Motion for a resolution

Paragraph 10

Motion for a resolution

10. Is concerned about the different national approaches taken so far by the Member States on regulating the internet and the sharing economy; urges the Commission to take initiatives, in line with EU competences, to support innovation and fair competition, remove barriers to digital trade, and preserve economic and social cohesion and the integrity of the single market: calls on the Commission *also* to preserve the internet as **an open, neutral, secured, inclusive,** global platform for communication, production, participation, creation, cultural diversity and innovation, in the interest of citizens, consumers and the success of European companies globally;

Amendment

10. Stresses that the Commission and all Member States should rigorously defend the net neutrality principle; calls on the Commission, *in this connection*, to preserve **the openness of** the internet as **a** global platform for communication, production, participation, creation, cultural diversity and innovation, in the interest of citizens, consumers and the success of European companies globally;

Motion for a resolution**Paragraph 109***Motion for a resolution**Amendment*

109. Considers that the European ICT standardisation plan and revision of the interoperability framework, including the Commission's mandates to European standardisation organisations, should be part of a European digital strategy to create economies of scale, budget savings and improved competitiveness for European companies, and to increase cross-sectoral and cross-border interoperability of goods and services through the faster definition, ***in an open and competitive way, of voluntary, market-driven and global*** standards that are easily implemented by SMEs; encourages the Commission to ensure that standardisation processes include all relevant stakeholders, attract the best technologies and avoid the risk of creating monopolies or closed value chains, especially for SMEs and start-ups, and to actively promote European standards internationally in light of the global nature of ICT standardisation initiatives;

109. Considers that the European ICT standardisation plan and revision of the interoperability framework, including the Commission's mandates to European standardisation organisations, should be part of a European digital strategy to create economies of scale, budget savings and improved competitiveness for European companies, and to increase cross-sectoral and cross-border interoperability of goods and services through the faster definition ***of open, minimalistic and*** voluntary standards that ***can be implemented with free software and*** are easily implemented by SMEs; encourages the Commission to ensure that standardisation processes include all relevant stakeholders, attract the best technologies and avoid the risk of creating monopolies or closed value chains, especially for SMEs and start-ups, and to actively promote European standards internationally in light of the global nature of ICT standardisation initiatives;

Paragraph 121 a (new)

Motion for a resolution

Amendment

121a. Emphasises that an e-government action plan relying on once-only principles for increased efficiency and cost reduction in the public sector should also take into consideration the potential increase in the cost of protecting personal data in the systems infrastructure needed to support 'once only', and the implications of 'once only' for the new privacy- and security-by-design requirements in the proposed General Data Protection Regulation;

A8-0371/2015

Motion for a resolution Paragraph 124

Motion for a resolution

124. Is concerned that cloud infrastructures for researchers and universities are fragmented; calls on the Commission, in cooperation with all relevant stakeholders, to set up an action plan to lead to the establishment of the European Open Science Cloud by the end of 2016, which should seamlessly integrate existing networks, data and high-performance computing systems and e-infrastructure services across scientific fields, within a framework of shared policies, standards and investments; believes that it should serve as a stimulus to the development of clouds beyond science, to better interconnected innovation centres, start-up ecosystems, and improved cooperation between universities and industry in commercialising technology, in compliance with relevant confidentiality rules, and to facilitating international coordination and cooperation in this field;

Amendment

124. Is concerned that cloud infrastructures for researchers and universities are fragmented; calls on the Commission, in cooperation with all relevant stakeholders, to set up an action plan to lead to the establishment of the European Open Science Cloud, ***implemented with free software***, by the end of 2016, which should seamlessly integrate existing networks, data and high-performance computing systems and e-infrastructure services across scientific fields, within a framework of shared policies, standards and investments; believes that it should serve as a stimulus to the development of clouds beyond science, to better interconnected innovation centres, start-up ecosystems, and improved cooperation between universities and industry in commercialising technology, in compliance with relevant confidentiality rules, and to facilitating international coordination and cooperation in this field;
