Subject: Modernisation of railways on the west coast of the Adriatic

As the Rapporteur to the European Parliament for the Adriatic-Ionian strategy of the European Union I am familiar with the need for modernisation of the railway line on the route between Ancona and Bari. The regions of Marche, Abruzzo, Puglia and Molise expect me to include this in the report I am preparing.

What is the position of the Commission on the need for modernisation of the railway on the Ancona – Bari route?
