

**Question for written answer E-002760/2015
to the Commission**
Rule 130
Ivan Jakovčić (ALDE)

Subject: Additional funding for recycling

The Commission has proposed that, by 2030, at least 70% of municipal waste and 80% of packaging waste within the EU must be recycled. Some Member States are objecting to these targets.

Has the Commission taken into account the frequent instances of great geographical differences from one Member State to the next? In remote rural areas, and especially on small islands, the above measure is not easy to implement.

Will the Commission propose that additional financing be provided from own resources?
