Subject: Line 4 of the Milan underground

Line 4 of the underground railway currently being built in Milan is one of the works being investigated by Italian prosecutors for Mafia infiltration of contracted companies. Five disqualification orders have been issued on grounds of Mafia infiltration of the companies which secured the contracts for the work, which has received EIB funding to the tune of EUR 300 million.

1. Does the Commission not think it should introduce a special monitoring procedure for the contracts regarding this work and should it not provide for more stringent measures with regard to anti-mafia checks?
2. Does it not agree that the EIB funding should be suspended as a preventive measure?
3. What measures to protect EIB funds does it intend to take when it is found that the Mafia has infiltrated works that are being financed?
