 The analysis considered all calls under the two objectives issued so far, excluding two calls whose evaluation procedures were not yet completed.
country, participating in 15 projects with a total of 18 UK organisations, followed by Italy with 15 organisations involved. Croatia and Poland are the least involved countries, both as lead partner (with 1 project each) and as members of the partnership with 1 project for Poland and none for Croatia.

The predominance of Italy as lead partner may be explained by the scarcity of national resources dedicated to gender equality and fighting violence against women. In the same way, the lower participation of Sweden compared to Italy may be due to the greater availability of national resources allocated to these objectives. The low involvement of Croatia may be due to its recent entry into the EU and time needed by Croatian organisations to be recognised as suitable partners in EU projects.

Conclusions and policy suggestions

The EU’s political commitment to gender equality and gender mainstreaming is not yet internalised in the budget allocations and spending decisions of all policy areas and this is likely to reduce the effectiveness of gender equality strategies.

Many budget headings do not specify the amount allocated to specific policy objectives, as they often aggregate a variety of objectives and actions under umbrella items. Also, some important investment programmes are defined and funded outside the Multiannual Financial Framework and this further reduces the accountability and monitoring of the EU budget decisions in relation to gender equality.

For these reasons, financial and budgetary accountability is difficult and gender equality objectives risk being marginalised in spending decisions. Without clear objectives, dedicated resources and continuous monitoring based on gender-related indicators, gender mainstreaming is likely to fail, especially in periods of crisis and budget cuts. Since the 2008 crisis, a downgrading of gender equality in the public debate and policy agenda is indeed evident both at the EU and national level.

As underlined in evaluations of past programmes and budgets, the implementation of gender equality is usually fulfilled only in those programmes pursuing a dual strategy by combining gender mainstreaming and gender-specific measures, where gender objectives and actions are clearly identified from the beginning and gender-related indicators are included in monitoring and evaluation activities. On the contrary, the gender dimension tends to disappear in those programmes where only transversal gender objectives are declared, with no specific actions or conditions envisaged to provide concrete assistance in achieving the objective and monitoring progress.

The 2014-2020 MFF and all the EU programmes should have a stronger commitment to gender equality and gender mainstreaming. In order to be effective, gender mainstreaming has to be operationalised and supported through predictable funding and allocations. To this end it is crucial that all EU-funded programmes and budget headings adopt explicit gender equality targets whenever possible. Greater transparency in financial allocations, enhanced use of gender-related indicators, and more systematic collection of gender-disaggregated data are needed. The further advancement in Gender Budgeting, even if challenging, should be given special focus, taking into account that it is one of the most effective ways to implement gender mainstreaming. Gender Budgeting requires an extensive analysis from a gender perspective of all the actions envisaged in EU policy intervention areas and funding programmes, from the planning stage of the MFF. This requires that:

- **Gender Budgeting is made mandatory in the EU budgeting process.** All EU institutions and policy directorates should confirm their commitment to mainstream gender equality in the policy fields of their competence, adopting appropriate gender
mainstreaming tools in the policymaking processes. Gender equality should be integrated as a distinct policy objective in all headings of the EU budget, and the financial allocations for gender equality policy objectives and actions should be specified. Progress towards gender equality targets should be constantly monitored in the annual and midterm reviews of the MFF.

- **Gender-relevant data and indicators should be considered in all programmes and actions that receive funding from the EU budget** and be used in all the budgetary procedures. Gender-disaggregated data about beneficiaries and participants in all actions that receive funding from the EU budget, as well as gender-relevant data, should be collected in the monitoring and evaluation system.

- In order to support the effective implementation of gender mainstreaming in all the EU areas of intervention, it is necessary to **improve the in-house capacity of EU institutions on gender mainstreaming** by integrating a gender perspective in all EU training programmes. Providing specific training and technical support on the use of Gender Impact Assessment and Gender Budgeting tools is needed, especially in relation to those policy fields not considered as immediately related to women and gender equality, although they may have significant effects on gender equality.

In relation to the programmes considered in this study, some specific policy implications emerge from the analysis:

- The implementation of the gender equality measures envisaged in the **Operational Programmes of the ESI funds** should be closely monitored and evaluated. This will help to avoid the downgrading of gender equality measures in the implementation phase. To this end, the creation of permanent gender equality bodies providing technical support for gender mainstreaming in the planning and implementation stages of all funds is crucial, as shown by the Swedish and German cases. Special attention should be given to ESIF measures supporting investments in educational, social and healthcare services, which are facing reductions in public funding at the national and local level due to the crisis and deficit reduction strategies. The financial allocations for social infrastructures and services could eventually be increased, in the midterm revision.

- In relation to **Horizon 2020**, gender mainstreaming should be strengthened in all the funded pillars with the establishment of gender-relevant targets. In addition, an independent line of funding (such as GERI for 2014-2016) for gender-specific structural change projects as well as other gender equality topics in research and innovation should be maintained, in order to support the implementation of the binding legal requirements related to gender equality included in H2020. To this end, the changes envisaged in the new Science With and For Society Scoping Paper 2018-2020 that subsume gender equality funding under the more general heading of RRI – responsible research and innovation – should be avoided. As already underlined, past experience shows that when gender equality is subsumed within another topic, it tends to be side-lined and disappears.

- The **REC programmes** directly addressing gender issues should be maintained and the allocated resources increased, in order to contrast the sharp reductions in many Member States of public funds for measures promoting gender equality and fighting violence against women. A stronger involvement of NGOs active in gender equality fields should be supported in order to ensure effective implementation.

- The interventions implemented to face the current dramatic refugee and migrant crisis should give greater attention to the specific needs of women and girls, who are disproportionately disadvantaged and at risk of being victims of violence. The MFF
revision should provide for specific funding to support targeted measures ensuring that the basic rights, safety and security of refugee and migrant women are protected.

The role of the European Parliament, and particularly of the FEMM Committee, is particularly important for the constant monitoring, and evaluation of the implementation of gender mainstreaming and gender equality in EU budgeting decisions and policymaking.
1. INTRODUCTION

The European Parliament’s Policy Department on Citizens’ Rights and Constitutional Affairs commissioned the Institute for Social Research (IRS) to conduct this ‘Study on the use of funds for gender equality in selected Member States’.

According to the indications provided by the EP services, the focus of the study is on the following issues:

- the available evidence on how gender mainstreaming is applied in the EU funds allocations on gender equality issues;
- EU funding for childcare under the work–life balance policy;
- gender mainstreaming in the use of Horizon 2020 funding;
- gender mainstreaming in the use of the REC programme, with focus on the Gender Equality Objective and the follow-up of Daphne program on violence against women (VAW);
- selected countries are: Croatia, Germany, Italy, Poland, Sweden and the UK; reference period 2014-2016.

The study is based on a desk analysis of the financial data and relevant documentation (programmes, calls for proposals, funded projects) available on the EU 2014-2020 funding programmes of interest for the 2014-2016 period.

The report is structured into six sections and a number of annexes. Following the introduction, Section 2 provides a brief overview of the application of gender mainstreaming in the 2014-2020 EU Multiannual Financial Framework. The following sections focus on the selected EU programmes, providing an analysis of the budget allocations for each priority and of the projects supported so far, together with an assessment of the involvement of the six selected countries. Section 3 focuses on the planned use of ESI funds for childcare in the 2014-2020 Operational Programmes of the selected countries; Chapter 4 on gender mainstreaming in Horizon 2020; and Chapter 5 on the two REC objectives directly dealing with gender issues: the Gender Equality Objective and the Daphne objective. The concluding chapter provides some policy indications emerging from the study’s main findings.

The Annex includes several tables presenting additional data and information on the programmes and projects considered in the study.
2. THE USE OF EU FUNDS FOR GENDER EQUALITY

2.1. The EU commitment towards gender equality and gender mainstreaming

Besides being a fundamental right in Europe, gender equality is also increasingly recognised as a key factor in achieving the EU objectives of growth, employment and social inclusion.

The EU commitment in promoting gender equality has changed over the years. Since the initial approach focusing only on equal treatment in employment, the European Union has extended its activities in other areas of gender equality (8). Besides legislative intervention, since 1996 (9) the Commission adopted a dual-approach strategy towards gender equality, which encompasses both proactive intervention (gender mainstreaming) and reactive intervention (specific measures such as policies addressing the gender pay gap, gender discrimination, etc.) in tackling gender equality.

Gender mainstreaming is based on the recognition that women and men do not have the same resources, needs and preferences and that many structures, systems and policies are not gender neutral, but treat men’s experience as the norm (10). Adoption of a gender mainstreaming approach involves mobilising all policies and measures taking into account their possible effects on the respective situation of men and women in all stages of the policy process, ‘so that a gender equality perspective is incorporated in all policies at all levels and at all stages, by the actors normally involved in policy making’ (CoE, 1998). Introducing the gender mainstreaming approach marked a significant change from the previous Community action on equal opportunities for men and women, which was based mainly on departmental activities and programmes funded under different specific budget headings (11). However, as underlined by many experts, the adoption of a gender mainstreaming approach risks to produce a sort of ‘gender blindness’ (12), with less attention and investment in specific gender equality measures, such as policies tackling gender gaps, reconciliation policies, etc. The lack of an explicit commitment to gender equality in the Europe 2020 strategy is an example.

In recent years, the Commission commitment to gender equality and gender mainstreaming was reaffirmed in the Women’s Charter (13) and the Roadmap for equality between women and men for the period 2006-2010 (14) at the basis of the five-year strategy for equality between women and men for the period 2010-2015 adopted in 2010 (15).

---

8 While the Treaty of Maastricht (1993) marks a turning point, introducing new procedures and practices in the field of gender equality extending the adoption of the co-decision procedure on matters involved in Articles 137 and 141 of the EC Treaty, the Treaty of Amsterdam (1997) placed equality between women and men among the explicit tasks of the European Community by reinforcing and formalising the introduction of gender equality among the principles of the Treaty. With the entry into force of the new Lisbon Treaty amending the Treaty of the European Union (2009), equality between women and men has been upgraded to the status of ‘fundamental value’ (Art.2 TEU) and objective (Art.3 TEU) of the EU.
9 8 European Commission Communication of 21 February 1996 Incorporating equal opportunities for women and men into all Community policies and activities (COM(96) 67 final).
11 COM(96) 67 final, cited.
The strategy represented the work programme of the European Commission on gender equality and highlighted the contribution of gender equality to economic growth and sustainable development. The strategy was organised into six priority areas:

1. equal economic independence;
2. equal pay for work of equal value;
3. equality in decision-making;
4. dignity, integrity and ending gender violence;
5. promoting gender equality beyond the EU;
6. horizontal issues, including gender mainstreaming.

For each priority area, the strategy identified some key actions to be carried out until 2015 as well as more than 120 actions to be implemented by different Commission services and the European External Action Service.

According to a 2015 evaluation of the strategy strengths and weaknesses (16), the strategy produced positive effects of value added especially in relation to the agenda setting and learning dimensions. It provided a valuable framework for gender mainstreaming in the European Commission and for the implementation of a coherent framework for gender equality policies in Member States. The strategy enhanced attention to the gender pay gap, innovation and gender in ICT and research. The strategy also supported an extension of the types of actions and measures implemented, with increasing attention to awareness-raising measures, data-gathering, monitoring and evaluation tools. The involvement of all the European Commission DGs, even if to different degrees, in the programming and implementation of gender mainstreaming in almost all policy areas, was another significant achievement. There was also the establishment of interdepartmental coordination mechanisms (the inter-service group on gender equality) (17) and the support for a greater gender balance in the Commission services management positions and committees.

However, the implementation of gender mainstreaming in those policy domains not considered as directly related to women and gender equality (18) has been limited. In addition, some important tools for decision-making, like the Gender Impact Assessment (GIA) and Gender Budgeting (GB), are still rarely adopted in the EU or national institutions.

Gender mainstreaming, even if greatly improved, still remains weakly institutionalised in the EU decision-making process. Gender equality units in the European Commission have limited power to interact on the same level with other decision-making bodies. In addition, the recent tendency to merge all grounds of discrimination, including discrimination based on sex, within the promotion of civil rights and equal treatment for all,

17 The inter-service group on equality between women and men (in which all Commission departments are represented and which meets at least twice a year) will continue to monitor and steer the integration of a gender equality perspective in policy, legal and spending programme activities, including budgetary matters, across all EU policy areas. See: European Commission – DG Justice and Consumers (2015), Strategic engagement for gender equality 2016-2019.
18 For example environmental policies, transportation and competition policies, regional development, macroeconomic policies, and the media and communication policies that may affect women and men differently, as shown by recent developments in socio-economic research.
The use of funds for Gender Equality in selected Member States

risks is to downgrade the profile of gender equality and gender mainstreaming in the policy agenda.

Another major weakness of the strategy was the lack of suitable resources (both human and financial), with no budget earmarked to the gender equality strategy, as well as to gender equality in the EU programmes.

These drawbacks can also be found in the recent Strategic engagement for gender equality 2016-2019 (19) published in December 2015 as a follow-up and prolongation of the previous strategy for equality between men and women, providing a reference framework to sustain the 2011-2020 European Pact for gender equality (20).

As a partial step forward in the application of gender mainstreaming in the EU policy making, the Inter-Service Group (21) will continue to monitor and steer the integration of a gender equality perspective. This will cover policy, legal and spending programme activities, including budgetary matters, across all EU policy areas. It will consider issuing a report on gender mainstreaming in the Commission in 2017 presenting sectorial aspects, such as gender equality in transport, energy, education, health, taxation, agriculture, trade, regional policy, maritime affairs and the environment (22). The European Parliament, and particularly the FEMM Committee, is also playing a crucial role in monitoring and supporting the application of gender mainstreaming in all EU policy making.

However, in recent years, and especially since the 2008 crisis, a downgrading of gender equality in the public debate and policy agenda is present at both the EU and Member States levels. Research clearly demonstrates that gender equality has suffered during this current period of austerity in many European countries and that commitments to GB have been challenged (23).

2.2. The application of gender mainstreaming the EU Multiannual Financial Framework (MFF) 2014-2020

Gender Budgeting (GB) is a very powerful tool for gender mainstreaming (24). It implies the application of gender mainstreaming in the budgetary process through a gender-based assessment of budgets, incorporating a gender perspective at all levels of the budgetary process. It involves restructuring revenues and expenditures in order to ensure that gender equality objectives and gender mainstreaming obligations are followed consistently in all

21 The Inter-Service Group on gender equality is managed by the Gender Equality Unit in DG Justice and Consumers, which coordinates the annual monitoring and reporting of the implemented actions and provides a synthesis of the main developments in the Annual report on equality between women and men.
22 See footnote 26.
24 According to the Council of Europe definition: ‘Gender budgeting is the application of gender mainstreaming in the budgetary process through a gender-based assessment of budgets, incorporating a gender perspective at all levels of the budgetary process and restructuring revenues and expenditures in order to promote gender equality’. The focus of Gender Budgeting is twofold. First the focus is on the analysis of gender-disaggregated effects of public revenues and expenditures. Based on the results of this analysis, Gender Budgeting then aims to modify budget structures and processes in a second step so as to foster gender equality. See Council of Europe (2009), Gender Budgeting, practical implementation handbook, prepared by S. Quinn. http://www.femtech.at/sites/default/files/Gender_budgeting_-_practical_implementation.pdf
budget headings that are relevant for it. It is based on the recognition that budgets are non-neutral policy instruments, but may have very different impacts on women and men.

The first attempt to introduce GB into the EU budgetary process was made in 2002, when the Advisory Committee on Equal Opportunities for Men and Women of the European Commission officially acknowledged the importance of budgets for policy planning, and recommended the inclusion of EU budgetary policy in gender mainstreaming (25). The Advisory Committee also recommended the exchange of good practices among the EU institutions and the encouragement of GB initiatives at national level. In 2008, a study commissioned by the European Commission’s Directorate-General for Budget confirmed that the EU budget was suitable for GB. It suggested that GB should first be adopted in the MFF, and then in the strategic programming and planning cycle (26).

The European Union’s commitment to GB was also reflected in the cited Roadmap for equality between women and men (2006-2010). This indicated GB as a tool for the implementation of gender equality, and stated that the Commission would support Gender Budgeting and GIA. In 2009 the Council of Europe published a handbook on the practical implementation of GB (27). Moreover, the new strategy for equality between women and men includes the objective of advancing GB as part of EU budgeting.

Notwithstanding this commitment, GB is not yet systematically applied in the EU general budget.

Even the current EU Multiannual Financial Framework for 2014-2020 only includes a joint declaration that: 'the European Parliament, the Council and the Commission agree that the annual budgetary procedures applied for the MFF 2014-2020 will integrate, as appropriate, gender-responsive elements, taking into account the ways in which the overall financial framework of the Union contributes to increased gender equality (and ensures gender mainstreaming)' (28). However, it does not provide a clear indication of the financial resources earmarked to gender equality measures in the funded Union programmes and budget headings.

The MFF midterm review (29) also does not address the implementation of gender mainstreaming. The lack of gender-differentiated and gender-relevant data on beneficiaries and participants in many Union programmes makes it impossible to assess their gender effects.

In addition, as underlined in a recent European Parliament working document (30), the frequent recourse to ad hoc instruments constituted outside the EU budget (such as the

25 Advisory Committee on Equal Opportunities for Women and Men, Opinion on gender budgeting, May 2003.
26 European Commission, DG Budget, Study to assess the feasibility and options for the introduction of elements of gender budgeting into the EU budgetary process, 2008 Specific contract ABAC 132007, under framework Contract BUDG 06/PO/01/Lot 002?ABAC-101922.
27 Council of Europe (2009), Gender budgeting: practical implementation handbook, prepared by Sheila Quinn https://rm.coe.int/CoERMPublicCommonSearchServices/DisplayDCTMContent?documentId=0900001680599885
Turkey refugee grant facility, the European Development Fund (EDF), etc.), creates a problem of accountability in the EU. This makes it even more difficult to assess the application of gender mainstreaming in the EU budget, and to identify the funds earmarked to gender equality in both the Commission work programmes and the MFF.

**Box 2.1: The 2014-2020 MFF**

The MFF lays down the maximum annual amounts (‘ceilings’) which the EU may spend in different political fields (‘headings’) over a seven-year period. The upcoming MFF covers seven years: from 2014 to 2020. By specifying in which areas the EU should invest more or less over the seven years, the MFF is an expression of political priorities as much as a budgetary planning tool. The annual budget is adopted within this framework and usually remains below the MFF expenditure ceilings in order to retain some flexibility to cope with unforeseen needs. The MFF is part of a comprehensive package which also comprises the EU own resources and a set of sector-specific legislation defining the conditions of eligibility and the criteria for allocating funds for each EU spending programme. The functioning of the MFF 2014-20 has been reviewed by the Commission in 2016 taking full account of the economic situation at the time as well as the latest macroeconomic projections. According to the most recent technical adjustment of the MFF {COM(2016) 311 final}, for the period 2014-2020, the revised MFF sets a maximum amount of EUR 1 087 billion in commitment appropriations and for EUR 1 025 billion in payment appropriations (current prices). In commitments, this represents about 2.1 % of EU Member States’ total government expenditure and 1.04 % of EU gross national income. For the first time the ceilings for the 2014-2020 period are lower than the previous ones, although the MFF includes new programmes that cover Europe’s political priorities for the next seven years, such as research and innovation (Horizon 2020), connecting the transport, energy and IT infrastructure of all Member States (connecting Europe facility), education (ERASMUS+), job opportunities for our youth (youth employment initiative – YEI), competitiveness of Europe’s businesses (COSME), and the adoption in June 2015 of the European fund for strategic investment (EFSI).

The MFF 2014-20 is divided into six categories of expense (headings) corresponding to different areas of EU intervention:

1. **Smart and Inclusive Growth** (47 % of the overall 2014-2020 ceiling for commitment appropriations).

   - **Competitiveness for growth and jobs** includes research and innovation; education and training; trans-European networks in energy, transport and telecommunications; social policy; development of enterprises etc. This heading should absorb up to 13 % of the overall 2014-2020 ceiling for commitment appropriations.

   - **Economic, social and territorial cohesion** covers regional policy which aims at helping the least developed EU countries and regions to catch up with the rest, strengthening all regions’ competitiveness and developing inter-regional cooperation. This heading includes the European structural and investment funds (ESIFs). This heading should absorb up to 34 % of the overall 2014-2020 ceiling for commitment appropriations.

2. **Sustainable Growth: Natural Resources** includes the common agricultural policy, common fisheries policy, rural development and environmental measures. This heading should absorb up

---

31 The European Development Fund (EDF) supports cooperation activities in the fields of economic development, social and human development as well as regional cooperation and integration. It is financed by direct contributions from EU Member States according to a contribution key and is covered by its own financial rules. It remains outside the EU budget, however the negotiations in the Council of Ministers on the different elements of the 11th EDF have taken place in parallel with the negotiations of the external instruments financed under the budget, to ensure consistency. The total financial resources of the 11th EDF amount to EUR 30.5 billion for the period 2014-2020. [http://ec.europa.eu/europeaid/funding/funding-instruments-programming/funding-instruments/european-development-fund_en](http://ec.europa.eu/europeaid/funding/funding-instruments-programming/funding-instruments/european-development-fund_en)
to 34% of the overall 2014-2020 financial allocations. This heading should absorb up to 39% of the overall 2014-2020 ceiling for commitment appropriations.

3. **Security and citizenship** includes justice and home affairs, border protection, immigration and asylum policy, public health, consumer protection, culture, youth, information and dialogue with citizens. This heading should absorb up to 2% of the overall 2014-2020 ceiling for commitment appropriations.

4. **Global Europe** covers all external action (foreign policy) by the EU such as development assistance or humanitarian aid with the exception of the European Development Fund (EDF) which provides aid for development cooperation with African, Caribbean and Pacific countries, as well as overseas countries and territories. As it is not funded from the EU budget but from direct contributions from EU Member States, the EDF does not fall under the MFF. This heading should absorb up to 6% of the overall 2014-2020 ceiling for commitment appropriations.

5. **Administration** covers the administrative expenditure of all the European institutions, pensions and European schools. This heading should absorb up to 6% of the overall 2014-2020 ceiling for commitment appropriations.

6. **Compensations** are temporary payments designed to ensure that Croatia, who joined the EU in July 2013, does not contribute more to the EU budget than it benefits from it in the first year following accession.

In the first years of implementation (2014-2015), the MFF has contributed to addressing the economic crisis and the resulting investment gap, the refugee crisis, the internal and external security concerns, as well as climate change.

