Subject: Development of good-neighbourly relations by Montenegro

One of the objectives of the EU's Stabilisation and Association process in the Western Balkans is to develop a political dialogue between the parties concerned.

The development of good-neighbourly relations and regional cooperation are an important part of that political dialogue.

How does the Commission view Montenegro's development in this regard since the implementation of the Stabilisation and Association Agreement?

Does the Commission consider that Montenegro is acting in line with EU policies across the region as a whole?
