

**Question for written answer E-006370/2015
to the Commission**
Rule 130
Ivan Jakovčić (ALDE)

Subject: European education systems

By passing through the 'Bologna' system, European systems of higher education have established common standards, values and levels of education.

Elementary and high school systems significantly differ from one Member State to another.

Does the Commission intend to propose to the Member States a greater coordination of these educational systems in order to achieve a better aligned European educational system?
