

**Question for written answer E-001829/2015
to the Commission**
Rule 130
Ivan Jakovčić (ALDE)

Subject: The European stock exchange union

There are many reasons for creating a single European stock exchange union. The funding of business activities by classical loans is the predominant mode of financing.

Financing by issuing shares on the stock market is generally less common in most Member States.

What steps is the Commission taking and when can one expect the creation of a single European stock exchange union?
