Zika virus outbreak

Motion for a resolution

Paragraph 10 a (new)

Motion for a resolution

Amendment

10a. Notes the possibility of applying biological control of the vector through the introduction of organisms that prey upon, parasitise, compete with or otherwise reduce populations of the target species; notes, with specific reference to fighting Aedes, that the WHO states that ‘a selection of larvivorous fish species and predatory copepods (small freshwater crustaceans) are effective against the immature larval stages of vector mosquitoes’;