The lack of clear commitment to GB in the EU budget has been pointed out by various independent budget assessments. A 2012 assessment conducted for the European Parliament in preparation for the 2014-20 MFF (32), underlines that implementation and evaluation especially are still lacking or incomplete (33). The study also shows that documents related to the 2014-2020 MFF present reduced gender awareness in comparison to the previous programming period, most notably in the scarcity of explicit references to gender equality as a policy objective in its own right.

A 2015 EP study on ‘The EU budget for gender equality’, also concludes that the EU’s high-level commitment to gender equality and gender mainstreaming is not always acted on at lower levels, and recommends greater transparency, enhanced use of gender-related indicators and more systematic collection of gender-disaggregated data.

Due to the lack of an explicit reference to the budget allocated for gender equality measures, it is only possible to assess whether and how the EC 2014-2020 funding programmes address gender equality and provide financial means promoting gender equality and gender mainstreaming in key policy areas.

---

According to the Commission Staff Working Document for the Strategic Engagement for Gender Equality 2016-2019 (34), the overall EU funding allocated for gender equality in the 2014-2020 period reaches EUR 6.17 billion, equivalent to around 0.6 % of the overall commitment appropriations.

The following sections provide an overall assessment for the main EU funds and programmes addressing gender equality, while Chapters 3, 4 and 5 focus on the ESF and ERDF funds addressing childcare, and the implementation of gender mainstreaming in the projects funded up to September 2016 by Horizon 2020 and by the two REC programmes directly addressing gender issues.

2.2.1. The ESIFs (35)

With an overall budget of EUR 454 Billion for 2014-2020, the ESI funds are the European Union’s main investment policy tool supporting the EU economic, social and territorial cohesion. The ESIFs 2014-2020 are also the main investment instruments for supporting the key priorities of the EU as enshrined the Europe 2020 strategy and constitute the most important financial support available for the implementation of gender equality policy in the EU.

Their importance in supporting investments and growth has greatly increased with the crisis, as the ESIFs have been compensating for decreasing national investments. According to the European Commission (36) in 2014-2016, the commitments from ESIFs are expected to account for approximately 14 % of total public investment on average, with the highest share reaching beyond 70 % in some Member States.

The 2014-2020 ESI funds can finance numerous initiatives aimed at promoting gender equality within social and economic sustainable development policies. The ESIFs are meant to provide funding for enhancing gender equality in all policy areas, including access to employment, career progression, reconciliation of work and private life and promotion of equal pay for equal work. It should also cover infrastructures and business support that are not under a specific gender investment priority, but contribute to gender equality in a more indirect way.

The ESIFs regulations for the 2014-2020 programming period include the following (37):

- **Multiple references to gender equality and non-discrimination principles.** Article 7 of the common Regulation (EU) No 1303/2013 for 2014-2020, provides the legal basis for mainstreaming and is reinforced throughout the Common Provisions Regulation (CPR) (38), by explicit references to gender equality, non-discrimination and accessibility.

- **General ex ante conditions** on gender equality, non-discrimination and accessibility (does not apply to European Territorial Cooperation programmes).

---

35 European Regional Development Fund (ERDF), the Cohesion Fund (CF) and the European Social Fund (ESF), the European Agricultural Fund for Rural Development (EAFRD) and the European Maritime and Fisheries Fund (EMFF)

38 Regulation (EU) No 1303/2013  
For ESF: Clear obligation for Member States to implement a ‘dual approach’. In addition to mainstreaming, equality between women and men as well as non-discrimination should be pursued through specific actions.

The managing authority shall ensure that the data are broken down by gender whenever possible (39). However, there is no longer a specific requirement for all funds to have statistics broken down by sex, except for the ESF (see Article 125(2)(e) CPR and Annex 1 of the ESF Regulation). The cited guidelines for EC desk officers underline that ‘where programmes are focusing on “people-related schemes” (training, entrepreneurship measures ...), targets should be set, at least in terms of participation of women and groups at risk of discrimination. Where possible and appropriate, these targets should be supplemented by financial targets or even more qualitative targets (in relation to possible gaps identified in women’s employment or groups at risk of discrimination in some specific economic sector for instance)’.

The ESIFs regulations also require a number of other criteria.

- Member States should include their partnership institutions and non-governmental organisations working in gender equality and non-discrimination (Article 5(1)(c) CPR).
- The managing authority shall draw up and, once approved, apply appropriate selection procedures and criteria that are non-discriminatory and transparent and take into account gender equality and non-discrimination principles. The managing authority must make sure that the project holder has carried out an analysis of the needs of men and women and/or of the impact of a project on men and women, as well as the needs of groups which suffered from discrimination.
- **The annual implementation reports submitted in 2017, 2019 and by the deadline referred to in CPR Article 138 (1) shall specifically assess the implementation of actions to take into account the principles of gender equality, non-discrimination and accessibility (Article 50(4) CPR). The monitoring committee shall examine actions to promote equality between men and women, equal opportunities and non-discrimination including accessibility for persons with disabilities (Article 110 (1) (f) CPR, Article 114 of the EMFF). Thus, institutional bodies responsible for gender equality and non-discrimination and NGOs active in gender equality and non-discrimination should be involved, except in duly justified cases.**

- **The ex ante evaluation** shall appraise the adequacy of planned measures to equal opportunities between men and women and to prevent any discrimination, in particular as regards accessibility for persons with disabilities (Article 55 (3) (I) CPR).

However, gender equality is not a thematic objective on its own, with dedicated resources (technical, human and financial) and requirements to explicitly integrate gender equality into all the programmes’ planning, implementation, monitoring and evaluation phases are lacking. The promotion of gender equality is a horizontal objective, and it is directly addressed in only one of the ESF investment priorities. In addition, the integration of the dual gender equality

---

39 This is a regulatory requirement for the ESF (Annex I of ESF regulation). For the EAFRD, job creation by the LEADER/CLLD approach (as a target indicator) will be split by gender as well as the number of beneficiaries of the measures related to business development and to investment in agricultural holdings (as an output indicator); for the EMFF, the annual data provision on operations (Article 99 of EMFF) should include gender breakdown for the beneficiaries as well for operations, where relevant; for the other funds, the principle of equality mainstreaming should be translated in the monitoring and reporting system.
The use of funds for Gender Equality in selected Member States

approach into Operational Programmes is voluntary, depending on the decisions of Member States and regions in which investment priorities to concentrate ESI funding.

In detail (40):

- The 2014-2020 ESF funds measures aimed at combating all forms of discrimination and promoting equal opportunities and equality between men and women in all areas. Gender equality objectives and a dual gender equality approach, both in mainstreaming and with specific actions, are mandatory requirements in the ESF for the funding period 2014-2020. The new ESF regulations:
  
  o directly address the promotion of gender equality only in Investment Priority 8iv) equality between men and women in all areas, including access to employment and career development, the reconciliation of work and family life and the promotion of equal pay for equal work or work of equal value;
  
  o four investment priorities address equal opportunities and anti-discrimination priorities for all more generally:
    
    - 9i) Active inclusion, including with a view to promoting equal opportunities and active participation, and improving employability;
    - 9iii) the fight against all forms of discrimination and the promotion of equal opportunities;
    - 9iv) the improvement of the access to affordable, sustainable and quality services, including healthcare and social services of general interest;
    - 10i) Reducing and preventing early school-leaving and promoting equal access to good quality early childhood, primary and secondary education including formal, non-formal and informal learning pathways for reintegrating into education and training.

- The 2014-2020 ERDF regulations do not explicitly mention specific gender equality objectives and thematic gender aspects, although they could be addressed in all the ERDF thematic objectives and investment priorities, and particularly in the following:
  
  o TO1: strengthening research, technological development and innovation;
  o TO2: enhancing access to, and use and quality of, ICT;
  o TO3: enhancing the competitiveness of SMEs;
  o TO6: promoting sustainable transport and removing bottlenecks in key network infrastructures;
  o TO9: promoting social inclusion, combating poverty and any discrimination, by:
    
    (a) investing in health and social infrastructure which contributes to national, regional and local development, reducing inequalities in health status; promoting social inclusion through improved access to social, cultural and recreational services and the transition from institutional to community-based services;

(b) providing support for physical, economic and social regeneration of deprived communities in urban and rural areas;
(c) providing support for social enterprises;
(d) undertaking investment in the context of community-led local development strategies.

Qualitative evidence from the evaluations of past programming periods (41), indeed show that women are among the beneficiaries of these measures, even if often little attention has been paid to their specific needs in the intervention design, and in defining the accessibility conditions. For example, measures supporting female entrepreneurship were often not designed with attention to the specific needs of women entrepreneurs (like, for example the need for maternity support, the greater difficulties compared to men in access to credit, the lack of social networks, etc.) and this reduced their effectiveness. ERDF support for care facilities for children and the elderly were more effective both in creating jobs for women and in improving women’s work–life balance. Finally, women were often the main beneficiaries of the ERDF interventions in rural or urban regeneration.

The 2014-2020 EAFRD Regulation states that EARDF funding should support women entrepreneurship in rural areas through the diversification into non-agricultural activities and the setting up and the development of non-agricultural SMEs in rural areas. Thematic sub-programmes should concern, among others, women in rural areas funding the following actions: knowledge transfer and information actions, advisory services, farm management and farm relief services, investments in physical assets, farm and business development, basic services (such as kindergartens, schools, buses, etc.) village renewal in rural areas, and cooperation, through LEADER(42).

The 2014-2020 EMFF finances initiatives to promote the role of women in fishing communities and the networking and exchange of experiences and best practice among aquaculture enterprises or professional organisations and other stakeholders, including those promoting equal opportunities between men and women.

The Cohesion Fund is aimed at Member States whose gross national income (GNI) per inhabitant is less than 90 % of the EU average. It aims to reduce economic and social disparities and to promote sustainable development. A total of EUR 63.4 billion is allocated to activities under the following categories:

- trans-European transport networks, notably priority projects of European interest as identified by the EU. The Cohesion Fund will support infrastructure projects under the Connecting Europe Facility;
- environment, supporting projects related to energy or transport, as long as they clearly benefit the environment in energy efficiency, use of renewable energy, developing rail transport, supporting intermodality, strengthening public transport, etc.

---

41 Istituto per la Ricerca Sociale and CSIL (2007), Gender mainstreaming in the use of structural funding study, European Parliament, May 2007;
Istituto per la Ricerca Sociale and CSIL (2009), Ex post evaluation of Cohesion Policy programmes 2000-2006 co-financed by the European Fund for Regional Development (Objectives 1 and 2) - Work package 7: Effectiveness of the Cohesion Policy: gender equality and demographic change, September, 2009.
Although some of the funded actions could be addressed in a gender equality perspective (for example in accessibility), gender equality is not mentioned in the fund regulation.

The ESI funds policy framework and regulations on gender mainstreaming are thus relatively robust. Efforts on gender mainstreaming in the structural funds have focused strongly on policy statements and on procedures and instruments – reflected in the technical guidelines. However gender equality is not a specific thematic objective with dedicated resources (technical, human and financial) in all the funds, and the lack of systematic monitoring and evaluation data are an obstacle to the implementation of GM and gender equality measures at the national and regional level and for the assessment of their gender impact.

Information on funds allocated to gender equality is difficult to collect. According to the European Commission Staff Working Document for the Strategic Engagement for Gender Equality 2016-2019 (43), based on the Operational Programmes agreed between Member States, Regions and the Commission, approximately EUR 5.85 billion will be spent in 2014-2020 on measures promoting gender equality. Of these, approximately EUR 4.6 billion will be spent under the ESF and approximately EUR 1.25 billion under the ERDF.

EUR 1.6 billion of ESF funding is programmed under the specific investment priority ‘equality between men and women in all areas, including in access to employment, career progression, reconciliation of work and private life and promotion of equal pay for equal work’, which has been selected only by 12 Member States (44). ERDF funding is programmed for investment in childcare infrastructures. In addition, under the Migration Commission Priority (2014-2020) (45), the ERDF will also support measures to integrate migrants and asylum seekers through investments in social, health, education and housing including childcare infrastructure.

The ESF also contributes to the YEI with EUR 3 Billion out of a total allocation of EUR 6.2 billion for 2014 and 2015. Given the persistence of youth unemployment in many regions the Commission proposed to supplement the original allocation of the YEI by EUR 1 billion over 2017–2020, with EUR 1 billion of matching funding to be provided from the European Social Fund. The YEI was launched in 2013 to provide targeted support to young people not in education, employment or training (NEETs) in the EU’s regions with a youth unemployment rate in 2012 at above 25%. To date, over 1.4 million young people have been covered by YEI-supported actions. In many Member States, EU funds (YEI and ESF) are used to support the national youth guarantee schemes (46). The Council Recommendation on Establishing a Youth Guarantee (47) requires that ‘gender and diversity of the young people who are being targeted’ be considered in the design of the schemes. The background analysis of the staff working document provides indications of gender differences in entering and remaining in the labour market. Furthermore, the European Youth Report, recently adopted by the Commission, and its staff working paper on the situation of young people in Europe, includes gender-disaggregated information (European Commission 2012a and b). However, there is

44 AT, CZ, DE, ES, FI, GR, HU, IT, PL, PT, SK and UK.
46 A programme endorsed in April 2013 with the aim to ensure that all young people under the age of 25 years receive a good-quality offer of employment, continued education, an apprenticeship or a traineeship within a period of four months of becoming unemployed or leaving formal education
no indication on whether and how gender mainstreaming should be applied in the implementation of national measures (48).

The extent to which measures directly or indirectly supporting gender equality will be adopted crucially depend on decisions taken in the implementation of the ESIFs programmes by regions and Member States. An indication of the importance of the implementation phase comes from previous programming period.

For example, for the European Social Fund, which should provide the largest amount of resources for gender equality, results from the evaluation of the 2007-2013 programming period (49) show that:

- only 3.7% of the total ESF resources on average for all Member States was allocated to specific gender equality actions, and there is no evidence that gender actions have been mainstreamed;
- targets related to employment were more likely to be adopted by Member States; other gender-sensitive objectives in relation to poverty, care, empowerment, etc., appear to have been overlooked.

In the same way, the evaluation of the 2000-2006 programming period (50) shows that, in many cases, the proportion actually allocated to gender equality actions was lower than intended in the programming documents. Failure or inability to translate intentions into specific priorities of the national operational plans could be one of the reasons.

The ex post evaluation of the promotion of gender equality in the ERDF and CF 2007-2013 (51) found good overall awareness of the Article 16 requirements in programmes supported by the ERDF, with explicit reference in 64% of the programmes analysed. The ERDF and the Cohesion Fund promoted equal opportunities in SME support, public transport infrastructure, social infrastructure (childcare facilities), and in some cases also on other policies that could potentially promote equal opportunities. The main critical aspect was the presence of only formal statements, without a clear indication of how to intervene. In general, focused social infrastructure investment is not common, which leads to some difficulties in understanding the added value of the investments, and also to the sharing of good practices among the countries. Almost all the Member States allocated resources to childcare services. However, the total expenditure has varied greatly across Member States depending on the budget available under the structural funds and the current state of the provision of services.

2.2.2. Horizon 2020

Horizon 2020 is the biggest EU research and innovation programme with EUR 79.4 billion (at 2013 prices) of funding available over seven years (2014 to 2020). It is the financial

51 Public Policy Institute, Net Effect, Racine (2009), Ex post evaluation of the ERDF and CF – Study on the translation of Article 16 of Regulation EC 1083/2006 on the promotion of gender equality, non-discrimination and accessibility for disabled into Cohesion policy programmes 2007-2013 co-financed by the ERDF and the Cohesion Fund, for the European Commission – Info Regio, 2009.
The use of funds for Gender Equality in selected Member States

Instrument implementing the innovation union, a Europe 2020 flagship initiative aimed at securing Europe’s global competitiveness. It is also seen as an instrument to drive economic growth and create jobs. Horizon 2020 activated a large number of project proposals but, given the available resources, could finance less than one-third of the proposals evaluated positively up to 2016 (52).

In Horizon 2020 gender is a cross-cutting issue and is mainstreamed in each one of the different parts of the work programme, ensuring a more integrated approach to research and innovation.

Funding is also provided for the development of a common framework to evaluate national initiatives promoting gender equality in research policy. A dedicated campaign aims at encouraging girls to study science and female students to further embrace a career in research. Research is funded to analyse the impact of gender diversity in research teams on research and innovation performance.

The Commission published the first Horizon 2020 Monitoring Report in 2016 (53). The report covers the calls closed in 2014 and the grants signed before December 2015, and it helps to identify the most important issues related to performance, implementation aspects and participation trends, providing data for all priorities and specific objectives of Horizon 2020. However, it is not possible to assess the overall financial commitments to gender equality in the work programmes (WP) 2014-2017, besides the EUR 43 million for the GERI programme. For a detailed assessment, see Chapter 4.

2.2.3. The Rights, Equality and Citizenship 2014-2020 Programme (REC) (54)

REC defends the rights and freedoms that people are entitled to under EU law. It replaces three earlier funding programmes which expired in 2013:

- Fundamental rights and citizenship programme;
- Daphne III programme;
- PROGRESS programme: anti-discrimination and gender equality strands.

Among its nine objectives, one is explicitly related to gender equality and another to preventing and combating violence against women, children and young people and protecting victims and groups at risk.

REC is meant to co-finance national projects promoting equal economic independence, overcoming rigid gender roles and stereotypes, and raising awareness of the gender pension gap and its causes and consequences. It also finances projects supporting victims of gender-based violence, training relevant professionals, raising awareness and preventing violence linked to harmful practices.

The overall budget is EUR 439.5 million over the period 2014-2020. The two objectives (gender equality and combating violence against women) currently account for around 35% of the total REC funds. For a detailed assessment, see Chapter 5.

53 See: http://ec.europa.eu/research/evaluations/index_en.cfm
2.2.4. The Employment and Social Innovation (EaSI) Programme (55)

The EaSI promotes high quality and sustainable employment, appropriate social protection, combating social exclusion and poverty and improving working conditions.

EaSI is managed directly by the European Commission. It brings together three EU programmes that were managed separately between 2007 and 2013 and that now form the three axes of EaSI:

- the PROGRESS axis (targeted to the modernisation of employment and social policies, it uses 61% of the total budget);
- the EURES axis (targeted to the job mobility, it uses 18% of the total budget);
- the Microfinance and Social Entrepreneurship axis (targeted to the access to microfinance and social entrepreneurship, it uses the 21% of the total budget).

The total budget for 2014-2020 is EUR 919.5 million at 2013 prices. The objectives of this programme are to:

- strengthen ownership of EU objectives and coordination of action at EU and national levels in the areas of employment, social affairs and inclusion;
- support the development of appropriate social protection systems and labour market policies;
- modernise EU legislation and ensure its effective application;
- promote geographical mobility and boost job opportunities by developing an open labour market;
- increase the availability and accessibility of microfinance for vulnerable groups and micro-enterprises, and increase access to finance for social enterprises.

In pursuing these objectives, EaSI finances gender equality mainly through its progress axis which supports initiatives promoting gender equality in employment and in the labour market. It also involves the microfinance facility for employment and social inclusion axis which supports women’s entrepreneurship through ensuring their access to credit and other financial mechanisms. In addition, the promotion of equality between women and men, including through gender mainstreaming, and, where appropriate, GB, is among the cross-cutting objectives. It is however difficult to assess the financial allocations for gender equality and gender mainstreaming.

The Commission produces an annual monitoring report of good practices and performance, and it has recently published an evaluation roadmap for the EaSI programme (56). The EaSI monitoring and evaluation will have to assess the extent to which horizontal issues, such as gender equality, non-discrimination, inclusion of vulnerable groups and others, are regularly taken into account in the EaSI-supported activities. This will be undertaken by:

i) estimating the extent to which outputs of the programme have a horizontal issue dimension. This process will be based on a separate column in the annual work programme, which will be allocated to indicate whether an output takes into account any of the horizontal issues;

---

ii) estimating the extent to which the horizontal issues were taken into account during the projects supported via the action grants. This information will be collected from the final technical implementation reports available for all activities.

Initial monitoring results for 2014 (\(^{57}\)) show that gender equality and non-discrimination issues were less notable during EaSI funded events than in the overall policy debate. The EaSI monitoring report on 2014 also shows that out of 10 013 natural persons benefiting from loans over the whole duration of the PROGRESS microfinance, 36.5 % were women. Number of intermediaries focused on providing loans specifically to female entrepreneurs. PROGRESS also funded networks in the areas of non-discrimination and gender equality. Overall, EaSI-supported key EU-level NGO networks, which besides the production of guidelines and reports, also organised 257 courses, peer reviews and other mutual learning events, as well as 136 information and communication events, with a total of 12 062 participants, of whom the majority (55 %) were women.

2.2.5. Other programmes with gender effects (\(^{58}\))

According to the Commission’s document on Strategic engagement for gender equality 2016-2019, the programmes indicated below address the promotion of gender equality and gender mainstreaming; however, it is not possible to assess the share of financial allocations that have been used for supporting women or gender mainstreaming.

Gender equality is a fundamental value of EU external relations and is integrated into its main external instruments financed under the EU budget. Under the Development Cooperation Instrument (DCI), out of EUR 19.7 billion (2013 prices), EUR 100 million will be committed to improving the lives of girls and women through the 2014-2020 global public goods and challenges specific thematic programme. Out of these funds, EUR 70 million is earmarked for the ‘gender, women’s empowerment and girls’ rights’ budget heading and EUR 30 million for the ‘child well-being’ heading, which will include EUR 18 million to tackle harmful practices such as FGM and child marriage. In the European Neighbourhood Instrument (ENI), with an overall allocation of EUR 15 432.63 million (current prices), gender equality and equal opportunities are among the cross-cutting issues to be addressed in the fund priorities. In Regulation (EU) No 232/2014 establishing the fund, ‘gender equality, the rights of persons belonging to minorities and the fight against discrimination and inequalities are cross-cutting objectives in all actions undertaken under this Regulation’. The European Instrument for Democracy and Human Rights (EIDHR), with a total amount of EUR 1,332.75 million (2013 prices), providing support for the promotion of democracy and human rights in non-EU countries, includes among its redefined objectives:

i) a stronger wording on the role of civil society, including a specific reference to the cooperation between civil society, local authorities and relevant state institutions;

ii) a stronger emphasis on each vulnerable group (national, ethnic, religious and linguistic minorities, women, lesbian, gay, bisexual and inter-sex persons (LGBTI) and indigenous people);

iii) a stronger emphasis on economic and social rights. The new 2014-2020 Instrument for Pre-accession Assistance for candidate countries (IPA II) with a budget of EUR 11.7 Billion, includes the promotion of gender equality among its five main policy areas. According to Regulation (EU)No 231/2014 of 11 March 2014 (\(^{59}\)): ‘Assistance should mainly focus on a

---

selected number of policy areas that will help the beneficiaries listed in Annex I to strengthen democratic institutions and the rule of law, reform the judiciary and public administration, respect fundamental rights and promote gender equality, tolerance, social inclusion and non-discrimination’.

