A7-0052/2012

Proposal for a directive
Recital 8

Text proposed by the Commission

Amendment

(8) In the interest of fiscal neutrality, the same minimum levels of taxation should apply for each component of energy taxation, to all energy products put to a given use. Where equal minimum levels of taxation are thus prescribed, Member States should, also for reason of fiscal neutrality, ensure equal levels of national taxation on all products concerned. Where needed, transitional periods for the purposes of equalising those levels should be foreseen.
