Paragraph 44

Motion for a resolution

44. Calls on the Commission and the Member States to take all requisite measures to promote low-risk pesticides, and to prioritise non-chemical options and methods which entail the least risk of harm to health and the natural environment, while ensuring effective and efficient crop protection; stresses that for this to be successful, the economic incentives for farmers to choose such options must be strengthened;

Amendment

44. Calls on the Commission and the Member States to take all requisite measures to promote low-risk pesticides, and to prioritise non-chemical options and methods which entail the least risk of harm to health and the natural environment, while ensuring effective and efficient crop protection; stresses that for this to be successful, the economic and fiscal incentives for farmers and pesticide producers to choose such options must be strengthened;

Paragraph 45

45. Calls on the Commission and the Member States to place greater emphasis on the promotion of the development, research, registration and marketing of low-risk and biological alternatives, including by increasing funding opportunities within Horizon Europe and the Multiannual Financial Framework 2021-2027; recalls the importance of using chemical pesticides as a last resort in IPM after having exhausted other physical and biological methods, and the added value of ecologically sustainable and safe plant protection techniques;

45. Calls on the Commission and the Member States to place the emphasis on the development, research, promotion and uptake of sustainable, ecological and safe plant protection techniques, and to provide for the necessary incentives, instead of further promoting and enabling the development of so-called ‘innovative’ techniques that only maintain the use of pesticides;

Or. en
53. Calls on the Commission and the Member States to promote research programmes aimed at determining the impacts of pesticide use on human health, taking into account the full range of toxicological effects, including immunotoxicity, endocrine disruption and neurodevelopmental toxicity, and focusing on the effects of prenatal exposure to pesticides on children’s health;

53. Calls on the Commission and the Member States to promote research programmes aimed at determining the impacts of pesticide use on human health, taking into account the full range of toxicological and long-term effects, including immunotoxicity, endocrine disruption and neurodevelopmental toxicity, and focusing on the effects of prenatal exposure to pesticides on children’s health;
