

**Question for written answer E-008443/2014
to the Commission**
Rule 130
Claudia Schmidt (PPE)

Subject: TEN-T

By way of TEN-T the EU is seeking to create a uniform, integrated, multimodal European transport network, and is investing large sums via CEF, primarily in the expansion of the railway network.

Is a specific Transfer of Traffic Directive envisaged so as to ensure that the railway infrastructure that is created and planned is used, and therefore that the significant financial expenditure is justified?