Gender mainstreaming is also among the funding principles of the recent Asylum, Migration and Integration Fund (AMIF). AMIF, with a total amount of EUR 3.1 billion for 2014-2020 (current prices), plus the per capita lump sum allocated for the resettlement of each migrant or refugee (60), supports measures addressing all aspects of migration including asylum, legal migration, integration and the return of irregularly staying non-EU nationals. According to Regulation (EU) No 516/2014 of 16 April 2014 (61) establishing the fund:

'Eligible actions ... should, in particular, ensure that special attention is paid to, and a dedicated response is provided for, the specific situation of vulnerable persons, in particular women, unaccompanied minors and other minors at risk’ and ‘... the fund should take account of the mainstreaming of equality between women and men and anti-discrimination principles’.

In addition, women are among the vulnerable groups qualifying for a higher financial support in resettlement measures. In order to face the dramatic increase of refugee and migration inflows, special instruments provided for in the MFF Regulation (such as the flexibility instrument and the emergency aid reserve) have been mobilised in the last two years to top up the AMIF funds. In addition, a number of European trust funds and a facility for refugees in Turkey (with a budget of EUR 3 billion for 2016 and 2017) have been established outside the EU MFF. These funds are very difficult to monitor, especially from a gender perspective.

The programme for the Competitiveness of Enterprises and Small and Medium-sized Enterprises (COSME) has a total amount of almost EUR 2.3 billion (current prices). COSME is meant to improve access to finance for SMEs through two financial instruments that have been available since August 2014 to facilitate access to loans and equity finance for SMEs where market gaps have been identified: the Loan Guarantee Facility, and the Equity Facility for Growth. The overall COSME budget of over EUR 1.3 billion is expected to mobilise up to EUR 25 billion from financial intermediaries via leverage effects. The financial instruments are managed by the European Investment Fund in cooperation with financial intermediaries in EU countries. The Entrepreneurship 2020 Action Plan is the policy framework for COSME and among its main areas of action is the provision of role models and outreach to specific groups, such as young people, women and senior entrepreneurs. An example of action already supported by COSME is the European Network of Mentors for Women Entrepreneurs (62) providing advice and support to women entrepreneurs in the start-up, running and growth of businesses; the creation of a European E-Platform for Women Entrepreneurship in October 2016; the European Network of Business Angels for Women Entrepreneurs is also to be created in 2016. The strong demand for COSME financial instruments resulted in the whole 2014-2015 budget being used up by mid-2015.

The ERASMUS+ Programme for education, training, youth and sport has an allocation of almost EUR 14.8 billion (2013 prices) for the period 2014-2020. The promotion of gender
equality and non-discrimination is explicitly mentioned in the programme regulation (63), together with the aim to produce indicators disaggregated by sex when assessing the number of participants in the programme. An assessment of the ERASMUS mobility programme in 2011-12 (64) shows that 61 % of ERASMUS students are female, which is a share 1.13 times higher than the fraction of female students attending tertiary education in the ERASMUS countries. The over-representation of female students is systematic across subject areas and countries. Women also represented 51 % of those involved in the staff mobility programme in 2012-2013 (65).

The European Fund for Strategic Investments (EFSI), adopted in June 2015, is meant to mobilise EUR 315 billion in new investment in the real economy over the following three years (2015-2017). It will support strategic investments in key areas such as infrastructure, education, research and innovation, as well as risk finance for small businesses. To establish the EU Guarantee Fund, a gradual contribution from the EU budget has been envisaged reaching EUR 8 billion by 2020, constituted partly by the MFF unallocated margins (EUR 3 billion) and the rest by redeployments from existing programmes, namely Horizon 2020 and Connecting Europe Facility (CEF). According to the Commission midterm review of the MFF 2014-2020, around 300 projects had been approved in 26 EU Member States by July 2016. These projects are expected to support some 200,000 SMEs and to mobilise EUR 115.7 billion in total investment, representing more than one-third of the overall objective. The gender equality horizontal principle is included in the statute of the EFSI and the investment areas can have significant gender equality effects if gender issues are considered in the projects’ planning and implementation. However, there is no indication of the gender composition of supported entrepreneurs and of the potential gender impact of supported projects.

The Connecting Europe Facility (CEF) with a total allocation of EUR 21.9 billion (2013 prices) supports the development of high-performing, sustainable and efficiently interconnected trans-European networks in energy, telecommunications and transport. The CEF will allow the construction of projects that would not be taken up by the market otherwise. Within this programme, financial support for the Safer Internet Digital Services Infrastructure and helplines in Member States for young victims of cyberbullying is particularly important for girls who are twice as likely than boys to be victims.

63 Regulation (EU) No 1288/2013 establishing Erasmus +: the EU programme for education, training, youth and sport

3. EU FUNDING FOR CHILDCARE AND THE WORK–LIFE BALANCE POLICY

3.1. Introduction

Childcare has moved up on EU priorities since the EC 2013 Recommendation Investing in Children – breaking the cycle of disadvantage (66), which proposed a long-term social strategy to support children and to help mitigate the effects of the current economic crisis.

There are three key pillars to this recommendation (67):

1. access to suitable resources;
2. access to affordable quality services;
3. children’s right to participate.

Quality childcare and early childhood education is not only considered as a tool for the work–life balance, but also as a way to tackle child poverty and social exclusion. According to recent socioeconomic research, social investment in individual capacities during the early years is particularly beneficial for children from a disadvantaged background, breaking the intergenerational transmission of poverty and providing large social returns. The availability of affordable, quality childcare is also important to support the labour market participation of women (and men) with children and, together with the sharing of family responsibilities, is a prerequisite for the advancement of women’s careers and their ability to engage in decision-making roles.

In 2002, the Barcelona European Council set objectives in this area, stating that:

'Member States should remove disincentives to female labour force participation, taking into account the demand for childcare facilities and in line with national patterns of provision, to provide childcare by 2010 to at least 90 % of children between 3 years old and the mandatory school age and at least 33 % of children under 3 years of age' (68).

Although some progress has been made since 2002, and despite the commitment of the Member States under two successive European pacts for equality between women and men, the provision of childcare facilities at European level in 2014 was still not in line with these objectives. Furthermore, the situation appeared to have been deteriorated in some Member States since the crisis.

According to Eurostat data for 2014 (69), only nine Member States have met the Barcelona targets for children up to the age of three (BE, DK, F, LU, NL, PT, SL, ES and SE). Nine Member States reached the target for children from age three to mandatory school age are in childcare (BE, DK, EE, F, IT, MT, SL, ES and SE).

For the six considered countries, the same Eurostat data on the achievement of the Barcelona targets on children cared for in formal childcare show that in 2014 only Sweden with 57

69 Eurostat 2016, Formal childcare by age group and duration – % over the population of each age group, http://ec.europa.eu/eurostat/tgm/refreshTableAction.do?tab=table&plugin=1&code=tps00185&language=en
% had achieved and surpassed the Barcelona objective of at least 33 % of children under 3 years of age cared for. The UK, Germany and Italy with a coverage rate respectively of 29 %, 28 % and 23 % were relatively close, but presented wide differences between urban and rural areas and/or between regions. The coverage rate was much lower in Croatia (17 %), and especially in Poland (6 %).

As for children between the age of 3 and compulsory school age (70), the Barcelona target of 90 % cared for in formal childcare was reached in Sweden (95 %) and Italy (91 %). Germany was close at 89 %, followed by the UK with 70 %. Again Croatia (40 %) and Poland (43 %) were lagging behind.

3.2. The use of ESI funds for childcare as part of the work–life balance policy in the six considered countries

An assessment was conducted in 2016 by RAND on ESF support to childcare (71) based on the brief descriptions of Operational Programmes available on the ESF website. In the 2014-2020 programming period 11 Member States (BE, BG, CZ, EE, DE, EL, HU, IT, PL, PT and SK) provide ESF support for childcare provisions under the thematic objective of social inclusion (TO9).

In order to assess whether ESI funds have been considered to support childcare in the 2014-2020 programming period in the six considered countries, a desk analysis of the 2014-2020 national and regional Operational Programmes was carried out (72). The unavailability of the Annual Implementation Reports before the closing of this report did not allow us to assess to what extent the planned actions were implemented so far.

The table below summarises the results of the assessment, while additional information is provided in the following sections for each of the selected countries.

---

70 Compulsory school age is 4, 5, 6 or 7 depending on the Member State.
72 The analysis of the OPs was based on the synthesis provided in the EU web site http://ec.europa.eu/contracts_grants/funds_en.htm and on additional reports and documentation available in English, Italian, German and Polish.
---|---|---
**Croatia** | • From 1997, significant efforts have been made for the promotion of gender equality with specific national policies, however the protection and promotion of gender equality still needs to be strengthened by also creating equal opportunities in the labour market. | • The ESF Operational Programme Efficient Human Resources 2014-2020 (OPEHR) activates EUR 1.849 billion overall, of which EUR 1 582 billion is from the EU budget including EUR 66 million from the Youth Employment Initiative. Early childcare community-based social services previously financed under IPA are to be further supported by the ESF, with the aim to develop non-institutional forms of care (e.g. day-care centres and other facilities for children and other disadvantaged people) and to enhance access to affordable, sustainable and high-quality social services for vulnerable groups. |
| | • The reconciliation of private and professional life for women is particularly difficult due to cultural bias: care responsibilities are considered as exclusively women’s tasks, while job and career are higher on the list of priorities for men than for women. | • Under TO8 – Promoting sustainable and quality employment and supporting labour mobility, OPEHR includes women among the target groups with reference to training, retraining, traineeships and focuses on promotion and support of women’s self-employment for reducing unemployment. |
| | • In Croatia the highest poverty rates affect single women households, single parents and families with children and low work intensity. Currently in Croatia early childhood care does not ensure universal access to all families needing such services and it does not support employment of parents. Ensuring equal access to public services and to early childhood services can reduce poverty and social exclusion. | • Childcare and early childhood services are also dealt with under TO9 – Combating poverty and social inclusion. The investment priority Improving access to high-quality social services, (Axis 2, IP 9iv) provides measures for broadening community-based services, including childcare and care for dependent family members. Investment Priority 9i) supports actions to combat all forms of discrimination and devotes special attention to increasing numbers of children attending preschool education taking into account specific regional situations and with particular focus on the Roma minority and children with a disability. |
| | • The National Strategy for the Rights of the Child in the Republic of Croatia for the period from 2014 to 2020 points to ‘Improving the System and the Provision of Child-Friendly Services’ among its strategic areas. Another strategic priority is to deinstitutionalise and transform social welfare providers. | • TO10 Education and lifelong learning (IP 10iii) underlines the large regional differences in coverage and quality of preschool programmes. Planned initiatives will provide subsidies to support access of disadvantaged children to preschool education, and particularly for Roma children. |
| | • Several investments in preschool care and education services are implemented outside the ESF by the State at the national and local level (state kindergartens) or by religious communities (kindergartens of religious communities) and by other Croatian legal and natural persons (private kindergartens). | • ESF actions are complemented by ERDF and EAFRD (in rural areas) investments in social infrastructure for providing community-based services (e.g. day or half-day care centres). These funds can also support the infrastructural investment of other social services providers, such as CSOs. |
| | • Improving the reconciliation between work and private life is still a challenge in Germany. | • The German Federal Operational Programme for the Implementation of the ESF in the period 2014-2020 includes reconciliation within its objectives with regard to equality of women and men. In detail, initiatives are programmed within the Thematic Objective 08 – Investment Priority 8iv – Equality between men and women in all areas, including in access to employment, career progression, reconciliation of work and private life and promotion of equal pay for equal work. |
| | • This policy need has been tackled by the use of both EU funding and national funding which was used to implement actions and initiatives outside the ESF at the federal level in the area of early childhood education. | • To achieve gender mainstreaming and enable an optimisation of programme control from a gender perspective, in March 2009, the Federal Ministry of Labour and Social Affairs contracted the Agency for Gender Equality within the ESF – a support structure for achieving more gender equality as a desired outcome of the European Social Fund. The Agency offers ongoing support to ministries involved in programming and monitoring the ESF and implementation bodies advise the responsible actors on different levels of implementation of the ESF, with the goal of mainstreaming gender equality into the ESF programmes and their respective projects. |
| | • in Italy there is a low provision of appropriate and affordable childcare and elderly care facilities and inadequate work–life balance policies (even if with great differences at regional level) and the role of structural funds on this issues is paramount. | • In addition to the ESF Federal Programme, gender equality objectives related to the balance of working and family life are considered in 10 regional OPs. |

Even if gender equality is acknowledged formally in the partnership agreement and in the Operational Programmes, very few references can be found in the national Operational Programmes for both ESF and ERDF to support system actions and initiatives that might increase the reconciliation of working and family life.
|---------|------------------------------------------------|-------------------------------|
| **Poland** | The main objective of the Polish family policy is to address demographic ageing and to increase the fertility rate through a set of measures that spread from financial support for families with children, to the provision of social services. Affordable childcare for families with low or medium incomes and the creation of childcare centres and kindergartens are planned.  
The number of childcare services rapidly increased from 571 in 2011, to 2,910 in 2015; incentives were introduced to legalise the employment of nannies (through state contributions to social and health insurance); a national programme ('Maluch') was implemented and an additional 9,000 childcare places were created. From 2015, the programme was expanded by additional funds for the creation of around 1,436 childcare places at universities; since September 2013, the government has reduced the cost of kindergarten for families.  
In 2015-2016 new parental and family benefits were introduced, together with a mechanism to extend eligibility for the benefit. In January 2016, the parental leave system was made more flexible and paternal leave was introduced entitling fathers to two weeks leave over two years.  
On May 2014 activation benefits and telework grants were introduced for the unemployed re-entering the labour market after taking care of a dependent person.  
Sweden is one of the EU’s most successful countries in balancing work and family responsibilities with a background of policy measures, initiatives and funding. Gender mainstreaming has been the guiding principle for achieving gender equality since 1994 and is included at national level in the policy objectives.  
With no need to finance childcare (which is generously financed by national funds), Sweden concentrated its effort in implementing gender mainstreaming as an horizontal issue instead of adapting specific objectives addressed to women and the achieving of gender equality. | The national project La Femme was financed in the programming period 2007-2013 and aimed at implementing services specifically addressed to companies. Its objective of supporting the implementation of initiatives of working time flexibility and business welfare plans is considered to be good practice, to be further implemented.  
In addition to the ESF National Programmes, gender equality objectives related to the balance of working and family life are also considered in the regional OPs financed through ESF and ERDF as well as in the three Multi-funds programmes.  
Poland will receive EUR 86 billion from ESI funds over the period 2014-2020 and is the largest beneficiary of the Cohesion policy (ERDF, ESF, Cohesion Fund) to be invested on the basis of 24 national and regional programmes.  
Investments are aimed at addressing main development gaps and strengthening social, economic and territorial cohesion. ESI funds will assist Poland in achieving national targets of EU2020 and its flagship initiatives.  
Support to childcare infrastructures (nurseries and pre-schools) is expected to create 130,000 jobs which are likely to be covered by women.  
Almost all the Polish regional Operational Programmes envisage the creation of childcare facilities. |
| **Sweden** | Sweden is one of the EU’s most successful countries in balancing work and family responsibilities with a background of policy measures, initiatives and funding. Gender mainstreaming has been the guiding principle for achieving gender equality since 1994 and is included at national level in the policy objectives.  
With no need to finance childcare (which is generously financed by national funds), Sweden concentrated its effort in implementing gender mainstreaming as an horizontal issue instead of adapting specific objectives addressed to women and the achieving of gender equality. | All ESF Sweden projects are required to take account of gender mainstreaming concerns in their activities. To this end, two structures were drawn up: the GenderCoP network, which is specifically dedicated to integrating the gender dimension into the ESF programmes, and the ESF Jämt which will provide direct support initiatives in the form of training and other specific support including a gender perspective in analysis, implementation, monitoring and evaluation. |
### Provision for Childcare in National Strategies

- In recent years implementation of reforms on shared parental leave and flexible working schemes have been carried out.

- The 2011–2015 programme for the Delivering Social Change framework includes strategic actions to reduce child poverty, also through providing integrated and affordable childcare and childcare cost support for low income parents.

<td>UK</td>
<td>The 2014-2020 UK Partnership Agreement underlines that social and childcare, will be tackled by both the ESF and ERDF, investing around EUR 11.8 billion across the UK. The ESF share of EUR 4.9 billion is funding the six operational programmes and includes EUR 206 million for the YEI (73). The ESF OP for England within its priorities, focuses on disadvantaged groups in the labour market among which are the unemployed or economically inactive, especially disadvantaged groups such as people with disabilities, lone parents, older workers and ethnic minorities; women returners and other groups of women currently outside the labour market. - TO8: the programme includes actions to assist women into work through reskilling, retraining and help women returners to the labour market after caring for children and to low skilled women and/or in part-time jobs wanting to progress. - TO9: focus is on the most disadvantaged, including inactive ethnic minority women, older women and those at risk of poverty and social exclusion. It provides them with help to address barriers to work including caring responsibilities and childcare needs. - Targeted advice to women are provided under TO8 and 10 (Priority Axis 1 and 2). Providing childcare support for participants with childcare needs is considered a target result by the programme. - The Scotland ESF Programme outlines the accessibility of childcare advice and childcare support for employment or entering into formal learning. Childcare and social care are considered among the main key barriers to work for people disengaged from the labour market. New services and innovative solutions for accessing childcare and social care services are supported. In addition, under TO8 and TO9 the selection criteria include the presence of a sound understanding of gender equality in removing barriers for women returners, targeting childcare provision and assisting lone parents. The Youth Employment Initiative Priority Axis also addresses childcare costs when providing training or employment services. - ESF East Wales programme in TO9 considers care needs among the barriers to sustained employment and supports innovative actions to improve the availability of affordable and quality childcare. TO8 invests in actions to support more flexible working practices and childcare, and targets employers to raise their awareness of gender disadvantage in the workforce and to develop diversity policies. - The ESF West Wales and the Valleys programme specifically sets among its objectives to reduce inequalities in the labour market among women and recognised equality groups (4 Objective). Under the Priority Axis 1 – Tackling Poverty through Sustainable Employment (TO 9: Promoting Social Inclusion, Combating Poverty and any Discrimination) specific actions targeted at people at risk of slipping out of employment as also for caring or childcare responsibilities are provided. The Priority Axis 2 - Skills for Growth (TO10: Investing in Education, Training and Vocational Training for Skills and Lifelong Learning and TO8: Promoting sustainable and quality employment and supporting labour mobility) has been developed in line with two objectives including the objective 4 – ‘to reduce inequalities in the labour market among women and recognised equality groups’ as well. Under this objective, there is a specific focus on improving the position of women in the workforce throughout actions facilitating the provision of more flexible working practices which can assist women to progress their career while recognising care or childcare responsibilities. Actions also raise the awareness of employers of gender disadvantage in the workforce and they support the development of diversity policies to overcome discrimination regarding pregnancy and maternity or to meet the need for childcare. - The ESF Northern Ireland programme supports specific activities targeting women and lone parents, as well as parents of children with disabilities participating in the Community Family Support Programme (under TO9).</td>

3.2.1. Croatia

Gender equality is among the highest values of the constitutional order of Croatia (Art. 3 of the Constitution of the Republic of Croatia). The 2008 Law on Gender Equality sets out the basis for the protection and promotion of gender equality. It defines and regulates protection from gender-based discrimination and it lays down the preconditions necessary to create equal opportunities for men and women.

From 1997, through four documents of the National Policy for the Promotion of Gender Equality, women’s rights in all spheres of activities (political, social, economic, cultural and public life) are promoted. Three crucial areas in which women need to be guaranteed the full enforcement of their rights were identified: family, working environment and society.

According to the European Parliament (2013) (74), significant efforts have been made in the promotion of gender equality through national policies, but the system of protection and promotion of gender equality still needs to be strengthened. Improvements are needed in the promotion and protection of human rights of women by creating equal opportunities in the labour market, introducing gender-sensitive education and balancing the participation of women and men in the decision-making processes. Institutional mechanisms and methods for implementation of the equal opportunities policy also require further strengthening.

As for reconciliation of private and professional life, women in Croatia have difficulties in reconciling their professional and private lives as it is generally considered that childcare, elderly care and housework are exclusively women’s tasks, while job and career are higher on the list of priorities for men than for women (European Parliament, 2013). Raising awareness actions on the family responsibilities shared between women and men combined with measures such as flexible working hours and parental leave can make it easier for women to balance professional and family life.

Particularly strategic is reinforcing infrastructure, such as nurseries and kindergartens. In this sense, the National Strategy for the Rights of the Child in the Republic of Croatia for the period from 2014 to 2020 points to ‘improving the system and the provision of child-friendly services’ among its strategic areas. Extra-institutional forms of support for families is given by the act on nannies that regulates the performance of activities of nannies and also allows women co-funding local and regional self-government in the development of this type of service. In this way, parents opting for this type of childcare can hire a professional who takes care of children and whose work is supervised (75).

In addition, with the aim of providing services to children in line with their needs, one of the strategic priorities of the Government of the Republic of Croatia over the recent years was to deinstitutionalise and transform social welfare providers.

The work–life balance and childcare issues are also considered within the 2014-2020 programming period especially through ESF investments which in Croatia are being made available through the ESF Operational Programme Efficient Human Resources 2014-2020 (OPEHR).

This programme contributes to the creation of jobs and strengthens social cohesion in Croatia, focusing on the improvement of the socioeconomic conditions and devoting special attention to the people at risk of poverty and social exclusion.

---

75 See: http://europa.eu/epic/countries/croatia/index_en.htm
The use of funds for Gender Equality in selected Member States

Its total value is EUR 1.849 billion of which EUR 1.582 Billion is from the EU budget, including EUR 66 million from the Youth Employment Initiative.

Its investments covers four main areas (76) among which are the following aims:

- to support access to sustainable and quality employment for job seekers and inactive persons;
- to support the provision of high-quality social services adapted to the specific needs of targeted population and areas (Community-based services targeting children, persons with disabilities and youth without suitable parental care will be developed) to tackle the high risk of poverty and social exclusion rate in the country.

This Operational Programme formulates clear objectives on the **equality of women and men** by including women among the target groups of its actions in the Priority Axis 1 High employment and labour mobility (TO8 – Promoting sustainable and quality employment and supporting labour mobility). The most significant allocation provided for in this priority axis was the general objective of the OPEHR, aiming at increasing employment and employability.

