

**Question for written answer E-002274/2015
to the Commission**

Rule 130

Nessa Childers (S&D)

Subject: Member State vaccination programme gaps and collective immunisation

How does the Commission view the implications of serious gaps and shortcomings in Member States' national vaccination plans in terms of the population's ability to interrupt the circulation of pathogens through collective immunisation?

Is the Commission aware of any data on the cross-border risks to Member States' populations arising from such gaps? If not, does the Commission intend to measure this risk?
