A7-0214/2011

Proposal for a directive
Article 16 a (new)

Text proposed by the Commission

Amendment

Article 16a

Reassessment

The Commission shall, no later than two years after peer reviews by Member States have taken place as provided for in Article 16(3), submit a report to the European Parliament and the Council which focuses on a reassessment of the concept of the management of spent fuel and radioactive waste and the export provisions laid down in Article 4(3). That reassessment shall in particular consider the issues of reversibility and retrievability of waste once it is placed in a disposal site in the light of research developments and further scientific knowledge in this field. The report shall, if necessary, be followed by a revision of this Directive to reflect the latest technological research regarding spent fuel and radioactive waste management.

Proposal for a directive

Recital 24

Text proposed by the Commission

(24) While it is up to the Member States to define their energy mix, all Member States generate radioactive waste, whether or not they have nuclear reactors. Radioactive waste arises mainly from activities of the nuclear fuel cycle, such as the operation of nuclear power plants and the reprocessing of spent fuel, but also from other activities, such as applications of radioactive isotopes in medicine, research and industry.

Amendment

(24) While it is up to the Member States to define their energy mix, all Member States generate radioactive waste, whether or not they have nuclear reactors. Radioactive waste arises mainly from activities of the nuclear fuel cycle, such as the operation of nuclear power plants and the reprocessing of spent fuel, but also from other activities, such as applications of radioactive isotopes **in *the military, and in*** medicine, research and industry.
