

**Question for written answer E-006889/2015
to the Commission**

Rule 130

Enrico Gasbarra (S&D)

Subject: European Citizens' Initiative - Right2Water

Since the Right2Water European Citizens' Initiative is the first to have met the requirements set out in Regulation (EU) No 211/2011, having been signed by almost 1.9 million people,

and since the Commission Communication on this subject does not make provision for any real regulatory instruments in response to the issues raised by the European Citizens' Initiative, can the Commission clarify, as regards Right2Water's primary objective, what legislative proposals it is planning to put forward, including a possible review of the Water Framework Directive and the Drinking Water Directive, that recognise access to water as a universal right?