In more detail:

- **Under 8i**
  - Access to employment for job seekers and inactive people, including the long-term unemployed and people far from the labour market, also through local employment initiatives and support for labour mobility, ESF Investments provide training, retraining and traineeships for the disadvantaged groups, in line with real LM needs aiming at increasing employability and relevant skills attainment and include women as specific target together with long-term unemployed, low skilled workers and older workers. The programme also focuses on the promotion and support of self-employment among women, considering family or personal responsibilities among the main reason for inactivity among women, while for men is education.

- **Under 8viii**
  - Modernisation of labour market institutions, such as public and private employment services, and improving the matching of labour market needs, including through actions that enhance transnational labour mobility as well as through mobility schemes and better cooperation between institutions and relevant stakeholders, the implementation of micro-projects in line with strategic needs and priorities in employment and education are supported focusing on specific target groups including women recognised among the most vulnerable people on the local labour markets. Local labour markets play a crucial role in combating unemployment as well.

**Childcare** and **early childhood services** are broadly dealt with under Priority Axis 2 – combating poverty and social inclusion (TO9) and Priority Axis 3 – education and lifelong learning (TO10) Priority Axes.

Axis 2 underlines that Croatia has one of the highest rate of persons at risk of poverty and social exclusion in the EU. **The highest rates are for single women households** (42.7 %) and for **single parents** (40.4 %) and in **families with children** and low work intensity (70.6 %). **Ensuring equal access to public services and to early childhood services**, as well as increasing adequacy of social benefits in the social welfare system and raising

---

76 The other two areas are: to ensure an adequate match between the skills of the workforce with the labour market needs; to support the national reform of the public administration through better management of public finances and developing the e-administration and social dialogue.
employability of working active population, especially for vulnerable groups, are provided among the actions for combating poverty and social exclusion.

The programme underlines that the access to quality community-based social support is limited and a shift from institutional to community-based care is recommended.

It also outlines that lack of services puts an additional burden on those caring for dependant members and prevents them from entering the labour market or keeping a job. Currently in Croatia early childhood care does not ensure universal access to all families needing such services and it does not support employment of parents.

To respond to this need the specific objective ‘Improving access to high-quality social services, including support to the shift from institutional to community care’ (Axis 2) under Priority Investment 9i:

‘Enhancing access to affordable, sustainable and high-quality services, including healthcare and social services of general interest’, it provides measures for broadening the community-based services (childcare and care for dependent family members) also resulting in enhanced reconciliation of work and family life.

Furthermore, the programme states that continuation of projects by local stakeholders providing early childcare community-based social services financed through IPA will be further supported by ESF as well as projects developed by social service providers in local communities are also supported with aim to develop non-institutional forms of care in a community (such as day-care centres and other facilities for children, persons with disabilities, elderly people) in order to enhance access to affordable, sustainable and high-quality social services for vulnerable groups.

**Investments in social infrastructure to support the process of deinstitutionalisation and to improve conditions for providing social services in the community have supported by ERDF and EAFRD (in rural areas) in a complementary manner.**

Investments cover adaptation, reconstruction, equipment of existing infrastructures of social welfare institutions in order to use them for the provision of community-based services (e.g. day or half-day care centres) developed under ESF. In addition, where capacities of institutions are not sufficient for completion of deinstitutionalisation process, infrastructural investment of other social services providers, such as CSOs, are to be financed by the programme.

Axis 2 also supports actions to combat all forms of discrimination and under 9i:

‘Active inclusion, including with a view to promoting equal opportunities and active participation, and improving employability’, devotes special attention to increasing the number of children attending preschool education taking into account specific regional situations and with particular focus on the Roma minority and children with a disability.

**Axis 3 – Education and Lifelong Learning,** under TO10 – ‘Investing in education, training and vocational training for skills and lifelong learning’, 10iii, ‘Enhancing equal access to lifelong learning for all age groups in formal, non-formal and informal settings, upgrading the knowledge, skills and competence of the workforce, and promoting flexible learning pathways including thorough career guidance and validation of acquired competence’, underlines that progress was made in the last decade with respect to the coverage of children by preschool education. The number of kindergartens and programmes designed for preschool-age children was increased and efforts were made to adjust working hours of preschool institutions to parents’ needs. However, there are large regional differences in coverage and quality of preschool programmes.
The planned interventions are related to the subsidies of the cost of the involvement of children with a socio-economically disadvantaged background in preschool education.

As for the need to increase the participation rate of Roma children at the level of preschool education, a targeted investment in the form of subsidising the cost of participation has been introduced.

Finally, several actions and investments in preschool care and education services are implemented outside the ESF by the state at the national and local level (state kindergartens founded by the Republic of Croatia and by the local government) or by religious communities (kindergartens of religious communities) and by other Croatian legal and natural persons (private kindergartens). They are organised in nursery and kindergarten groups at preschool and kindergarten facilities and are provided for children from age six months to primary school age (77).

Box 3.1 illustrates two interesting projects on childcare and the work–life balance funded respectively as part of the 2014-2020 and 2007-2013 programming cycles.

**BOX 3.1: Examples of projects funded under the 2014-2020 and 2007-2013 programming cycles**

**Early integration project**
In the context of the 2014-2020 programming period, Croatia implements an EU-funded programme for children with disabilities. In the neighbourhood of Gajnice, an ESF co-funded nursery school with 90 new places for children with disabilities was recently opened. Besides providing day care, the school will also implement Croatia’s ‘Early support network programme’ promoting the integration of children with disabilities into the education system. The programme is being run in partnership with the primary school Ban Josip Jelačić and the City of Zagreb’s Department of Education, Culture and Sports.

**Busy bees – Community improvement and employment (78)**
The Busy Bees project was carried out in 2011-2012 and funded under the 2007-2013 programming with an ESF contribution of EUR 94 551. It was established in partnership with the City of Pleternica, the Oppidum Association and the Croatian women’s society. The aim is to provide childcare for working parents and jobs for individuals properly trained for this purpose in childcare and preschool education. The participants gained work experience through newly established playgroups. The project was targeted to 225 young people in the Pleternica county, mainly with secondary school or college diplomas and among these a core group of 30 individuals was selected (Grad Pleternica 2016) (79). Among its results, this programme also trained 10 unemployed young people in childcare services, and equipment was provided for two children’s playrooms in two remote villages (Udruga Oppidum 2016) (80).

### 3.2.2. Germany

In Germany, the gender equality policy is based on Article 3, Section (2) of the Basic Law for the Federal Republic of Germany: ‘Men and women shall have equal rights. The state shall promote the actual implementation of equal rights for women and men and take steps to remove disadvantages that now exist.’ This formulation points to the need to take action in respect of continuing gender inequalities which were specified in the first gender equality

80 Udruga Oppidum projects (2016), as of 28 February 2016: [http://www.oppidum.hr/english](http://www.oppidum.hr/english)
report of Germany in 2011, New Pathways – Equal Opportunities Gender Equality over Women’s and Men’s Life Courses. This report has special significance for the gender equality policy in Germany in several respects: for the first time the guiding principle of the life course perspective is comprehensively introduced and presented as a principle for equality policy perspectives for all policy areas.

Within this context, attention to work–life balance policy has been considered among the levers to contribute to creating jobs and strengthening social cohesion across Germany through the best use of Cohesion Funds.

Indeed, according to the Position of the Commission Services on the development of partnership agreements and programmes in Germany for the period 2014-2020 (81) improving the reconciliation between work and private life by promoting innovative ways of work organisation and developing innovative solutions for the provision of childcare and long-term care services, is still a challenge in Germany.

Thus it will be particularly important to give higher priority in CSF funding to enhance gender equality and facilitate women’s reintegration into high-quality employment after career breaks due to care duties. In particular, a high priority is given to the improvement of the quality of affordable and flexible care services (such as full-time childcare and out-of-school care) and thus increase the participation in care facilities. Having started slowly, the number of child day-care facilities increased through to 2013 – particularly in western Germany – with the introduction of the legal entitlement to childcare. However, the expansion of childcare facilities in Germany carries with it additional challenges both in the quality and quantity of childcare. In particular, this includes better qualification of the care personnel, higher participation rates below the age of three, ongoing efforts with a view to disadvantaged children and the development of new concepts for the educational preschool and school phases. This is particularly true in a country like Germany where a very high percentage of part-time work for women exists with a lack of care facilities. A more gender-balanced distribution of unpaid care work is equally considered to be crucial to strengthen the measures listed above.

All these aspects are considered within the 2014-2020 Programming Period especially through ESF investments which in Germany are being made available through 17 Operational Programmes, one for each of the German Länder and one at federal level (Bund).

The German Federal Operational programme for the implementation of the ESF in the period 2014-2020 formulates clear objectives on the equality of women and men which address:

- the increase in employment securing a livelihood and the economic independence of women;
- a better reconciliation of work and personal life;
- the removal of gender-specific stereotypes in career choice;
- the increase in the share of women in decision-making positions.

In detail, the main objectives of the German ESF Operational Programme at federal level are the promotion of employment, social inclusion and education. The programme will contribute to the following priorities:

- Promoting social inclusion and combating poverty with a focus on the sustainable labour market integration of the long-term unemployed, the sustainable placement of migrants into employment or vocational and educational training, and improved

---

The use of funds for Gender Equality in selected Member States

access of disadvantaged young people to employment, training and education (including through implementation of the Youth Guarantee). Approximately 73 000 long-term unemployed, 150 000 migrants and 100 000 disadvantaged young people are due to be supported through these measures.

- Investing in education, skills and lifelong learning. Expected results include the improvement of skills and qualification levels and widening access to education systems, supporting the transition from school into employment, including through implementation of the Youth Guarantee, and strengthening the capacities of SMEs in vocational education. Approximately 100 000 young people and 71 000 employed people are due to be supported through these measures.

- Promoting sustainable and quality employment and support labour mobility. The main target groups are small and medium-sized companies (SMEs), employed people including the self-employed, women and migrants. Expected results include improving the capacity of SMEs to adapt to demographic change, to overcome a crisis or to remain in business, better reconciliation of private and professional life and the recognition of professional qualifications obtained abroad. Approximately 260 000 SMEs, 20 000 (inactive) women and 18 000 migrants will be supported in this context.

Given the need for action, several action and investment promotion programmes will be implemented outside the ESF at the federal level in the area of early childhood education. Among those are the ‘Child day-care facilities focusing on language and schooling’ federal programme, several modules of the child day-care programme of action as well as federal investment promotion programmes and funding programmes from the Kreditanstalt für Wiederaufbau (KfW) – Germany’s state-owned development bank. These national efforts are supported by the federal ESF in targeting as yet untapped workforce potential of people wishing to change careers and become an educator within the investment priority ‘Enhancing equal access to lifelong learning for all age groups in formal, non-formal and informal settings, upgrading the knowledge, skills and competence of the workforce’.

In many other cases, potential for improving conditions to reconcile family and career commitments is offered in the form of organisational changes at SMEs, also with a view to facilitating a return to work after a family-related career break. This includes an increase in working hours to help safeguard the economic independence of women and men. Therefore, the ESF support also contributes to strengthening the framework within companies for workers to achieve a better work–life balance and to improve equality of opportunities on the labour market. ESF pilot measures are also to be trialled to determine how the labour market participation and working hours of women can be increased, particularly of women who are not in gainful employment or women in marginal employment, and of mothers with a migrant background. The aim is also to sensitise employers to sustainable return-to-work management policies and encourage them to offer support services so workers can avoid having to give up their job to care for a family member or so workers can increase their volume of work if family members are in need of care or long-term care. The measures are implemented in the investment priorities ‘Equality of men and women in all areas, including in access to employment, career progression, reconciliation of work and private life (…)’ and ‘Enhancing equal access to lifelong learning for all age groups in formal, non-formal and informal settings (…)’.

Within the Thematic Objective 08 – Investment Priority Biv – Equality between men and women in all areas, including in access to employment, career progression, reconciliation of work and private life and promotion of equal pay for equal work will:
reduce labour market segmentation and enhance gender equality in the labour market and facilitate the reconciliation of work and private life;

raise awareness and mobilise economic and social partners to address gender segmentation, the gender pay and pension gap, as well as unequal distribution of unpaid care work;

increase the number of, and improve the access to affordable and flexible care services (such as full-time early childhood education and care, out-of-school care and care for dependent persons including the elderly);

enhance support for women with children or single parents and for those with migration backgrounds in order to facilitate entry into the labour market;

tackle gender stereotypes in education and training systems, promote fewer gender-biased career choices, and facilitate women’s promotion into management positions;

facilitate women’s reintegration into high-quality employment after career breaks due to care duties;

promote innovative ways of work organisation, including teleworking and flexible working arrangements allowing people to combine informal care duties with work and develop innovative solutions for the provision of childcare and long-term care services.

These objectives are said to be implemented with the support of specific actions and the gender mainstreaming strategy, and are monitored by (the ESF’s own) control tools, including GB, which enables an optimisation of programme control from a gender perspective. To this end, in March 2009, the Federal Ministry of Labour and Social Affairs contracted with the **Agency for Gender Equality within the ESF**.

**Box 3.2: The Agency for Gender Equality within the ESF in Germany**

The Agency is a support structure for achieving more gender equality as a desired outcome of the European Social Fund. The Agency, based in Berlin, offers ongoing support to ministries involved in programming and monitoring the ESF and implementation bodies. It advises the responsible actors on different levels of implementation of the ESF, with the goal of mainstreaming gender equality into the ESF programmes and their respective projects.

In addition to the ESF Federal Programme, gender equality objectives related to the balance of working and family life are also considered by the following **regional OPs**:

- In the **ESF OP Bavaria**: female job seekers are a target to support with specific regard to mothers seeking to get back to work.

- In the **ESF OP Berlin**: measures for job and mobility will target women returning to work who need updated skills. In addition, a specific dedicated priority for gender equality is included.

- In the **ESF Brandenburg**: the priority is to increase mobility in the labour market in particular among disadvantaged people which includes women in part-time jobs. Moreover, in families where both parents are unemployed, special assistance will be provided to improve the educational and professional opportunities available to their children.

- In the **ESF Bremen**: the aim is to ease the transition to work, in particular for women and migrants.

- In the **ESF Hamburg**: within the priority covering employment, the project is to help reconcile work and family life.
The use of funds for Gender Equality in selected Member States

- In the **ESF Mecklenburg-Vorpommern**: there are new opportunities for reconciling work and private life will be tested.

- In the **ESF Nordrhein-Westfalen**: there are measures to promote good quality schooling from early childhood.

- In the **ESF Rheinland-Pfalz**: there are measures targeting SMEs to establish a better work–life balance for employees.

- In the **ESF Sachsen-Anhalt**: there are measures on diversity management aimed at women who are still under-represented in the workforce.

- In the **ERDF Brandenburg**: within the priority Integrated development of urban and rural areas, there are measures to improve infrastructures and educational facilities at selected schools.

### 3.2.3. Italy

Labour force participation and employment rates in Italy are well below EU averages and is still far from achieving the 67-69 % national target set for 2020 for the employment rate. Some vulnerable categories, namely young people but also **women** are affected more acutely by the inefficiencies and rigidities of the labour market. This situation reflects a number of factors, notably an education system that does not effectively respond to labour market needs and insufficient focus on appropriate active labour market and work–life balance policies. Indeed, the **low provision of suitable and affordable childcare and elderly care facilities and inadequate work–life balance policies** contribute to this phenomenon. However, the situation varies considerably within the country, with a particularly problematic situation in southern regions.

Within this context, the role of structural funds on these issues is paramount.

Through 75 national and regional programmes, Italy has been allocated EUR 42.77 Billion from ESI funds over the period 2014-2020. With a national contribution of EUR 30.96 Billion, Italy has a total budget of EUR 73.73 billion to be invested in various areas, from jobs and growth to boosting research and innovation as well as protecting the environment and increasing labour market participation.

The Commission position paper on the partnership agreement states the following:

‘**The participation of women in the labour market should increase substantially. Therefore, promoting equality between men and women and reconciliation between work and private life should be a priority for CSF Funds’ investments. Funds’ investments should also concentrate on improving quality and access to affordable care services, such as child- and elderly care services throughout the country, including through investment in public infrastructure**’

Since 2012, one of the Country Specific Recommendations (no 4) is the following:

‘**Adopt the labour market reform as a priority to tackle the segmentation of the labour market and establish an integrated unemployment benefit scheme. Take further action to incentivise labour market participation of women, in particular through providing childcare and elderly care [...]’**

Despite these statements, very few references on these issues can be found in the national Operational Programmes.

The following are the national Operational Programmes that present a direct or indirect references to the issue:
• **National programme Enterprises and Competitiveness** (ERDF): Within the intervention axis related to the Thematic Objective 3, references are made to support female entrepreneurship. Support could also be provided through the implementation of specific services (action 3.5.1) among which is ‘new organisational solutions that could improve reconciliation between working and family life’. The economic sectors of welfare care and services are also considered among those to be prioritised when supporting female entrepreneurship.

• **National programme Inclusion** (ESF): In Axis 3, there is reference to the possibility of implementing system actions to promote awareness-raising and the increasing of knowledge of social services; in Axis 4 there is a reference to the need to integrate social services to better provide answers to women’s needs. When dealing with the design of inclusion pathways for women victims of trafficking, attention should be also devoted to the implementation of system actions to support reconciliation between working and family life. Finally, reference is also made to integration between employment support actions and reconciliation actions as defined in the National Reform Plan.

• **National programme Active Policies for Employment** (ESF): Priority 8iv includes reconciliation actions between working and family life among the possible actions to be implemented. As examples to be followed, references to specific projects implemented in the previous programming period are made. In particular, the La Femme project on company welfare is mentioned. In addition to this, within priority 8.24, specific measures to promote company welfare and women-friendly work organisations are mentioned together with the design of specific measures supporting women returning from maternity leave. The La Femme project was aimed at implementing services specifically addressed to companies with the objective of supporting the implementation of initiatives for working time flexibility and business welfare plans.

• **National programme School** (ESF): To guarantee that gender equality is respected with regard to the equal access of both women and men to the financed interventions, conciliation services could be provided.

• **National programme Legality** (ESF): A general reference is made to the promotion of reconciliation measures as stated by the National Reform Plan.

• **National programme Metro** (ESF): A general reference is made to the promotion of reconciliation measures as stated by the National Reform Plan.

All the other national Operational Programmes do not make any reference to the issues related to childcare provision or to reconciliation policies and measures. It is worth specifying that in the Operational Programmes where references are made (see above), these are very vague and general with no indication of the way measures could really be implemented.

In addition to the ESF National Programmes, gender equality objectives related to the balance of working and family life are also considered in the regional OPs financed through ESF and ERDF as well as in the three Multi-funds programmes as shown in Box 3.3 below.

**Box 3.3: Examples of Multi-fund OPs addressing the work–life balance and childcare in Italy**

**Puglia Multi-fund Programme (ESF, ERDF).** This is to increase women’s participation in the labour market through better access to care from public and private services. Some interventions are programmed to develop services aimed at supporting the reconciliation between working and family life. In particular, through the Thematic Objective 9 (ERDF), this has programmed EUR 340 million to reinforce and develop social and health services infrastructures (care services are among
The use of funds for Gender Equality in selected Member States

These). Additional interventions cover the issues related to working time flexibility, company welfare interventions and use of service vouchers. Specific attention to reconciliation measures is also envisaged when dealing with interventions addressed to disadvantaged people or people in a situation of social exclusion, in order to avoid multiple discriminations.

**Calabria Multi-fund Programme (ESF, ERDF).** As above, interventions are programmed to support the reconciliation between working and family life such as: service vouchers, working time flexibility and other use of organisational measures (smart working, co-working, etc.) to improve flexibility within T08 (ESF). In particular, child and family welfare is programmed to support vulnerable families. ESF interventions are strictly linked with those financed through ERDF in Thematic Objective 9 for the development of social and health services.

**Molise Multi-fund Programme (ESF, ERDF).** Interventions are programmed to support the reconciliation between working and family life such as: service vouchers, and working time flexibility to improve flexibility within Thematic Objective 8 (ESF). ESF interventions are strictly linked with those financed through ERDF in Thematic Objective 9 for the development of social and health services.

For **ESF programmes**, all the regions have programmed interventions to support the reconciliation between working and family life such as service vouchers, and working time flexibility to improve flexibility within Thematic Objective 8. The use of service vouchers is often linked with inclusion pathways as these instruments are considered to be a lever to increase support for disadvantaged individuals and families (especially in the southern regions). In many cases the ESF Programme envisages linkages with the regional ERDF programme in order to support and develop access to and the creation of care services (for example kindergarten both in companies and in the cities) or the development of existing social and care services.

For **ERDF programmes**, very few specific references (even in Thematic Objective 9) when dealing with the development of social infrastructures are connected to the general objective of promoting a development of urban settings, instead of promoting the reconciliation of working and family life.

### 3.2.4. Poland

The Polish law ensures equal rights for both women and men as prescribed in the Constitution, the Labour Code and the Act of 14 December 2004 on employment and combating unemployment.

In order to reinforce support of women’s rights, on the basis of a resolution of the Council of Ministers, the **Women’s Plenipotentiary Office** was established on September 1986 in the Ministry of Labour. In 2002, the office became the Office of the Plenipotentiary for Equal Status of Women and Men, with a mandate to incorporate the rule of equal status for women and men into all policy fields (82).

In 1997, the government adopted a first **National Programme of Activities in Support of Women** with the aim to remove formal and informal barriers to the social advancement of women, to support their professional and political activity and to fight against stereotypes as regards the role of women in public, professional and family life.

In 2003, the government adopted the second implementation stage of this national programme. In the new version of this programme, strong emphasis was placed on the fight against unemployment, **women’s activation, non-standard forms of employment**, etc.

---

82 In 2002, the Plenipotentiary for Equal Status of Women and Men started to implement the PHARE 2002 programme Policy of Equal Treatment Women and Men, which main purpose was the strengthening of the policy of equal chances on the national and regional levels.
labour market flexibility, the public provision of childcare services and other dependants, and the provision of statistical data broken down by gender (83).

According to the EPIC Platform (84), currently the main objective of Polish family policy is to address demographic ageing and to increase the fertility rate through a set of measures that spread from financial support for families with children (85), to the provision of social services. In particular, the introduction of affordable childcare for families with low or medium incomes and the creation of childcare centres and kindergartens are planned.

Within this framework, the number of childcare services rapidly increased from 571 in 2011 to 2 910 in 2015; incentives were introduced to legalise the employment of nannies (through state contributions to social and health insurance); a national programme called ‘Maluch’ (Toddler) (86) was implemented to encourage local governments to create crèches and children’s clubs. As a result of the Maluch programme, an additional 9 000 childcare places were created. From 2015, the programme was expanded by additional funds allocated for the creation of around 1 436 childcare places at universities. In addition, since September 2013, the government reduced the cost of kindergarten for families.

