

**Question for written answer E-001824/2015
to the Commission**
Rule 130
Ivan Jakovčić (ALDE)

Subject: Wind power plants

Wind power plants are one of the renewable energy sources widespread in the European Union.

However, in many areas there is resistance to the erection of pillars in order to build wind farms.

Does the Commission have relevant and objective studies on the environmental impact of wind farms already built, primarily in terms of noise and in relation to the landscape and birds?
