to the Council**
Rule 130
Dennis de Jong (GUE/NGL)

Subject: Action to combat tachograph fraud website

A device is for sale on the website <http://www.stoptachograf.pl> which can fraudulently interfere with tachograph readings. When the system is activated, it blocks the tachograph and the driver cannot be monitored.

1. Is the Council aware of the existence of this device and this website?
2. Does the Council agree that such fraudulent practices represent a serious threat to honest operators in the transport sector?