In 2015-2016 new parental benefits (87) (+500) (88), and family benefits were introduced, together with a mechanism named ‘złotowka za złotowke’ (‘penny for penny’) allowing an additional 160 000 families to be eligible for the benefit. This was made possible by gradually reducing the benefit according to the family income exceeding the threshold for entitlement to family benefits. On January 2016, the parental leave system was made more flexible (89), and a paternal leave was introduced entitling a father to two weeks’ leave over two years.

On May 2014 activation benefits and telework grants were introduced for the unemployed re-entering the labour market after taking care of a dependant person.

Turning to the ESI funds, Poland has been allocated EUR 86 billion from ESI funds over the period 2014-2020 and is the largest beneficiary of the cohesion policy (ERDF, ESF, Cohesion Fund).

With a national contribution of EUR 18.8 Billion, Poland has a total budget of EUR 104.8 billion to be invested on the basis of 24 national and regional programmes (90) in various

---

84 http://europa.eu/epic/countries/poland/index_en.htm
85 A number of tools to improve the income situation of the families have come into force (since January 2016). First, the income threshold for entitlement to family benefits is increased as well as the amount of child benefits and other allowances, the increase of tax-free amount to 8,000 PLN (around EUR 1 810), an housing programme, are planned for the families; Since January 2015 tax relief increased for the third child and for the fourth and the following child. The tax credit was also introduced for the families who, because of low income and low tax, were unable to deduct child tax relief in full.
86 Funds earmarked within the ‘Maluch’ were steadily growing in 2011-2015 from around EUR 3.4 million to EUR 34 million. In 2016, around EUR 34 million will be allocated for the programme.
87 They are provided for the person entitled to maternity allowance, unemployed students, farmers and also those employed on the basis of civil contracts.
88 It is provided for second and consecutive children in every family as well as first child when the income threshold is met.
89 The maternity leave lasts 20 weeks and paid parental leave lasts 32 weeks (that can be divided into four parts) for a total of 52 weeks.
90 Three national OPs co-financed by ERDF (OP Smart Growth, OP Digital Poland, OP Development of Eastern Poland); one national OP co-financed by ERDF and CF (OP Infrastructure and Environment); one national OP co-financed by CF (OP Technical Assistance); one national OP Knowledge, Education and, Development co-financed by ESF; sixteen regional multi-fund OPs co-financed by ERDF and ESF; one national OP financed by the Fund for European Aid to the Most Deprived (FEAD). Moreover, one OP for Development of Rural Areas and one OP for maritime areas will be supported from EAFRD and EMFF. Overall a larger share of allocation will be managed by regions (ca 55 % of ERDF and 66 % of ESF compared to 25 % of ERDF in 2007-13). See http://ec.europa.eu/contracts_grants/pa/partnership-agreement-poland-summary_en.pdf
policy areas, from **infrastructure networks** (transport and energy), **SME competitiveness** to boost **research and innovation**, investments in the **low-carbon economy** as well as **environmental protection** to increasing **social inclusion** and **labour market participation**. Significant attention is given to the territorial dimension of interventions in particular in the area of urban development and access to public services. At least 5 % of ERDF allocation will be invested in sustainable urban development actions implemented in Poland mainly through Integrated Territorial Investments in regional capital cities and their functional areas. At least 5 % of total EAFRD contribution to the rural development programme will be reserved for Leader/CLLD. Both choices could support gender equality if the needs of women in accessibility are explicitly taken into account.

Investments are aimed at addressing main development gaps and thus strengthening social, economic and territorial cohesion. ESI funds will assist Poland in achieving national targets of Europe 2020 and its flagship initiatives:

- Research and Innovation (R&I) expenditure in relation to GDP is to increase from 0.9 % to 1.7 % levering private R&I spending from 0.3 to 0.8 of GDP. One-quarter of the expected change is to be delivered by the ESI funds.
- Similarly the ESIF contribution to the achievement of the target of the Digital Agenda (100 % broadband access) has been assessed at 25 %.
- In relation to energy objectives, ESI funds provide for more than one-third of investment needed to achieve a renewable energy share of 15 %.
- The Funds will also contribute to increased employment rates, reduced poverty and improved adaptation of education to labour market needs.
- Increased transport accessibility.
- The funds aim to improve the Polish business environment by reducing the administrative burden for businesses.
- **Support to childcare infrastructures (nurseries and pre-schools) is expected to create 130 000 jobs which are likely to be covered by women.**

The 2014-2020 financial framework is implemented in Poland through six national Operational Programmes managed by the Ministry of Development (Infrastructures and Environment, Smart Growth, Knowledge Education Development, Digital Poland, Eastern Poland, Technical Assistance) and 16 Regional Operational Programmes (ROPs) managed by local government institutions (voivodeship boards).

Each of the programmes takes into consideration the gender equality principle as a horizontal issue. The horizontal approach to this principle is based mainly on activity planning, in particular thematic objectives, e.g. ensuring equal access to quality elementary, primary and secondary education; improving women’s access to digital services; taking women’s needs into consideration while introducing low-emission economy. Moreover, the gender equality principle is implemented at each stage of programme implementation (gender mainstreaming). In the process of project selection a set of evaluation criteria is applied. The criteria include a checklist to confirm whether the gender equality principle was applied, for example at the stage of diagnosis, actions, results or project management. The monitoring, evaluation and control process is used to verify the application of the principle during the project implementation. At the stage of monitoring and reporting, all indicators of project/programme development on the number of people involved, are collected for women and men separately. The interim evaluation is planned, so that managing authorities could assess the effectiveness of the implementation of gender equality principle in the first years of programme duration.
However, the key programmes directly aiming at the implementation of the gender equality principle (with particular emphasis on children’s care) include the Operational Programme Knowledge Education Development and ROPs.

Box 3.4: The Polish National Operational Programme Knowledge Education Development 2014–2020 (POWER)

According to POWER, the key gender equality factors are:
- Creating the appropriate living environment that helps women reconcile their work with family life as a necessary condition (prerequisite) for increasing labour activity levels – particularly among women;
- Ensuring proper conditions and legal environment for improved access to quality care for children and the vulnerable;
- Counteracting gender-related stereotypes;
- Enhancing financial independence and entrepreneurship among women;
- Increasing awareness of equal opportunities for men and women;
- Building and expanding systemic solutions for assessment of how public policies can effectively enhance equal opportunities for men and women.

Two types of actions aiming at achieving the above-mentioned goals are undertaken based on POWER – specific actions to ensure equal opportunities and taking the perspective of equal opportunities into consideration across the board in all the interventions of the European Social Fund (horizontal principle).

Examples of specific actions described in POWER include interventions based on the investment priorities 8.8 and 9.3 aiming at support for work–life balance and countering discrimination based on the grounds of different factors including sex.

The planned support is to be targeted towards, inter alia, creating systemic solutions in the form of programmes countering discrimination in the workplace including monitoring of gender pay gap, models of ensuring proper work–life balance or increasing awareness of various forms of discrimination in the labour market, or promoting full and equal access to the labour market.

As for the Polish ROPs, all envisage the creation of childcare facilities (91): in each of them, the goal is to increase access to childcare services. Additionally, in line with the horizontal principle, each of the programmes takes into consideration the need for enhancing the situation of women in other areas.

- **The Podlaskie Operational Programme** aims to improve access to high-quality preschool education for children of 3–4 years of age. The share of children attending pre-schools will be increased from 56 % to 74 %. Available capacity in the childcare and education facilities will be increased by 40 000. The programme also aims at increasing the percentage of employed women.

- **The Kódzkie Operational Programme** also aims to extend the capacity of supported childcare or education infrastructure (RAND, 2016) (92). It is expected to open eight kindergartens and invest into 952 places. Also, a number of actions are to be taken in order to engage women in training that corresponds with the demand of the local labour market.

- **The Dolnośląskie Operational Programme (ERDF/ES)** is expected to create around 4 700 new places in nurseries and around 3 100 places in kindergartens; moreover, initiatives for equipment, modernisation and adaptation of infrastructure required to provide such services will be carried out in the already existing institutions.

---

The use of funds for Gender Equality in selected Member States

- **The Pomeranian Operational Programme** is meant to create 4,000 new places in crèches and 3,000 new places in kindergartens; additionally, a number of actions are to be undertaken in order to engage women. The total of 41,620 women are to be supported.

- **The Silesian Operational Programme** is expected to create around 4,500 new places in nurseries (including those established and run by parents’ employers), crèches, baby clubs (kluby dziecięce) and day-care points (punkty dziennej opieki).

- **The Świętokrzyskie Operational Programme** is meant to create some 1,296 new places in nurseries and some 1,313 places in kindergartens; additionally, appropriate actions are to be taken in order to increase the percentage of employed women within the Voivodship.

- **The Greater Poland Operational Programme** is expected to create 12,500 co-financed pre-school places; the following initiatives will be undertaken: for children up to 3, creating new places in nurseries and baby clubs, providing longer opening hours at nurseries and baby clubs, co-financing services by daily caregivers and nannies/babysitters, professional activation of people returning to or entering the labour market after taking care of children up to 3, supporting entrepreneurs and employers in implementing solutions for better work–life balance.

- **The Kuyavian-Pomeranian Operational Programme** is aimed at having 75% of children aged 3–4 years in preschool education; it is expected to create around 3,390 new places in nurseries and kindergartens.

- **The Lublin Operational Programme** is expected to increase the share of children aged 3–4 years in preschool education from 61.4% to 78%; it is expected that an additional 7,816 children will attend crèches.

- **The Łódź Operational Programme** is expected to create more than 4,800 new places in nurseries; 8 new institutions will be set up and 952 will be subject to support.

- **The Opole Operational Programme** is expected to create around 227 new places in nurseries and around 100 places in kindergartens; additionally, the interventions are to include: covering costs of care and maintaining care places for children up to 3; professional activation of people that are unemployed or are taking care of a child up to 3 with a diagnosed need for such care.

- **The Podkarpackie Operational Programme** is expected to create more than 3,500 new places in crèches and 10,000 places funded in kindergartens.

- **The Lesser Poland Operational Programme** is expected to create more than 5,270 new places in crèches. Also, specific actions are to be taken in order to engage women in the labour market mainly through training.

- **The Masovian Operational Programme** is expected to create 1,495 places funded in kindergartens.

- **The Lubusz Operational Programme** is expected to create new places in crèches – 962. Also specific actions are to be taken in order to engage women in the labour market.

- **The Warmia-Masuria Operational Programme** is expected to create three kindergartens. 6,400 children will be supported with the infrastructure. Also, specific actions are to be taken in order to engage women in the labour market.

Besides supporting childcare, Poland is also the greatest receiver of ESI funds for health (EUR 2.95 billion), which can be used to support investments in healthcare and community...
care centres providing care services to vulnerable groups. Of these funds, EUR 1.7 billion is allocated by the ERDF OPs for healthcare infrastructures and e-health, and EUR 1.2 billion by the ESF for access to healthcare and active and healthy ageing. Although gender differences are not made explicit, these measures are likely to indirectly benefit women both as care providers and care receivers (as elderly women represent the predominant component of the elderly population).

3.3. Sweden

Sweden is one of the EU’s most successful countries in balancing work and family responsibilities. Indeed the country’s family policy is aimed at supporting the dual-earner family model and ensuring the same rights and obligations regarding family and work for both women and men. Generous spending on family benefits, flexible leave and working hours for parents with young children and affordable, high-quality childcare are the main factors for success. The aim of the Swedish financial family policy is to contribute to improved conditions for good living standards for all families with children, increased freedom of choice and empowerment of parents, as well as to promote equality in parenthood between women and men.

Public childcare is guaranteed to all parents and it operates on a whole-day basis: most childcare facilities are open from 6.30 a.m. until 18.30 p.m. Preschool is free for children aged between three and six for up to 15 hours per week. Parental fees are directly proportional to parents’ income and inversely proportional to the number of children in a family.

As a result, 55 % of children under three and 96 % of children between three and six are enrolled in formal childcare. These figures are well above the EU Barcelona targets for childcare provision and the EU averages of 27 % and 82 % respectively.

In Sweden, gender mainstreaming has been the guiding principle for achieving gender equality since 1994. Currently, at the national level, policy goals set out for gender equality policy are to be reached through the systematic integration of a gender equality perspective with all policy areas, at all levels and stages, and by the actors involved in the policymaking processes. Gender equality is structured along an overarching Swedish national gender equality objective (‘Women and men shall have the same power to shape society and their own lives’) and four sub-objectives:

- equal distribution of power and influence
- economic equality between women and men
- equal distribution of unpaid care and household work
- ending of men’s violence against women.

In addition, the official statistical office is required to present all official statistics on individuals or groups disaggregated by gender.

Achieving the above gender policy objectives plays an increasingly important role since the European Commission recognised that gender equality policies are vital for economic growth, prosperity and competitiveness.

In the previous programming period, specific attention to gender equality in the use of ESF funds has been granted by the implementation of the GenderCoP network, which is also specifically dedicated to integrating the gender dimension into the ESF programmes in the 2014-2020 programming period. Since 2010 GenderCoP has worked towards the goal of gender mainstreaming as an integral part of ESF management – from planning, programming and implementing to monitoring and evaluation. The network is led by the Swedish ESF
The use of funds for Gender Equality in selected Member States

managing authority and includes within its members ESF managing authorities/intermediary bodies from 13 Member States: Austria, Belgium (Flemish and Wallon regions), the Czech Republic, Estonia, Finland, France, Germany, Greece, Italy, Poland, Portugal and Spain.

At the same time, a national project, ESF Jämt, was financed to provide free support for ESF Sweden projects engaged in gender equality activities. The support was in the form of gender training, counselling and providing methods to make it possible to map and transform an organisation by means of a gender equality perspective. The point of departure has been the national gender equality policy objectives and gender mainstreaming as a strategy.

Instead of adapting specific objectives addressed to women and the achieving of gender equality, all ESF Sweden projects are required to take account of gender mainstreaming concerns in their activities. In order to achieve maximum outreach, ESF Jämt services have been provided via eight project supporters based at the eight locations in Sweden that have a regional office. ESF Jämt has employed gender equality policy objectives as a platform in its efforts to explain what is involved and to motivate people to engage in active gender equality initiatives within ESF Sweden projects. ESF Jämt participated from the start in The European Community of Practice on Gender Mainstreaming (GenderCop) for European Social Fund programmes, which produced a minimum standard for gender equality in relation to the EU-2020 targets.

Box 3.5: ESF Jämt concrete results

During the 2007 – 2013 programming period, the Swedish Managing Authority financed the project ESF Jämt whose purpose was to assist other ESF-funded projects with implementing gender equality. Between 2009 and 2012 eight project supporters and a national coordinator worked in ESF Jämt to make gender equality a central feature of selected European Social Fund projects and projects applying for funds. The methods used by the project supporters include:

- initial talks and an introduction to gender equality;
- concrete advice and ideas on how to integrate a gender equality perspective into the projects;
- basic training and workshops in gender equality and gender mainstreaming.

More than 2 000 different ESF projects have received individual guidance by ESF Jämt; nearly 900 courses have been taught and around 4 000 men and 9 000 women participated in its activities.

Source: A journey into gender equality in Sweden

In the 2014-2020 programming period, the support provided by the four ESIF in Sweden is distributed via 27 programmes. In the period 2014–2020, ESF will invest around SEK 6 billion in Sweden. This will be matched by equal national co-financing, which may come from both public and private sources. The programme is being implemented in eight geographical regions, plus one at the national level. The same applies for ERDF with an investment of around SEK 1.7 billion in Upper Norrland, Sweden. This will be matched by equal national co-financing.

With no need to finance childcare (which is generously financed by national funds), Sweden is dedicating a major part of ESF funding to boosting the labour force, in particular helping young people and those with a migrant background, especially women.

In the application of equality between women and men as a horizontal principle, the 2014-2020 programming period will contribute to creating conditions for sustainable work for both men and women. A gender perspective is integrated into programme through the selection of priorities and guiding criteria for selection. In efforts to strengthen the individual’s position in the labour market analysis, both women’s and men’s skills are utilised and developed in the projects. In the analysis, planning and implementation of projects it
will be ensured that both women and men must have access to interventions based on their individual abilities to increase their job chances. To this end, the **Social Fund aims to promote gender equality on the basis of the programme’s objectives, target groups and priorities** through the following.

- The project has gender expertise internally or through external support.
- A gender analysis is included in the project’s problem analysis.
- Activities of the project take into account the gender perspective according to the analysis.
- A gender perspective is included in the evaluation of the project.

Over 70% of the ESF and YEI allocation will be invested in labour integration of people at the margins of the labour market. Labour integration pathways, (re)training, and individual coaching will be the most prominent tools used. The actions funded through the ESF are complementary to the relevant national policy instruments; 20% of the ESF allocation is used to support activities within the thematic objective ‘Promoting social inclusion and combating poverty’, namely through active inclusion measures to improve employability of the most vulnerable groups. The remainder of the ESF investments will go to enterprises and employees to create conditions that enable workers to stay in current or new employment longer, mainly through measures for lifelong learning.

Most of the ESF allocation, and the specific YEI allocation, will be handled in one single national OP that comprises EUR 810 million of EU support. Under the single national OP there will be eight regional action plans, which will ensure that the ESF-supported measures and the YEI-supported measures will be fully adapted to the regional specifics. It will also help ensure the coordination with ERDF-supported measures in the regions.

The ESF national programme will support projects that streamline programme implementation. This refers, for example, to **projects that contribute to increased knowledge and effective methods, which link to the horizontal principle of equality between women and men**. The Swedish ESF Council is responsible for the facilitation and streamlining of the implementation of gender mainstreaming in the programme and project implementation. This should be achieved through the minimum standards for gender mainstreaming developed at EU level by the GenderCoP network. The support structure is still the **ESF Jämt** which will provide direct support interventions in the form of training and other specific support by including a gender perspective in analysis implementation, monitoring and evaluation.

### 3.4. The United Kingdom

Over recent years, reforms on shared parental leave and flexible working schemes have been carried out. In June 2014, all workers gained the right to request flexible working.

The 2011–2015 programme for Government oversees the Delivering Social Change framework, including strategic actions to reduce child poverty among which is the implementation of a strategy for integrated and affordable childcare.

The government has also introduced measures to support families with low incomes including childcare cost support as it is essential to improving children’s life chances and supporting parents who want to return to work.

In addition, the CSR on affordability of childcare is addressed by plans to help families meet the costs of childcare and to increase the affordable provision.
In line with the UK’s commitment to tackling poverty and welfare dependency through work, the ESF focuses on disadvantaged groups, including **women needing childcare provision** (93).

As part of the 2014-2020 programming cycle, the **UK Partnership Agreement** underlines the need to form a coherent package of support at an individual, family and community level and that issues such as **social and childcare, financial inclusion and employment will be tackled by the ESF and ERDF**.

According to the UK Partnership Agreement, work–life balance and childcare issues are thus considered within the 2014-2020 programming period especially through ESF investments. In the UK these are being made available through six ESF Operational Programmes in England, West Wales and the Valleys, East Wales, Scotland, Northern Ireland and Gibraltar. Overall, the ESF and European Regional Development Fund are investing around EUR 11.8 billion across the UK. The ESF share of EUR 4.9 billion is funding the six Operational Programmes and includes EUR 206 million for the YEI (94).

Details of the ESF Operational Programmes are as follows:

- **The European Social Fund Operational Programme for England** has been developed around three interrelated priority axes (95). Within these priorities, the programme focuses on disadvantage groups in the labour market among which are:
  - people who are unemployed or economically inactive, especially disadvantaged groups such as people with disabilities, lone parents, older workers and ethnic minorities;
  - women returners and other groups of women currently outside the labour market.

In general, under Thematic Objective 8 – Employment, the programme finances projects to increase employment levels facing obstacles to getting a job. **Actions to get women into work** include reskilling, retraining and **help to women returners to the labour market** and to women in low skilled and/or part-time work who want to progress.

Under Thematic Objective 9 the programme has a stronger focus on the most disadvantaged people tackling multiple and complex barriers to work, among which are economically inactive people, inactive women from ethnic minorities, elder women and those at risk of poverty and social exclusion.

It provides them with help to address barriers to work including **caring responsibilities and childcare needs**.

In more detail, **Axis 1 – Inclusive labour markets** brings together ESF investment priorities from thematic objectives 8 (employment) and 9 (social inclusion). It includes the Investment Priority 1.1 access to employment for jobseekers and inactive people that helps those who are disadvantaged but still relatively close to the labour market to tackle their barriers to work and sustain employment. Under this investment priority, the Specific Objective (1.1.5) – to provide support for women at disadvantage in the labour market, and particularly those who are currently inactive, to contribute to our efforts to reduce the gender employment gap, provides some activities targeted

---

93 See: http://ec.europa.eu/esf/main.jsp?catId=381
94 See: http://ec.europa.eu/esf/main.jsp?catId=381
95 Inclusive Labour Markets, which combines activities to address employment and social inclusion issues; Skills for Growth; Technical Assistance.
at women in order to increase their participation, especially in occupations or sectors where they are under-represented. Support to women who meet barriers to entering the labour market (including caring responsibilities) is provided. Participants in the actions can include women wishing to return to work after caring for children, inactive lone parents (most of whom are female) or older unemployed women. The main result the programme intends to achieve is that the participants will be in sustainable employment (including self-employment) or engaged in active job search on leaving.

Under the Investment Priorities 1.2 Sustainable integration of young people and 1.3 Youth employment initiative, additional support is also provided to help young lone parents to move into sustainable employment (including self-employment) and to overcome the barriers they face in participating in the labour market, including assistance with childcare.

Investment Priority 1.4 Active inclusion helps people who are more distant from the labour market and tackle multiple and complex barriers to work. It promotes equal opportunities and combats discrimination in the labour market. This investment priority includes support for economically inactive women from ethnic minorities, including those with child or elder care responsibilities and who often face multiple disadvantages.

With reference both to the Priority Axis 1 – Inclusive labour markets (Investment Priority: 8ii - Sustainable integration into the labour market of young people (ESF) in particular those not in employment, education or training, including young people at risk of social exclusion and young people from marginalised communities, including through the implementation of the Youth Guarantee)

Priority Axis 2 – Skills for growth (Investment Priority – 10iii – Enhancing equal access to lifelong learning for all age groups in formal, non-formal and informal settings, upgrading the knowledge, skills and competence of the workforce, and promoting flexible learning pathways including through career guidance and validation of acquired competence) targeted advice to women to help them make important career choices is provided. These actions can be useful to face the work–life balance theme.

