

**Question for written answer E-007141/2015
to the Commission**
Rule 130
Siôn Simon (S&D)

Subject: Diet pills

There has recently been a tragic case in the UK of a student who died from taking a highly toxic diet pill bought online, which contained the illegal chemical dinitrophenol (DNP).

How does the Commission plan to better regulate the sales of such misleading and potentially lethal products?

What more can the Commission do to better educate people on such products and on the issues surrounding body image?
