Subject: EU student tuition fees

EU citizens receive loans for tuition fees to study at a UK university on the same basis as domestic UK citizens.

Does the Commission have information about the financial impact of the principle of equal treatment as regards tuition fee loans in the UK?

If yes, what is the total amount of loans taken out for tuition fees, loans repaid and loans currently outstanding for EU students studying at the following universities since 2009: Birmingham University, Birmingham City University, Wolverhampton University?

How much student debt has been wiped for EU students at these universities since 2009?
