

**Question for written answer E-006389/2015
to the Commission**
Rule 130
Ivan Jakovčić (ALDE)

Subject: The European Energy Union and the Western Balkans

The Western Balkans have great energy potential, especially from renewable energy sources, but there is a lack of financial resources for investment.

In what way does the Commission propose to take advantage of this great potential to create a more independent European Energy Union?

What financial resources can be made available for such strategic investments?