Finally, a contribution to childcare costs is provided by the programme since availability of childcare can affect an individual’s ability to participate in ESF provision. This provision is reflected in specific objectives and targets in the appropriate investment priorities.

Scotland’s ESF Operational Programme has been developed around four interrelated priority axes (96). The analysis of need for the Scotland ESF programme in respect of high-quality employment and labour mobility has outlined challenges around rising long-term unemployment and youth unemployment, demographic trends and the participation of women in the workforce. For this reason this programme considers some targeted action on childcare and lone parents which may contribute to greater equality in the workplace.

Priority Axis 1 – Supporting sustainable and quality employment and supporting labour market mobility, provides actions to move unemployed and inactive participants into
employment. Under 8i – Access to employment for job seekers and inactive people, including the long-term unemployed and people far from the labour market, also through local employment initiatives and support for labour mobility, it outlines the need to overcome some barriers, explicitly considering childcare advice and access to childcare funds, among the key actions required to fulfil successful pathways to attaining employment or entering into formal learning.

Priority Axis 2 – Promoting social inclusion, combating poverty and any discrimination, Investment Priority 9i – Active inclusion, including with a view to promoting equal opportunities and active participation, and improving employability, recognises that some people, mainly those that have disengaged from the labour market due to complex and multiple factors require longer-term and more intensive support (e.g. workless households, lone parent households and other disadvantaged people). In this case as well, childcare and social care are considered among the main key barriers to work and for this reason new services and innovative solutions for accessing to childcare and social care services are to be supported.

In addition, under Axis 1 (PI 8i) and Axis 2 (PI 9i and 9v) (97) operations to be financed have to demonstrate a sound understanding of gender equality in removing barriers for women returners, targeting childcare provision and assisting lone parents.

Finally, the Youth employment initiative priority axis (Priority Investment 8ii) (98) also gives attention to childcare specifying that where required by the individual’s circumstances, barriers which directly enable the carrying out of activities including childcare costs have to be removed, where these are directly linked to the offer of training or employment.

- East Wales ESF Programme has been developed around three interrelated priority axes (99). Gender inequalities exist in Wales with women more likely to be underemployed, working part-time and earning less than men.

Axis 1 - Tackling poverty through sustainable employment, aims to support efforts to tackle poverty and social exclusion in East Wales. This is performed by supporting key target groups to increase employability and achieve sustained employment. Under Investment Priority 9i – Active inclusion, including with a view to promoting equal opportunities, active participation and improving employability, the actions that support individuals to address the multiple and complex barriers can be funded, including care and childcare to achieving sustained employment. In this context innovative actions linked to improving the availability of affordable quality childcare are provided.

97 Promoting social entrepreneurship and vocational integration in social enterprises and the social and solidarity economy in order to facilitate access to employment.

98 8i - Sustainable integration into the labour market of young people (YEI), in particular those not in employment, education or training, including young people at risk of social exclusion and young people from marginalised communities, including through the implementation of the Youth Guarantee.

99 Priority Axis 1: Tackling Poverty through Sustainable Employment is focused around TO9: Promoting Social Inclusion, Combating Poverty and any Discrimination Priority Axis 2: Skills for Growth is focused around TO10 – Investing in Education, Training and Vocational Training for Skills and Life-long Learning and it also incorporates a single complementary Investment Priority from the TO8 – Promoting Sustainable and Quality Employment and Supporting Labour Mobility.

Priority Axis 3: Youth Employment is focused around TO8 – Promoting Sustainable and Quality Employment and Supporting Labour Mobility and it also incorporates a single complementary Investment Priority from TO10 – Investing in Education, Training and Vocational Training for Skills and Life-long Learning.
In Axis 2 – Skills for growth, in line with the Priority 8iv Equality between men and women in all areas, including in access to employment, career progression, reconciliation of work and private life and promotion of equal pay for equal work, **there is a specific focus on improving the position of women in the workforce while recognising care or childcare responsibilities.** Objective 3 – To improve the position of women in the workforce, specifically targets employed women, complementing interventions being taken forward under Priority Axis 1 to increase the employability of those women who are economically inactive or long-term unemployed and who face complex barriers to work.

This specific objective, recognising the range of factors influencing the position of women in the workforce, also **targets employers to raise their awareness of gender disadvantage in the workforce and to develop diversity policies and flexible working practices.**

The adoption of flexible working practices is likely to be of significant benefit to women for achieving their full potential, as they may be subject to inequality of opportunity or even discrimination regarding pregnancy and maternity rights or **the need to provide childcare.**

Finally, activities with enterprises to challenge traditional stereotypes and to raise participation levels in occupations/sectors where a particular gender are under-represented are provided.

- **ESF West Wales and the Valleys programme**

This programme specifically sets among its objectives the aim to reduce inequalities in the labour market among women and recognised equality groups (four objectives).

Under Priority Axis 1 – Tackling poverty through sustainable employment (TO9: Promoting Social Inclusion, Combating Poverty and any Discrimination) aiming to support efforts to tackle poverty and social exclusion in WWV, specific actions are provided targeted at people at risk of slipping out of employment as a result of long-term sickness absence or other barriers such as **caring or childcare responsibilities.**

Priority Axis 2 – Skills for growth (TO10: Investing in education, training and vocational training for skills and lifelong learning, and TO8: Promoting sustainable and quality employment and supporting labour mobility) has been developed in line with the aim ‘To invest in skills as a driver of productivity and growth, to aid progression within employment and improve the skills mix and diversity of our workforce’ with two specific objectives:

- **To increase skills levels of the workforce, increasing the number of people qualified to intermediate level or above, reducing the number of people with no skills or basic skills only and increasing higher level skills in research and innovation;**

- **To reduce inequalities in the labour market among women and recognised equality groups.**

Under this objective, there is a specific focus on promoting gender equality in employment and improving the position of women in the workforce. Actions which facilitate and promote career advancement and which provide women with increased job security and increased pay are provided, as well as **actions facilitating the provision of more flexible working practices and solutions which can assist women to progress their career while recognising care or childcare responsibilities.**
The use of funds for Gender Equality in selected Member States

**Responsibilities.** Actions also raise the awareness of employers of gender disadvantage in the workforce and they support the development of equality and diversity policies, and flexible working practices. The adoption of flexible working practices is likely to be of significant benefit to women, who may be subject to inequality of opportunity or even discrimination regarding pregnancy and maternity rights, or the need to provide childcare.

- **ESF Programme 2014-2020 in Northern Ireland**

  This programme may fund specific activities which target women and other disadvantaged groups such as lone parents. However, among the planned actions by the programme there are only detailed assessment of needs taking into account personal barriers to employment and family and social circumstances (Priority Axis 1 – Access to employment) and the possibility of undertaking engagement with parents of children with disabilities to address their specific needs for participants on the Community Family Support Programme (Priority Axis 2 – Social inclusion, Investment Priority 9i). Overall, support with childcare for programme participants is provided.

- **Gibraltar ESF Programme**

  The Government of Gibraltar recognises the importance of good quality care for dependants in order to encourage women to attend courses or employment. There are 12 government and 6 privately run nurseries/preschools, which adequately covers the childcare requirements of the jurisdiction. Since 2000, the local education system provides for children to remain in school over the lunch period and this has also encouraged women to join the labour market.

  The Operational Programme (Priority Axis 1: Employment and education) intends to increase employability of workers and their flexibility, remove barriers to access the labour market and encourage employers to employ individuals with difficulties entering the labour market. However, no specific action is targeted to women or focuses on childcare issues in the programme. Only in the section of the programme specifically devoted to horizontal issues is it stated that consideration will also be given to training and investments which facilitate the return to the labour market of persons with children or dependent relatives.

Box 3.6 illustrates three projects on childcare and the work–life balance, one funded under the 2014-2020 programming and the others under the 2007-2013 programming cycle.

**BOX 3.6: Examples of projects funded under the 2014 -2020 and 2007-2013 and 2007-2013 cycle programming**

**Building Better Opportunities - D2N2 (100)**

This project (2016-2019) is being carried out in the context of the 2014-2020 programming cycle, as part of the Building Better Opportunities (BBO) joint programme, which includes the ESF activities in England match-funded and delivered through the Big Lottery Fund Organisation. The contribution provided by ESF and the Big Lottery Fund Organisation amount to GBP 7.8 million for a total of GBP 15.7 million. BBO intends to improve people’s life chances by building better opportunities for education, training and employment, especially for people furthest from the labour market, who face significant disadvantages and barriers to social inclusion. All the activities are implemented across the D2N2 LEP area (Derby City, Derbyshire, Nottingham City, Nottinghamshire Local Enterprise Partnership). Among the three BBO activities one, called

---

'Towards work' – targeting worklessness for women returners, older people who are long-term unemployed and young people (101), is targeted to unemployed or economically inactive individuals, including women returners. Activities to be delivered through this project include: - supporting opportunities to identify existing skills and interests; - building confidence and effective communication skills; - developing a sense of self confidence; - provision of effective information advice and guidance to enable participants to understand and develop their future learning and work options and pathways; - supporting participants to access other services (including statutory) where these would address wider barriers to employment, thus also including childcare. The project must involve at least 1 625 people in activities to improve their work readiness, including at least 812 women (the minimum target of the project). Made to measure 'help for homeless families' (102) This project was carried out by Community Links in 2011-2012 and funded under the ESF Operational Programme England and Gibraltar 2007–2013, with a contribution of EUR 300 000. It aimed to help people overcome barriers to employment and to support homeless families in London, particularly focusing on those with out-of-work single parents (European Commission, 2013) (103). Recruitment took place in the local community by reaching out to places where jobless parents would gather (such as women’s refuges and children’s centres). Over 165 people enrolled in training and 25 jobs were created. The Family Links project provided tailored one-to-one support and training to guide participants into employment. The support included childcare provision if participants needed it. Overall, its success was measured by the original objectives being met midway through the project’s implementation (European Commission, 2013) (104). Young Mums Will Achieve (YMWA) (105) This project (2009-2011) was carried out by a partnership between Cornwall Council, Fit ‘n’ Fun Kids and Cornwall College under the 2007-2013 cycle with a budget of EURO 156 633. The aim was to support young mothers (between the ages of 14 and 19) to engage in education or employment through tailored learning opportunities and intensive personal support to participants (106). In particular, among barriers to pursuing the project’s activities, participants identified access to childcare, finance and transport (Department for Work and Pensions 2012) (107). For these reasons, this project has integrated childcare provision and transport into its model to ease the burden and to support the educational and professional aspirations of the women and 145 women took part in the programme (European Commission 2012) (108). Results from this period show that 95 % of participants gained qualifications in literacy and numeracy, with an overall retention rate of 90 % (Department for Work and Pensions 2012) (109). The high percentage of

101 The other two respectively focus on financial inclusion and on multiple and complex needs.
102 This project is included in Emma Harte, Joanna Hofman, Anastasia Sikiaridi, The role of the European Social Fund in supporting the provision of childcare in the European Union, Rand Europe, 2016, See: http://www.rand.org/content/dam/rand/rand/pubs/research_reports/RR1300/RR1364/RAND_RR1364.pdf
105 This project is included in Emma Harte, Joanna Hofman, Anastasia Sikiaridi, The role of the European Social Fund in supporting the provision of childcare in the European Union, Rand Europe, 2016. See: http://www.rand.org/content/dam/rand/rand/pubs/research_reports/RR1300/RR1364/RAND_RR1364.pdf
106 European Commission, ESF Projects, 12 October 2012.
achievement and retention in the programme by the young parents has shown that this project was highly successful. Since it was established, the number of young parents engaged in education, employment and training in Cornwall has increased from below 20% in 2009 to 34% in July 2012 (European Commission, 2012) (110). The establishment of a number of other branches may also demonstrate the success and impact of the project across Cornwall. In addition, the achievements of YMWA were recognised in November 2010 when they won the National ESF Equal Opportunities Mainstreaming Leader Award.

As stated above, the UK Partnership Agreement states that social and childcare will be tackled by the ESF and ERDF.

More details of the contribution of the ERDF Operational Programmes for the promotion of equality between men and women and especially to the strengthening of the childcare system by the Operational Programmes follow:

- Both the West Wales/Valleys and the East Wales ERDF Operational Programmes affirm in the specific section devoted to equality between men and women that the ERDF programmes complement the ESF by supporting:
  - the competitiveness of the childcare sector where it meets the objectives of the related priority axis;
  - the creation of an environment which promotes inclusive workplaces, equality of opportunity for staff, including the reconciliation of work and private life;
  - entrepreneurship and business start-up initiatives to encourage more take up from women.

- the Gibraltar ERDF Operational Programme states that attention will also be given to opportunities for investments and training which facilitate the return to the labour market of people with children or dependent relatives. However no action has been provided.

---

110 European Commission, ESF Projects, 12 October 2012.
4. GENDER MAINSTREAMING IN THE USE OF HORIZON 2020 FUNDS IN THE SELECTED COUNTRIES AND EXAMPLE OF GOOD PRACTICES

Horizon 2020 is the EU research and innovation programme implementing the Innovation Union, an Europe 2020 flagship initiative aimed at securing Europe’s global competitiveness. To this end it is structured along three main pillars:

- excellent science to strengthen the EU’s world-class scientific excellence and make the EU research and innovation system more competitive;
- fostering industrial leadership to speed up the development of technologies that will support businesses and innovation, including for small companies;
- tackling societal challenges to respond to the priorities identified in the Europe 2020 strategy.

In addition, part of the Horizon 2020 budget goes towards funding the European Institute of Innovation and Technology, research activities carried out under the Euratom Treaty and non-nuclear research carried out by the Joint Research Centre, the European Commission’s in-house science service. However, as Figure 4.1 below shows, most resources are allocated to the three pillars of the programme.

**Figure 4.1: Breakdown of the budget between Horizon 2020 priorities (EUR 78.6 billion, i.e. in current prices)**

![Pie chart showing budget breakdown]

Source: Factsheet: Horizon 2020 budget ([111])

There are also dedicated budgets for two horizontal programmes:

- Spreading excellence and widening participation;
- Science with and for society.

Horizon 2020 funding is organised through multiannual WPs which cover most of the support available.

The Horizon 2020 programme mainstreams gender equality and the gender dimension in research as a cross-cutting issue in each of the different parts of the Work programme in line with...

---

with the objective of promoting equality between women and men which, as enshrined in Article 3 of the TEU and Article 8 of the TFEU, is a fundamental value of the EU obliging the EU to mainstream gender equality in all of its activities.

In order to ensure a more integrated approach to research and innovation, three mainstreaming objectives underpin the strategy on gender equality in Horizon 2020:

- **Fostering gender balance in research teams**, in order to close the gaps in the participation of women;
- **Ensuring gender balance in decision-making**, in order to reach the target of 40% of the under-represented sex in panels and groups and of 50% in advisory groups;
- **Integrating the gender dimension in R&I content**, helps improve the scientific quality and societal relevance of the produced knowledge, technology and/or innovation.

The aim of the first objective is to reach the Commission’s target of 40% of the under-represented sex in each group and panel.

For the second objective, applicants for funding are encouraged to promote equal opportunities and to ensure a balanced participation of women and men at all levels in research and innovation teams and in management structures. Gender balance in teams is also to be taken into account when ranking proposals with the same evaluation scores.

Finally, for research content, gender is referred to in several topics across the Horizon 2020 work programme.

In addition to this, the Science with and for society work programme funds specific initiatives in support of the gender equality strategy. Support is given to research performing organisations (RPO) and research funding organisations (RFO) in order to:

- remove barriers that generate discrimination against women in scientific careers and decision-making (supporting research organisations to implement gender equality plans);
- integrate a gender dimension in research content.

In order to better understand the way gender is being mainstreamed within the Horizon 2020 funds, the following methodology has been adopted:

1. The database of all Horizon 2020 projects funded by the Horizon priorities was searched using the key words: ‘gender equality’ and ‘gender’ in order to identify the number of projects that effectively mainstreamed gender equality within their contents;

2. The database of all Horizon 2020 projects funded by the Science with and for society work programme was searched with regard to the calls specifically dedicated to gender equality (the GERI calls).

The analysis has focused on the six selected countries in order to detect differences in the access and use of funds.
4.1. **Mainstreaming gender equality within Horizon three pillars and horizontal programmes projects**

As previously underlined, the Horizon funds are organised along three main pillars and two horizontal programmes. According to the Horizon database (**112**), a total of 10.128 projects were funded at September 2016.

An initial screening of all these 10.128 projects through the use of the key words: ‘gender’ and ‘gender equality’ resulted in **a total 122 projects (0.01 % of the total of the funded projects)**.

These 122 projects’ summaries and objectives were then assessed in order to verify the reliability of the automatic search and refine the search. Not considering at this stage the GERI projects (**113**), **only 71 projects addressing gender equality (0.007 % of the total of the funded projects) were obtained**.

The 71 projects were funded on the pillars and objectives described in Table 4.1 below.

**Table 4.1: Horizon 2020 projects addressing gender equality**

---

**112** The first monitoring report published by the European Commission in 2016 only refers to the calls and projects funded in 2014.

**113** Please see the next paragraph for the analysis of projects funded by the GERI calls.
In addition to the three pillars, projects were also funded in:

- Science with and for Society:
  - GARRI
  - SEAC
  - ISSI
- Euratom Research and Training programme: NFRP

As shown in Table A.1 in the Annex, most projects that directly and/or indirectly refer to gender equality have been financed under the Pillar ‘Excellent Science’, which financed 56 % of the projects related to gender equality. The majority of these projects (60 %) were financed within the priorities related to Marie Skłodowska-Curie actions which provide grants for all stages of researchers’ careers – be they doctoral candidates or highly experienced researchers – and encourage transnational, intersectoral and interdisciplinary mobility. Within this group of projects, reference to gender equality is included according to the research topics chosen by researchers, ranging from a study on the role of women in different historical periods, to other social and economic inequalities.

Box 4.1: An example of Marie Curie study addressing gender equality issues

**Visualising memories of violence in urban places: gender and well-being in Istanbul**

The study focuses on the way violence in urban areas affects women of all ages, socioeconomic and cultural backgrounds in particular. The immediate and extensive costs of violence targeting women perpetuate the existing gender hierarchies by setting boundaries on women’s movement, mobility, presence: that is, on their use of urban space.

Another 33 % of projects are instead financed within the ‘Societal Challenges’ Pillar covering activities from research to market with a focus on innovation-related activities. The gender-related topics range from gender medicine analysis in the challenge related to health and well-being, to gender differences in job insecurity, or to the gender balance in sectors (like aquaculture) not usually considered as ‘feminine’.

Box 4.2: An example of Societal Challenge study

**VicInAqua**

The project’s innovative core idea is to develop and test new technologies which enable the integration of sanitation with the aquaculture in a sustainable manner. The overall concept will promote sound approaches to water management for agriculture, taking into consideration broader socioeconomic factors and also supporting job creation and greater gender balance in decision-making.

Another 7 % of projects were funded through the Science and Society Pillar, which is instrumental in addressing the European societal challenges tackled by Horizon 2020, building capacities and developing innovative ways of connecting science to society.

In this case, projects deal with gender aspects in higher education institutions or are meant to identify innovative approaches to release and disseminate research results.

Box 4.3: An example of Science and Society project

**OpenUP**

*Inter alia*, the project is aimed at producing a set of concrete, practical, validated policy recommendations and guidelines for national and European stakeholders, including EU institutions, a valuable tool in advancing a more open and gender-sensitive science system.
Turning to the six Member States under scrutiny, we first consider the nationality of the lead partner in gender-related projects. Figure 4.2 shows the predominance of project leaders from the UK, followed (even if at a great distance) by Italian and German lead partners. Only one project was led by a Swedish partner and none by a Polish and Croatian partner.

**Figure 4.2: Lead partner (coordinator) in the gender-related projects by nationality**

Source: Horizon database

A similar distribution can be observed when looking to the other partners involved in the gender-related projects. UK partners are involved in more projects, followed by Italy and Germany.

**Figure 4.3: Partners in the gender-related projects by nationality**

Source: Horizon database

### 4.2. The GERI calls projects

During the period 2014-2015, five GERI calls with an estimated budget of around EUR 18 million were issued.
Table 4.2: GERI calls planning table

Source: Horizon 2020 database

The five GERI calls were related to four main topics:

1. Support to research organisations for the implementation of gender equality plans (GERI-4-2015 and GERI-4-2014): the funded actions should provide support to RPOs, including higher education institutions, and RFOs to achieve systemic institutional changes, in particular through the implementation of gender equality plans (GEPs). GEPs should be aimed at:
   - conducting impact assessment/audit of procedures and practices, including relevant data on Human Resources (HR) management, teaching and research activities, in order to identify gender biases at organisation level;
   - implementing innovative strategies to address gender biases such as, inter alia, family-friendly policies (e.g. work schedule’s flexibility; parental leave; mobility, dual-career couples); gender planning and budgeting; training on gender equality in HR management;
   - developing the gender dimension in research content and programmes;
   - integrating gender studies in Higher Education Institution curricula;
   - setting targets and monitoring progress via indicators at organisation level.

Box 4.4: Support to research organisations to implement GEPs (GERI-4-2015 and GERI-4-2014) funded projects

The six funded projects (Baltic Gender, EQUAL-IST, SAGE, LIBRA, GENERA, and PLOTINA) have similar objectives and steps. Generally speaking they are aimed at i) Stimulating a gender-aware culture change; ii) Promoting career development of both female and male researchers to prevent the waste of talent, particularly for women; iii) Ensuring diversification of views and methodologies (in this case by taking into account the gender/sex dimension and analysis) in research and teaching.

The work plan usually proceeds in three overall stages: i) Assess the current situation in all partner RPOs; ii) Design GEPs for each RPO; iii) Design, implement and evaluate actions in the partner RPOs to address the targets of the GEPs.

2. Evaluation of initiatives to promote gender equality in research policy and research organisations (GERI-3-2015): the funded actions are meant to develop concepts and
methodologies for the evaluation of specific initiatives \(^{114}\), providing a suitable analysis of how gender issues are considered in science management and policy making in order to better understand how they contribute to achieve three main objectives:

- equal participation and progression in research careers;
- gender balance in decision-making;
- and the integration of a gender dimension in research content and programmes.

