

**Question for written answer E-005292/2015  
to the Commission**

Rule 130

**Gabriel Mato (PPE) and Carlos Iturgaiz (PPE)**

Subject: Alternative car fuels in the EU

Recent years have seen the appearance of alternative car fuels such as liquefied petroleum gas (LPG), compressed natural gas (CNG) and liquefied natural gas (LNG), electricity, biofuels and hydrogen. However, there does not seem to have been a significant development in the use of these alternative fuels.

What statistics does the Commission have on the use of alternative car fuels in the EU and on the increase in their use in recent years?

What measures is it planning to promote their use?
