Subject: Unclear accounting for European funds used by the company LTF s.a.s.

By Decisions C (2008) 7733 and C (2013) 1376, the Commission granted co-funding to Italy and France for the 'New Lyon - Turin Rail Link' project. No detailed accounting for the initiatives is available at the European Commission websites. Article II(2)(4) of the Decision states: 'the beneficiary shall submit a strategic action plan (SAP) to the Commission, which shall form the basis of progress checking and control throughout the period of implementation of the project,' while Article III(3) states the rules to follow for payments.

1. Can the Commission supply details of the invoices (references, descriptions and amounts) which LTF s.a.s. has received to date from its suppliers?
2. Can it supply the detailed amounts (references, descriptions and dates) which LTF has charged to the European co-finance, and for which it has sent the Commission supporting evidence of its spending?
3. Can it state the amount of co-finance, with full related accounting details, which the Commission has granted LTF up to the end of 2016 under these two Decisions?