**Box 4.5: Evaluation of initiatives to promote gender equality in research policy and research organisations (GERI-3-2015) funded project**

**EFFORTI** (Evaluation Framework for Promoting Gender Equality in R&I) is aimed at analysing and modelling the influence of measures to promote gender equality on research and innovation outputs and on establishing more responsible and responsive RTDI systems. To this end, EFFORTI will:

- Develop an evaluation framework which enables evaluators, science managers, policy-makers and programme owners to conduct a sound analysis of the research and innovation outputs, outcomes and impacts of gender equality measures across Europe, with a focus on the national level;
- Design a differentiated concept to characterise a variety of policy measures and assess their performance, taking into account the diversity in the national policies as well as in organisational contexts;
- Derive general lessons for evidence-based and thus ‘good’ policy making in gender equality within the RTDI system. This means that not only progress towards more gender equality in RTDI has been achieved but also that RTDI has been able to benefit from this progress through enhanced scientific outputs and productivity but also through a higher responsiveness to societal needs and challenges.

**3. Impact of gender diversity on Research & Innovation (GERI-2-2014):** the actions have to develop concepts and methodologies for the evaluation of the impacts of gender diversity in research teams and organisations on research quality and productivity, as well as on innovation applying the concepts and methodologies developed to a selected range of sectors using a comparative approach across countries.

**Box 4.6: Impact of gender diversity on research and innovation (GERI-2-2014) funded project**

**GEDII** (Gender diversity impact – improving research and innovation through gender diversity) will develop a reliable diversity measure that is sensitive to power, status and information sharing differentials within teams and across public and private organisations. This gender diversity index (GDI) will thus provide a much more nuanced and realistic measure of the impact of gender diversity on research productivity, quality and innovation across countries and sectors. GDI scores will be explored in relation to a flexible set of performance indicators, including patent and bibliometric measures, combined with new indicators of social impact. GEDII’s evaluation framework thus responds to the growing concern with responsible research and innovation. To address the social relevance and utility of our research, GEDII will engage stakeholders early and often: through advisory groups, virtual challenges and theme-based innovation testimonials. By combining disparate conceptual approaches to gender diversity with an innovative assessment tool, GEDII will for the first time provide clear and comprehensive evidence for the link between gender diversity and research performance and enable research policy and decision-makers to significantly enhance the capacity of European research.

\(^{114}\) The initiatives are related to: (i) research quality and productivity as well as innovation; (ii) research organisations and higher education institutions in terms of structure, efficiency, competitiveness, quality of the workplace and recruitment capacity; (iii) research system level in terms of intensity and productivity.
4. Innovative approach to communication encouraging girls to study science (GERI-1-2014): the actions should be carried out in the umbrella of the campaign Science it’s a girl thing (which the Commission launched in 2012 to encourage 13-18 year old girls to study science) in order to carry out a set of awareness-raising activities (workshops, seminars, hands-on activities, etc.).

**Box 4.7: Innovative approach to communication encouraging girls to study science (GERI-1-2014) funded project**

**Hypatia** will bring about lasting change in the way schools, science museums, research institutions and industry engage teenage girls in STEM across Europe. Bringing these stakeholders together with gender experts and teenagers themselves, Hypatia will develop, pilot and disseminate a unique modular toolkit of activities and guidelines for engaging teenagers in STEM in a gender-inclusive way. These innovative activities, based on existing European good practices, will be implemented in 14 EU countries and further afield, in schools, science museums and by institutions in research and industry, thanks to hubs of stakeholders strengthened through the project. The activities will have a central focus on gender-inclusive ways of communicating STEM, empowering teenage girls and exploring the range of skills that are needed for the great variety of STEM studies and careers open to young people. The Hypatia hubs will provide a sustainable basis for these activities to be carried out in the long term, with a focus on dissemination through networks and stakeholder engagement allowing the project impact to multiply.

Table A2 in the Annex shows the list of projects that were awarded in the five calls specifying the nationality of the lead partner and of the other participants together with the total cost of each project.

As can be seen nearly all the planned funds were allocated (EUR 19 077 210.00 vs EUR 19 500 000.00). The majority of funds was allocated to the first topic with six funded projects (for a total of EUR 14 507 105.00); other topics had one project each.

With specific regard to the six countries under focus, only German and Italian institutions are present among the lead partners (coordinators). Germany is leader on three projects (two of them on the first topic), and Italy on one (on the first topic). The other four countries (Croatia, Poland, Sweden and the UK) do not have leading partners on any of the funded GERI projects. The three projects led by a German institution obtained in total EUR 7 619 565.00, while the one coordinated by an Italian institution obtained EUR 2 296 187.50.

When looking to the other participants (not lead partners), German institutions are present in 4 out of the 9 projects that were funded, Italian institutions in 6 out of 9, Swedish in 2 out of 9, British in 5 out 9, while Polish only in 1 out of 9 and Croatian institutions were not participating in any of them.
5. GENDER MAINSTREAMING IN THE USE OF REC PROGRAMME (THE GENDER EQUALITY OBJECTIVE AND THE FOLLOW-UP OF DAPHNE PROGRAMMES ON VAW) AND EXAMPLE OF GOOD PRACTICES

The Rights, Equality and Citizenship programme 2014-2020 (REC) (115) replaced three earlier funding programmes which expired in 2013:

- Fundamental Rights and Citizenship programme
- PROGRESS programme: anti-discrimination and gender equality strands
- Daphne III programme

This programme defends the rights and freedoms that people are entitled to under EU law through nine objectives. Among its nine objectives (116) are included two objectives directly addressing gender equality and women:

- promote equality between women and men, and gender mainstreaming;
- prevent violence against children, young people, women and other groups at risk (Daphne).

Under the first objective, the programme co-fines national projects promoting equal economic independence, overcoming rigid gender roles and stereotypes, raising awareness of the gender pension gap etc.

The second objective is meant to invest in the prevention and fight against violence against women and children (boys and girls) by financing projects supporting victims of violence, training relevant professionals, raising awareness and preventing violence linked to harmful practices. In general, violence against women is both a cause and consequence of gender inequalities. On the one hand it results from unequal power relations between women and men, and on the other, it prevents women from fully participating in the labour market, families and society.

In addition, it is worth underlining that although not directly addressed to women or gender issues, the non-discrimination objective can also sometimes present cross-cutting attention to a gender perspective with reference to the Roma people integration issue, especially in the context of multiple discrimination.

The overall REC budget is distributed between two budget headings:

a) Ensuring the protection of rights and empowering citizens (33 02 01)

This budget heading covers five REC objectives (117). Among these is the Daphne objective – to prevent and combat all forms of violence against children, young people and

---

116 REC Objectives are to: 1. Promote non-discrimination; 2. Combat racism, xenophobia, homophobia and other forms of intolerance; 3. Promote the rights of persons with disabilities; 4. Promote equality between women and men and gender mainstreaming; 5. Prevent violence against children, young people, women and other groups at risk (Daphne); 6. Promote the rights of the child; 7. Ensure the highest level of data protection; 8. Promote the rights deriving from EU citizenship; 9. Enforce consumer rights.

117 Other objectives are:
- to promote and protect the rights of the child
women, as well as violence against other groups at risk, in particular groups at risk of violence in close relationships, and to protect victims of such violence.

b) Promoting non-discrimination and equality (33 02 02)

This budget heading covers four REC objectives (118) of the Rights, Equality and Citizenship programme. The promotion of equality between women and men, and the advancement of gender mainstreaming is one of the objectives.

The overall budget for the programme is EUR 439.5 million over the period 2014-2020. The two objectives (Gender Equality and Daphne combating violence against women) currently account for around 35 % of the REC funds (119).

According to the REC website (120), a total of 17 grants were issued as of September 2016 and a total 165 projects were funded.

Looking at the REC Work Programmes of 2014, 2015 and 2016 (121), it is possible to identify the planned actions to be funded with the annual budget breakdown by objectives, grants/procurement and the resources planned under these objectives out of the total REC budget.

As shown in Table 5.1, over the 2014-2016 period the majority of funds have been allocated under the Daphne objective (EUR 35 694 157) (122), compared to the Gender Equality Objective (EUR 21 878 009).

In 2014 the funds planned under both objectives amounted to EUR 19 345 000, that is about 35.7 % of the overall REC annual budget (EUR 54 158 000). In 2015 and 2016 resources planned were EUR 17.341.166 and EUR 20 886 000 respectively, with a lower incidence, around 30.8 % and 35.5 % respectively, on the overall REC annual budget (EUR 56 323 637 in 2015 and EUR 58 852 000 in 2016).

- to contribute to ensuring the highest level of protection of privacy and personal data
- to promote and enhance the exercise of rights deriving from citizenship of the EU
- to enable individuals in their capacity as consumers or entrepreneurs in the internal market to enforce their rights deriving from Union law, having regard to the projects funded under the Consumer Programme.

118 Other objectives are:
- to promote the effective implementation of the principle of non-discrimination on the grounds of sex, racial or ethnic origin, religion or belief, disability, age or sexual orientation, and to respect the principle of non-discrimination on the grounds provided for in Article 21 of the Charter
- to prevent and combat racism, xenophobia, homophobia and other forms of intolerance
- to promote and protect the rights of persons with disabilities.

122 Regarding the Daphne objective, our analysis focuses only on Daphne calls aimed to contrast every kind of violence against women (gender based violence, domestic violence, sexual harassment and/or sexual violence, harmful practices), even if they are not only targeted to women, but also to children, young people, as well as other groups at risk, assuming that women and young girls are the main victims of these kind of violence. Conversely, we do not consider three calls regarding specific themes and kinds of violence not directly referred to violence against women or young girls, addressed in the Call for proposals to support transnational projects on the elimination of corporal punishment for children; the Restricted call for proposals for running 116 000 hotlines for missing children; and the Call for proposals to support transnational projects linked to children as victims of bullying at school, in residential care settings and in detention.

Source: REC Website

* The indicated amount only refers to Daphne resources targeted to combat violence against women and young girls, but not to resources targeted specific forms of violence addressing children (e.g. corporal punishment, missing children, bullying at school).

Moving from programming to **implementation** and focusing on the calls covered by our analysis and issued so far *(125)* (September 2016), Table 5.2 shows the calls enacted up to September 2016:

---

123 The 1.2.3. call for proposals to support transnational projects linked to children as victims of bullying at school, in residential care settings and in detention included in the Work Programme (2015) was not taken into account for the reasons above mentioned in note 12.

124 The 1.2.4 Call for proposals to support transnational projects on the elimination of corporal punishment for children and 1.2.5 Restricted call for proposals for running 116 000 hotlines for missing children included in the Work Programme (2015) was not taken into account for the reasons above mentioned in note 12.

125 The operating grant Establishment of a three-year framework partnership agreements 2015-2017 and operating grants 2015-Just/2014/spob/og/netw/ are included among the Daphne and Gender Equality Calls referring to both objectives.
- **Four calls on the subject of violence against women and girls have been issued under the Daphne objective**, of which three (out of four planned grants) based on the 2014 annual work programme and two (out of four planned grants and one procurement) based on the 2015 annual work programme.

- **Two calls have been issued under the Gender Equality Objective**. Of these, one (out of four planned grants and one procurement) is based on the 2014 annual work programme and one call (out of three planned grants and one procurement) is based on the 2015 annual work programme. No calls have been issued so far under the REC 2016 annual work programme out of nine grants and two procurements planned within the two objectives.

- **One Framework Partnership Agreement 2015-2017 and operating grants 2015** covering both objectives (Daphne and Gender Equality).

In total, under both objectives only **7 grants were issued out of 24 and 5 procurements** were planned over the 2014-2016 period. A total of **46 projects** have been funded, equivalent to **27.9% of the total number of REC-funded projects**.

126 The call does not provide a disaggregated budget for the Daphne objective but it presents only an overall budget, which also includes the budget planned for the rights of the child objective.
Specific Objective | Gender Equality Objective
--- | ---
Date | Grants | Budget
--- | --- | ---

Restricted call for proposals action grants to support projects on equal economic independence of women and men (JUST/2014/RGEN/AG/GEND) | EUR 3 350 000

2015 | Call for proposals – Action grants to support transnational projects to promote good practices on gender roles and to overcome gender stereotypes in education, training and in the workplace (JUST/2015/RGEN/AG/ROLE) | EUR 3 350 000

2016 | No calls issued | -

Total budget | EUR 7 650 000

Source: IRS elaborations on the REC Website

*Three calls on specific themes and kinds of violence not referred to violence against women or young girls were not included: Call for proposals to support transnational projects on the elimination of corporal punishment for children, restricted call for proposals for running 116 000 hotlines for missing children, call for proposals to support transnational projects linked to children as victims of bullying at school, in residential care settings and in detention.

During the 2014–2016 period the resources earmarked in the calls under the Daphne **objective to combat violence against women and girls** were twice those used for the **Gender Equality Objective** (EUR 15 859 449 compared to EUR 7 650 000) (**127**).

Moreover, considering the sum of resources used on both objectives for each year, we can see that **significantly more resources were implemented by calls based on the 2014 annual work programme** (EUR 14 172 163) **relative to those allocated by calls based on the 2015 annual work programme** (EUR 9 337 286).

Figure 5.1. compares the total amount of resources planned in the 2014, 2015 and 2016 annual work programmes under the **Daphne objective to combat violence against women** and the **Gender Equality Objective** (EUR 57 572 166) to the total earmarked resources (EUR 23 509 449). Overall the **resources earmarked in the calls are about 40.8 % of those allocated** in the programming phase.

**Figure 5.1: Planned and earmarked resources by year – Daphne and GE objectives (EUR*1000)**

---

---

**127** The Operating Grant Framework partnership agreements 2015-2017 and operating grants 2015 (JUST/2014/SPOB/OG/NETW) – Strand DAPH and RGEN was counted for each objective.
Although not directly addressed to women or gender issues, in some calls based on the 2015 work programme also the **non-discrimination objective** present a cross-cutting attention to the gender perspective with reference to the integration of Roma people (128). In particular, the call for proposals – Action grants to support national or transnational projects on non-discrimination and Roma integration (JUST/2015/RDIS/AG/DISC) – addressed multiple discrimination, underlining that gender can be considered as grounds for discrimination in addition to other forms of discrimination and requiring the identification and exchange of good practices regarding Roma women.

In addition, the restricted call for proposals – Action grants to support National Roma Platforms (JUST/2015/RDIS/AG/NRP2) supported a nationally-led participatory multi-stakeholder process of working meetings, aimed at strengthening partnerships across all levels, including Roma women’s organisations as relevant stakeholders in the implementation of the National Roma Integration Strategies at the local level. The inclusion of Roma people, notably women and youth, in the platform is a prerequisite of the call.

Finally, the Call for proposals: Establishment of three-year Framework Partnership Agreements with EU-level networks & operating grants for 2015 (JUST/2014/SPOB/OG/NETW) affirms that ‘all applications should take into account the gender dimension of discrimination. If the actions deal “with multiple discriminations”, gender can obviously be considered as a discrimination ground in addition to those mentioned above’.

As shown in Table 5.3, the implementation of the non-discrimination objective accounts for 16% of the REC funds for 2015 (EUR 56 323 637).

### 5.1. Daphne calls: priorities and gender issues addressed, resources and examples of projects by priority

In the 2014-2016 period, the calls issued under the **Daphne objective** address all forms of violence against women and/or children: **domestic violence, intimate violence, sexual harassment and/or sexual violence against women and children up to harmful practices (female genital mutilation, forced marriages etc.).**

In more detail, under the **Daphne objective different priorities and gender issues** have been covered by the issued calls:

---

128 The only call issued on the 2014 work programme does not pay any attention to gender aspects, while no calls have been issued so far on the 2016 work programme.

129 The budget provided refers both to the RDIS – non-discrimination policy area, and to the RRAC – racism, xenophobia and other forms of intolerance policy area.
Promoting multi-agency and multidisciplinary cooperation and tackling under-reporting violence issues against women and/or children to respond to violence against women;

Supporting victims through specialised support services aimed at women, young people, child victims of violence and other domestic violence victims to address gender-based violence, domestic violence or intimate relationships;

Fighting and preventing violence linked to harmful practices; FGM, forced or early marriage, forced sexual relationships and so-called honour crimes;

Fighting and preventing sexual harassment and/or sexual violence against women, in particular in the workplace, schools, universities and through social media;

Supporting the creation of EU-level networks to combat violence against women.

Box 5.1 illustrates some interesting projects funded under each one of the above-mentioned priorities (130) and involving the six countries of interest. Additional information on specific calls issued from 2014 until September 2016 are presented in Table A3 in the Annex with indications on their main contents, fundable activities and dedicated budgets.

Box 5.1: Examples of projects funded under the Daphne priorities in the selected six countries

**PRIORITY: Support of victims by specialised support services priority (JUST/2014/SPOB/AG/VICT)**

**WE GO! Women Economic Independence & Growth Opportunity** is a project carried out to respond the first priority. It is led by ActionAid International Italia Onlus (coordinator) and involves an extensive partnership with stakeholders from different countries (Spain, Greece, Cyprus, UK, Sweden). The project’s aim is to strengthen support services for women victims of domestic violence in Europe, with particular regard to training and advisory services that shelters/women’s centres provide to women victims of violence. It focuses on the capacity building of these centres’ trainers and workers and the development of new methods to address the lack of economic alternatives for women victims and to enable them to exit situations of violence as a result of being empowered.

For these purposes, the project has carried out a comparative research on the existing services for women victims and developed common methodologies on data collection. Mutual learning events have been implemented for practitioners to exchange good practices on methodologies supporting the economic independence for women victims.

Finally, training sessions are envisaged for practitioners and victims to test innovative economic empowerment services that can help women exit situations of violence through economic alternatives.

**Universities Supporting Victims of Sexual Violence (USVSV): Training for Sustainable Services** is another project responding to this priority. The project is led by Brunel University London, UK (coordinator) and aims to develop learning from research and good practices adopted in university sexual violence policies/care pathways and ‘first response’ training in partner countries.

The project also intends to create national and international networks of experts, specialist agencies, student union and university staff in order to share knowledge and to deliver innovative first response training in universities which enables staff to treat victims appropriately. All these activities are aimed at improving relations between partner universities and their local victim

---

130 The box does not provide examples of projects for priorities related to calls with evaluation procedures not still completed and for which no project is currently available.
services and to provide a better support through new training embedded in 12 universities, and
good practices shared with many universities.

**PRIORITY: Fighting and preventing violence linked to harmful practices (JUST/2014/RDAP/AG/HARM)**

**EU Roadmap for Referral Pathways on Early/Forced Marriage targeting frontline professionals.** This is a project carried out to improve assistance to victims and their families. Led by the University of Vechta (DE), it aims to obtain and integrate victim/expert feedbacks on an integrated, multi-professional EU Roadmap for Referral Pathways on victims of early or forced marriage or forced sexual relationships for frontline professionals in the EU. Under the project the EU Roadmap is implemented and evaluated with multi-sectorial stakeholders (involved in the child protection system, health sector, law enforcement, education and childcare, victim support services, etc.) in contact with victims or potential victims of harmful practices in five Member States (AT, DE, FR, PT, UK). The EU Roadmap will be disseminated in the EU Member States via the project partners, and in the European Region via the United Nations Population Fund Network. In order to increase awareness of the EU Roadmap the gender focal points in the European Region will be involved, as well as a wide range of NGOs and voluntary organisations that are working directly with young girls at risk of forced marriage and/or its consequences.

**PRIORITY: Fighting and preventing sexual harassment and/or sexual violence against women (JUST/2015/RDAP/AG/SEXV)**

**IMAGINE (Inspiring male action on gender equality in Europe): A tri-nation project to end gender violence.**

Led by Men For Gender Equality Sweden, the project mainly carries out training activities addressed to men/boys. It aims at developing a pan-European initiative/community and tools for engaging men/boys in the fight against sexual harassment and/or sexual violence (SH&SV), in awareness-raising on the links between SH&SV and gender inequality, and in sharing good practices on how men/boys can contribute to stopping SH&SV. The envisaged activities involve the recruitment and training of 10 peer educators in each partner country to co-create a model for working with teenagers.

Daphne supports the activities and operating costs of EU-level networks active in combating violence against women and children for the period 2015-2017. A Framework Partnership Agreement was awarded to the following networks:

- European Network For The Work With Perpetrators Of Domestic Violence E. V.
- Women Against Violence Europe
- End Female Genital Mutilation European Network
- European Federation For Missing And Sexually Exploited Children

Main activities of the networks will be:

- encouraging attitude and behaviour changes towards harmful practices, including female genital mutilation;
- increasing the level of perpetrator programmes and of tailored and specialised support services for female victims of violence, particularly addressing the vulnerabilities of specific groups of women;
- building the capacity of professionals in contact with victims of all forms of violence against women, and enabling multidisciplinary cooperation and mutual learning.

Source: IRS from REC Website
Each of the above-mentioned priorities was covered so far with one call; only the priority on fighting and preventing violence linked to harmful practices has been addressed with two calls (131).

As shown in Figure 5.2 under the Daphne objective, the majority of resources have been earmarked for fighting and preventing violence linked to harmful practices (39 %) (132) and for the support of victims of gender base violence, domestic violence or intimate relationship by specialised support services aimed at women (24 %).

*Includes only the Daphne calls on combating violence against women

Additional details on the calls by specific priority with their linked resources are included in Table A4, Annex 1.

5.2. Gender equality calls: priorities and gender issues addressed, resources and examples of projects by priority

With reference to the Gender Equality Objective, priorities and gender issues addressed were the following:

- **Equal economic independence of women and men and reconciliation;**

---

131. This theme was dealt with in two calls: one specifically addressed to it and another call not only targeted to harmful practices but to all forms of violence against women specifically including particular forms of violence against women and/or children, such as female genital mutilation or forced marriages.

132. The resources taken into account for this specific priority include both those earmarked by the call on this theme (JUST/2014/RDAP/AG/HAR), and those of the call JUST/2015/RDAP/AG/MULT whose evaluation procedure is still ongoing. Thus it is not possible to verify what projects and corresponding budgets are referred to in this theme.
• **Promoting good practices on gender roles and overcoming gender stereotypes** in education, training and in the workplace;

• **Support of EU-level networks on gender equality themes.**

Box 5.2 illustrates some interesting projects funded under the priorities (133) of the Gender Equality Objective and involving the six countries of interest. Additional information on specific calls issued from 2014 until September 2016 with indications of their main contents, fundable activities and specific budgets are presented in Table A3 in the Annex.

**Box 5.2: Examples of projects funded under the priorities of the Gender Equality Objectives and involving the selected six countries**

**PRIORITY: Equal economic independence of women and men and reconciliation (just/2014/rgen/ag/gend)**

**In Pursuit of Full Equality between Men and Women: Reconciliation of Private and Family Life.** This project, run by HR – The Ombudsperson For Sex Equality of The Republic Of Croatia – aims to increase social awareness and address the need for effective measures combating the discriminatory effects of the gender bias distribution of responsibilities within households, and women’s unfavourable position in the labour market.

