to the Commission**  
Rule 130  
**Ivan Jakovčić (ALDE)**

Subject: Recycling and circular economy

Encouraging recycling and creating a circular economy, as well as encouraging the use of energy from renewable energy sources are important principles of the EU policy.

In order to make them a success it is very important to raise awareness and further knowledge of the matter.

I ask the Commission what mechanisms for promoting these policies are used in Member States.

Does the Commission know about the way regular schools or educational systems of the Member States teach about the values of circular economy and renewable energy sources?
