

**Question for written answer E-004279/2015
to the Commission**
Rule 130
Richard Sulík (ECR)

Subject: Draft waste law - possibility of the initiation of proceedings under Article 258 TFEU

Slovakia's draft waste law, currently in its second reading before the National Council of the Slovak Republic, was subject to procedure under number 2014/424/SK at the end of last year in accordance with Directive 98/34/EC. The information available indicates that Slovakia, despite not accepting all of the Commission's observations and reservations about the draft, has presented it to MPs for their approval.

In the Commission's opinion, is it possible to initiate proceedings under Article 258 TFEU, or the pilot stage thereof, if the provisions to which the Commission has raised objections are adopted in their originally drafted form or in such a manner that the meaning of the draft in those parts to which objections have been raised remains unchanged after approval of the draft law by the National Council of the Slovak Republic or after the law enters into force or effect?