Training and awareness-raising activities targeting public sector institutions, regional/local governments and students are provided. The project includes a set of innovative auditing activities aimed to raise awareness on the need for more gender-sensitive labour practices facilitating a greater balance between professional and private life, and a set of training activities designed to increase the institutional capacity of local governments to plan, fund, and promote policies supporting women and men in pursuing a more effective balance between their professional and private lives.

The project is particularly focused on developing work arrangements in the public sector encouraging men to assume a greater role in childcare. Public sector employers (9 institutions and companies), and officials in relevant state institutions (400) are involved in measures aimed to increase their institutional know-how and personal capacity of developing policy measures and work arrangements facilitating the reconciliation of private and professional life for both women and men.

In addition, 3 230 high school students were involved in the creation of play scripts, art performances (29) and documentary video material. They use art as an effective educational tool to address gender stereotypes in the division of household roles and care responsibilities.

**Family and work it pays off!** As in the previous project, this one, run by the Polish Ministry Of Labour And Social Policy, also aims to facilitate the reconciliation of professional and family life (RM) through the development and dissemination of a comprehensive and practical tool for employers and employees, facilitating the implementation of reconciliation measures. Increasing the number of companies using the reconciliation mechanisms, with particular emphasis on the flexible working arrangements, is a specific goal of the project.

The implementation of RM in 30 Polish companies (of different sectors, business profiles and sizes) was analysed in case studies, representing the basis for the development of an online platform for employers and employees on RM that can be consulted.

- **ELENA: Experimenting flexible labour tools for enterprises by engaging men and women,** led by the Department For Equal Opportunities – Presidency of Council of Ministers, IT. This project intends to provide a greater understanding of how flexible working arrangements

---

133 The box provides some examples of projects for priorities related only to the calls with completed evaluation procedures.
have been implemented in Italy and their impact on better work-life balance and better sharing of domestic and care responsibility between women and men.

Possible interactions between flexible working arrangements and the use of parental leave by both mothers and fathers were assessed with focus on their impact on the work-life balance, the sharing of family responsibilities, individuals’ well-being and company performance.

The activities envisaged by the project included:

- the carrying out of a comprehensive study on flexible working arrangements, which will allow the identification of one specific policy which will be tested in a large Italian company;
- the development of indicators to measure the outputs on individuals and companies;
- the implementation of a pilot experiment of new working arrangements in a large Italian company in order to show how flexible working arrangements can deliver positive outcomes for both men and women workers, and to promote the use of parental leave by men, through dedicated awareness-raising campaign.

Under the Gender Equality Objective, activities and operating costs of EU-level networks for gender equality policies are supported for the period 2015-2017. A Framework Partnership Agreement was awarded only to the European Women’s Lobby. The main activities of the network will be:

- supporting the development and implementation of gender equality policies and legislation at EU and national levels;
- supporting the final phase of implementation of the Commission’s strategy for equality between women and men 2010-2015 and contributing to the identification of remaining gender equality challenges after 2015;
- promoting equality between women and men in the implementation of the Europe 2020 strategy and its forthcoming midterm review;
- promoting the economic and business case for gender equality across the EU;
- translating gender equality policy and actions into Member States’ national contexts via the network’s national member organisations;
- promoting gender mainstreaming in EU and national policies and supporting national member organisations’ involvement in the promotion of the gender equality aspects of the main EU policies, including the implementation of the gender perspective in the ESIFs;
- improving the knowledge and understanding of discrimination and inequalities between women and men in Member States (including multiple discrimination);
- contributing to an effective legal protection against discrimination on the basis of the various EU-directives implementing the principle of equal treatment between women and men;
- raising public awareness and disseminating information about women’s rights, the rights to gender equality and their benefits to society.

Source: IRS on the REC Website

As shown in Figure 5.3, under the Gender Equality Objective the majority of resources (44 %) have been spent both for promoting equal economic independence of women and men and the reconciliation of work and family/life, and for promoting good practices on gender roles and overcoming gender stereotypes in education, training and the workplace. More details on the calls by specific priority with earmarked resources are included in Table A4, Annex 1.

5.3. **Daphne and Gender Equality projects: involvement of the six countries selected for the study as lead partner (coordinator) or partner**

The analysis considers all the calls under the two objectives issued so far excluding two calls (134) whose evaluation procedures were still not completed.

Figure 5.4 shows which countries among those selected for the study (Croatia, Germany, Italy, Poland, Sweden and UK) are the most involved in the established projects as lead partners or as partners.

**Figure 5.4: Daphne* and Gender Equality projects (2014-2016): overall number of lead partners by country**

*Includes only the Daphne projects on combating violence against women

134 Daphne action grants support to national or transnational projects on multi-agency and multidisciplinary cooperation to respond to violence against women and/or children, and on tackling under-reporting (JUST/2015/RDAP/AG/MULT) and Gender Equality Objective call for proposals – Action grants to support transnational projects to promote good practices on gender roles and to overcome gender stereotypes in education, training and in the workplace (JUST/2015/RGEN/AG/ROLE).
Overall, Italy is the most involved country as lead partner (nine projects) compared to the other countries considered.

As shown in Figure 5.5, the UK is the most involved country as partner, participating in 15 projects with a total of 18 UK organisations involved, but it is lead partner only in two projects, followed by Italy with nine projects and fifteen organisations involved.

Croatia and Poland are the least involved countries both as lead partner (with one project each) and as members of the partnership with one project for Poland and no projects for Croatia.

Germany and Sweden are coordinators of three projects each. However, Germany has participated only in one project as partner with two organisations involved, while Sweden participates in four projects as partner with six organisations involved.

Figure 5.5: Number of projects and organisations partners participating in Daphne* and Gender Equality projects by country

Sources: IRS elaboration on REC Website
*Includes only the Daphne projects on combating violence against women

Finally, it is worth underlining that the Framework Partnership Agreements 2015-2017 & operating grants 2015 (Just/2014/spob/og/netw) supported some networks active in combating violence against women and children or in supporting gender equality policies. These networks (135) are umbrella organisations including national organisations from different countries, including the six countries selected for the study. Among these, Germany is the coordinator of European Network For The Work With Perpetrators Of Domestic Violence E. V.

The involvement of the selected countries on the two objectives (Daphne and Gender Equality) can also be analysed in the overall resources awarded to projects (136) in which the Member States have participated as lead partners. Additional details on the specific resources awarded to each projects are included in Table A5 in the Annex.

135 Women Against Violence Europe; End Female Genital Mutilation European Network; European Federation For Missing and Sexually Exploited Children; European Women’s Lobby.
136 In this case the Framework partnership agreements 2015-2017 and operating grants 2015 – RDAP Daphne and RGEN Equality between women and men (Just/2014/spob/og/netw) is not considered due to the lack of information on specific resources awarded to each network.
As shown in Figure 5.6, among the six countries analysed, Italy runs the largest number of projects as lead partner mobilising most of the earmarked REC resources (44%) out of the total resources allocated to the projects led by the six countries with reference to the calls taken into account by our analysis. Sweden and UK follow with 22% and 20% of total resources respectively.

Figure 5.6: Daphne* and GE project resources by lead partner country over the total resources awarded to the six countries (2014, 2015, 2016)

![Daphne and GE project resources by lead partner country](image)

Source: IRS elaboration from REC Website
*Includes only the Daphne projects on combating violence against women

The total project resources awarded under Daphne (combating VAW) and GE projects have reached EUR 23 509 449 (Table 5.4). Of this, Italy runs 15.7%, followed by Sweden and UK running 7.9% and 6.9% respectively.

Sources: IRS elaboration on the REC Website
*Includes only the Daphne projects on combating violence against women

The predominance among the six considered countries by Italy as lead partner may be explained by the lack of national resources dedicated to gender equality, and the fight to combat violence against women. In the same way, the lower participation of Sweden compared to Italy may be due to the greater availability of national resources allocated to gender equality.
The high involvement of UK institutions as partners (much less as coordinators) may be explained by the need of other Member States participating in European projects to have a UK organisation in their project team because English is the language used to draft project documents. Finally, Croatia only recently entered the EU and Croatian organisations need time to be recognised as suitable partners in EU projects.
6. CONCLUSIONS AND POLICY IMPLICATIONS

The assessment conducted in this study shows that the MFF 2014-2020 needs to make a stronger commitment to gender equality and gender mainstreaming. The EU’s political commitments to gender equality and gender mainstreaming does not seem to be internalised in the budget allocation and spending decisions of all policy areas and this is likely to reduce the effectiveness of gender equality policies. Many budget headings do not specify the amount allocated to identified gender policy objectives and actions. This makes financial and budgetary accountability difficult and raises the risk of gender equality objectives being marginalised in spending decisions. Important tools for gender mainstreaming, such as gender indicators, Gender Impact Assessment and Gender Budgeting, are very rarely adopted both in the EU and national institutions.

Attention to gender mainstreaming and the provision of specific funds for gender equality measures is present mainly in programmes addressing employment and social inclusion issues or fundamental human rights (e.g. the ESF, REC, some of the funding instruments for external action, AMIF and the EaSI funds). A gender equality perspective is instead rarely adopted in policy fields that are not seen as immediately related to gender equality, but that may have significant gender effects such as ICT, transport, business and investment support and environmental policies. In addition, the frequent recourse to ad hoc instruments constituted outside the EU makes it even more difficult to assess the application of gender mainstreaming in the EU budget.

The gender dimension tends to disappear in those programmes where only general objectives are indicated, limited at best to the generic concept of gender equality with no specific actions or conditions laid down to provide concrete assistance in achieving the objective. Several programmes do not incorporate specific gender indicators and do not require the collection of gender-disaggregated data as part of the monitoring and evaluation of actions funded from the EU budget. In the absence of precise objectives on gender equality, the transversal treatment of gender risks a downgrading of gender equality and gender mainstreaming goals in the policy agenda. This risk is further exacerbated by the recent tendency to merge all grounds of discrimination, including discrimination based on sex, within the promotion of civil rights and equal treatment for all. Another particularly critical issue relates to the funding of gender equality strategies and the fiscal consolidation and budget constraints imposed by the crisis, that are likely to further reduce the available resources for gender equality strategies and bodies.

Policy implications

The 2014-2020 MFF and all the EU programmes should have a stronger commitment to gender equality and gender mainstreaming. In order to be effective, gender mainstreaming has to be operationalised and supported through predictable funding and allocations. To this end it is crucial that all EU-funded programmes and budget titles adopt explicit gender equality targets whenever possible. Greater transparency in financial allocations, enhanced use of gender-related indicators, and more systematic collection of gender-disaggregated data are needed. The further advancement in Gender Budgeting from the planning stage of the MFF to implementation, auditing and evaluation, even if challenging, should be given special focus, taking into account that it is one of the most effective ways to implement gender mainstreaming. Gender Budgeting requires an extensive analysis from a gender perspective of all the EU policy intervention areas and funding programmes.

This requires that:
**Gender Budgeting is made mandatory in the EU budgeting process.** All EU institutions and policy directorates should confirm their commitment to mainstream gender equality in the policy fields of their competence, adopting appropriate gender mainstreaming tools in the policymaking processes. Gender equality should be integrated as a distinct policy objective in all headings of the EU budget, and the financial allocations for gender equality policy objectives and actions should be specified. Progress towards gender equality targets should be constantly monitored in the annual and midterm reviews of the MFF.

**Gender-relevant data and indicators should be considered in all programmes and actions that receive funding from the EU budget** and be used in all budgetary procedures. Gender-disaggregated data on beneficiaries and participants in all actions that receive funding from the EU budget, as well as gender-relevant data, should be collected in the monitoring and evaluation system.

In order to support the effective implementation of gender mainstreaming in all the EU areas of intervention, it is necessary to improve the in-house capacity of EU institutions on gender mainstreaming. This can be achieved by integrating a gender perspective in all EU training programmes, as well as providing specific training and technical support on the use of Gender Impact Assessment and Gender Budgeting tools. This is needed especially in relation to those policy fields not considered as immediately related to women and gender equality, although they may have significant effects on gender equality.

In relation to the programmes considered in this study, some specific policy implications emerge from the analysis:

- The implementation of the gender equality measures envisaged in the Operational Programmes of the **ESI funds** should be closely monitored and evaluated, in order to avoid the downgrading of gender equality measures in the implementation phase. To this end, the creation of permanent national structures providing technical support for gender mainstreaming in the planning and implementation stages of all funds is crucial, as shown by the Swedish and German cases. Special attention should be given to ESIF measures supporting investments in educational, social and healthcare services, which are facing reductions in public funding at the national and local level due to the crisis and deficit reduction strategies. The financial allocations for social infrastructures and services could eventually be increased, in the midterm revision.

- In relation to **Horizon 2020**, gender mainstreaming should be strengthened in all the funded pillars with the establishment of gender-relevant targets. In addition, an independent line of funding (such as GERI for 2014-2016) for gender-specific structural change projects as well as other gender equality topics in research and innovation should be maintained, in order to support the implementation of the binding legal requirements related to gender equality included in H2020. To this end, the changes envisaged in the new Science with and for society scoping paper 2018-2020 that subsume gender equality funding under the more general heading of RRI – responsible research and innovation – should be avoided. As already underlined, past experience shows that when gender equality is subsumed within another topic, it tends to be sidelined and disappears.

- The **REC programmes** directly addressing gender issues should be maintained and the allocated resources increased, in order to contrast the sharp reductions in many Member States of public funds for measures promoting gender equality and fighting violence against women. A stronger involvement of NGOs active in gender equality fields should be supported in order to ensure effective implementation.
The interventions implemented to face the current dramatic refugee and migrant crisis should give greater attention to the specific needs of refugee and migrant women and girls, who are disproportionately disadvantaged and at risk of being victims of violence. The MFF revision should provide for specific funding to support targeted measures ensuring that the basic rights, safety and security of refugee and migrant women are protected.

The role of the European Parliament, and particularly of the FEMM Committee, is crucial for the constant monitoring and evaluation of the implementation of gender mainstreaming and gender equality in EU budgeting decisions and policy making.

### TABLE A3 – DAPHNE AND GENDER EQUALITY REC GRANTS (2014-2016): OVERVIEW OF MAIN CONTENTS AND BUDGET

<table>
<thead>
<tr>
<th>Specific Objective</th>
<th>Daphne – to prevent and combat all forms of violence against children, young people and women, as well as violence against other groups at risk, in particular groups at risk of violence in close relationships, and to protect victims of such violence</th>
<th>Date</th>
<th>Priorities/issues covered and activities</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Framework partnership agreements 2015-2017 &amp; operating grants 2015</td>
<td>Based on the 2014 annual work program. Priority: This call aims to support for the period 2015-2017 activities and operating costs of EU level networks, whose statutory aims fall under or contribute to specific objectives of the REC Programme. Among the policy areas covered by the call:</td>
<td>Deadline 14-11-2014 Evaluation procedure concluded for 2015</td>
<td>1. RDAP – Daphne - Prevent and combat violence against children and/or women and protect victims of such violence Activities (RDAP): the networks should focus on the following activities: Ø encouraging attitudinal and behavioural changes with regards to harmful practices, including female genital mutilation; Ø increasing the level of perpetrator programmes and of tailored and specialized support services for female victims of violence, particularly addressing the vulnerabilities of specific groups of women; Ø building the capacity of professionals in contact with victims of all forms of violence against women, and enabling multi-disciplinary cooperation and mutual learning.</td>
<td>RDAP – Daphne + RCHI – Rights of the child 1.080.000 EUR[^137]</td>
</tr>
<tr>
<td>Justice &amp; Daphne call - Action grants to support victims of violence and Crime - REC Programme (2014-2020) and Justice</td>
<td>Based on the 2014 annual REC work programme The Daphne strand covers specialised support services aimed at women, young people, child victims of violence and other domestic violence victims. Projects must take a child-centred approach and/or a gender-sensitive approach depending on their target group. Priorities: - DAP - victims of gender-based violence: developing targeted and integrated support for victims of gender-based violence, including with specific needs, such as victims of sexual violence or victims of violence in close or intimate relationships; - DAP- child victims of violence: support services for child victims of violence with a child-centred and child rights approach;</td>
<td>Deadline 10-02–2015 Evaluation procedure concluded</td>
<td>Available budget: 4 500 000 EUR (Daphne strand) Budget earmarked in the calls: 4,474,450.76 EUR.</td>
<td></td>
</tr>
</tbody>
</table>

[^137]: The call doesn’t indicate a disaggregated budget for the Daphne objective but it presents only an overall budget including also the budget planned for the Rights of the child objective.
**Specific Objective**

**Daphne – to prevent and combat all forms of violence against children, young people and women, as well as violence against other groups at risk, in particular groups at risk of violence in close relationships, and to protect victims of such violence**

**Daphne call – Transnational projects on violence against women, young people and children linked to harmful practices – JUST/2014/RDA P/AG/HARM**

**Deadline 3-06-2015**

**Evaluation procedure concluded**

Based on the 2014 annual work programme.

**Priority:**

- to combat and prevent violence linked to harmful practices, such as female genital mutilation, forced or early marriage or forced sexual relationships, and so-called "honour crimes" committed against women, young people and children

**Activities:**

The activities founded are aimed at:

- promoting an integrated approach, including through the development and rollout of multi-sectorial guides and protocols for child protection system actors and other actors (e.g. health sector, law enforcement, education and childcare, justice, victim support services) in contact with victims or potential victims of harmful practices;

- raising awareness and changing attitudes among relevant communities, including through dialogue, mutual learning and exchange of good practice

Projects must take a child-centred approach and/or a gender-sensitive approach depending on the end beneficiary target group

**Available budget:**

EUR 4.500.000

Budget earmarked in the calls: 4,317,713,63 EUR

**Daphne call - Action grants to support transnational**

**Deadline 13/10/2015**

Based on the 2015 annual work programme.

**Priority:**

Available budget: 3,000,000

Budget earmarked in the calls:
<table>

<tr>
<td>Grants to combat harassment and sexual violence against women</td>
<td>to prevent and combat sexual harassment and/or sexual violence against women and girls, in particular in one or more of the following contexts: the workplace, in schools and universities and through new technologies and social media. Activities: - training and cooperation of relevant professionals (health services, police, the judiciary, social workers, teachers, employers, trade union representatives, university staff etc.) to better prevent and respond to these forms of violence, including through the establishment of formal or informal procedures and support programmes to respond to cases; - development and practical implementation of modules and/or materials to train and educate children (boys and girls), young people, men and/or women to prevent sexual harassment and/or sexual violence in the contexts above mentioned by bringing about attitudinal and behavioural changes with regard to gender roles, stereotyping and sexualisation.</td>
<td>2,987,286,58 EUR</td>
<td></td>
</tr>
<tr>
<td>Daphne call - Action grants to support national or transnational projects on multi-agency and multi-disciplinary cooperation to respond to violence against women and/or children, and on tackling underreporting</td>
<td>Based on the 2015 annual work programme, Two priorities: - to encourage victims and witnesses to report violence against women and/or children to the relevant authorities and institutions, thus ensuring their access to the support they are entitled to receive, taking account of and signposting existing mechanisms such as child and women's helplines, women's refuges, interagency and multidisciplinary children's houses, etc.; - to develop and implement multi-sectoral and multi-disciplinary cooperation (at national, regional or local level) that enables relevant professionals to effectively collaborate to prevent and respond to violence against women and/or children. Projects under this call may take a comprehensive approach to all forms of violence against women and/or children or may focus on particular forms of violence against women and/or children, such as female genital mutilation or forced marriages Activities: - awareness-raising activities targeted at women and/or children who are victims or potential victims of violence, and/or at bystanders or witnesses, to encourage the reporting of violence - the exchange of best practices and development, testing and implementation of methods and practical tools (including protocols and guidelines) to enable the cooperation and coordination of professionals from different sectors who come into contact with women and/or children at risk of and/or victims of violence (including training for professionals)</td>
<td>Available budget: 3,000,000 EUR</td>

</tr>
</thead>
</table>
| Framework partnership agreements 2015-2017 & operating grants 2015 Just/2014/spob/og/netw | Deadline 14-11-2014 Evaluation procedure concluded for 2015 | Based on the 2014 annual work programme, **Priority:** This call aims to support for the period 2015-2017 activities and operating costs of EU level networks, whose statutory aims fall under or contribute to specific objectives of the REC Programme. Among the policy areas covered by the call:  

- **RGEN - Equality between women and men**

  **Activities (RGEN):**
  The networks should focus on the following activities:
  - supporting the development and implementation of gender equality policies and legislation at EU and national levels;
  - supporting the final phase of implementation of the Commission's Strategy for equality between women and men 2010-2015 and contributing to the identification of remaining gender equality challenges after 2015;
  - promoting equality between women and men in the implementation of the Europe 2020 Strategy and its forthcoming mid-term review;
  - promoting the economic and business case for gender equality across the EU;
  - translating gender equality policy and actions into Member States' national contexts via the network's national member organisations;
  - promoting gender mainstreaming in EU and national policies and supporting national member organisations' involvement in the promotion of the gender equality aspects of the main EU policies, including the implementation of the gender perspective in the European Structural and Investment Funds;
  - improving the knowledge and understanding of discrimination and inequalities between women and men in Member States (including multiple discrimination);
  - contributing to an effective legal protection against discrimination on the basis of the various EU-directives implementing the principle of equal treatment between women and men;
  - raising public awareness and disseminating information about women's rights, the rights to gender equality and their benefits to society. | RGEN - Equality between women and men 950.000 EUR |
| Restricted call for proposals action grants to support projects on equal economic independence | Deadline 31-03-2015 Evaluation procedure concluded | Based on the REC 2014 annual work programme, with a focus on equal economic independence, this call aims to support national actors to improve gender mainstreaming in the policies and programmes and to achieve the objectives defined in the European Strategy for equality between women and men and the European Pact for gender equality. **Priority:**  

- proposals dealing with equal economic independence of women and men, including aspects such as reconciliation of professional and private life and how to share housework and care responsibilities more equally between women and men. | 3.350.000 EUR |
## Specific Objective

**Promoting equality between women and men and to advance gender mainstreaming**

</table>

---

138 This theme was dealt with in two calls: one specifically addressed to it and another call not only targeted to harmful practices but to all forms of violence against women specifically including particular forms of violence against women and/or children, such as female genital mutilation or forced marriages. The resources take into account for this specific priority thus include both the specific amount of call addressed to this theme (JUST/2014/RDAP/AG/HAR) and the resources implemented within the call (JUST/2015/RDAP/AG/MULT) whose evaluation procedure is still ongoing. For this reason it is not possible to verify which projects and corresponding budgets are referred to this theme.
