Subject: Funding of the road between Postojna (Slovenia) and Rupa (Croatia) under the Connecting Europe Facility (CEF) instrument

It is well known that because of the port of Rijeka, which is located on the shortest cargo transport route between the Mediterranean and Central Europe, it is important to connect Rupa in Croatia and Postojna in Slovenia with a quality motorway, which currently does not exist. The road link between Postojna and Rupa on the Croatian side forms part of the comprehensive TEN-T network.

1. Would be it possible to fund the motorway between Rupa and Postojna under the Connecting Europe Facility (CEF) instrument?
2. What needs to be done for this traffic route to be funded under the Connecting Europe Facility (CEF)?
