

**Question for written answer E-001823/2015
to the Commission**
Rule 130
Ivan Jakovčić (ALDE)

Subject: Cars and environmental protection

The car industry is one of the pillars of the European economy. At the same time, it is known that cars have a very harmful effect on the environment.

Is the Commission assessing the impact of cars on the environment and, in this context, what is the Commission doing to stimulate the research and production of cars using electric power?

I also ask the Commission if there are studies showing to what extent the risk to the environment would be reduced by the use of electric cars?
