

**Question for written answer E-000718/2015
to the Commission**
Rule 130
Ernest Maragall (Verts/ALE)

Subject: Juncker Investment Plan

The Juncker Investment Plan officially rules out any kind of quota governing the way funds are distributed amongst the Member States.

Disparities between the Member States resulting from prior commercial deficits and surpluses were responsible for the debt and credit crisis.

1. Could the Commission tell us how it intends to improve the situation in the EU without addressing and resolving these regional disparities?
2. In the Commission's view, should the Juncker Investment Plan include targets for redressing the balance in the Member States and the regions?
