Subject: State Grid Corporation of China's foothold in Terna - new request for clarification

In written question E-000259/2015, the Commission was asked for its exact views on the State Grid Corporation (the Chinese national electricity giant) gaining a foothold in Italian companies Terna and Snam – the leading Italian power transmission operator and the Italian group that manages national gas infrastructures, respectively – given that the Italian Minister for Energy claims to have given the green light to the transaction after consulting the Commission and obtaining its consent.

The Commission gave an answer to written question E-000259/2015 but provided no clarification in this regard.

1. In light of the above, can the Commission please provide another answer to the above question?
2. Can it produce the documents relating to the exchange of views with the Italian Government?
