Subject: Follow-up question on feed-in tariff rates for household wind turbines

With regard to its response to my question E-002172/2014 on the notification and assessment of changes to feed-in tariff rates for household wind turbines, could the Commission please answer the following supplementary question:

Has the Commission received a satisfactory answer from the Danish authorities to its follow-up questions of 7 May 2014 on this matter to the Danish Energy Agency (which comes under the Danish Ministry of Climate, Energy and Building), and when can a final decision be expected?
