

**Question for written answer E-002884/2015  
to the Commission**

Rule 130

**José Blanco López (S&D)**

Subject:     Single European Sky

In its answer to question E-010357/2014, the Commission said that as a result of the implementation of the Single European Sky scheme a reduction in the costs per flight in the order of 3% per year had been achieved. However, the Commission did not provide data broken down by country, as I requested.

Can the Commission please provide details on the impact which the entry into force of the Single European Sky has had on the costs of air traffic control, broken down by country?
