

**Question for written answer E-007684/2015
to the Commission**
Rule 130
Ivan Jakovčić (ALDE)

Subject: Availability of the Juncker investment fund to countries of the Western Balkans,
addendum

I thank Commissioner Hahn for Reply E-000135-15 to my question in which he stresses the strategic importance of the neighbouring regions for the interconnection of Europe and the success of a plan for energy security, and that investment projects in the framework of this plan should consider the connection of networks with a wider region. It is pointed out in this reply that cross-border projects could be eligible for funding from EFSI resources. I therefore ask the following:

Are there any identified cross-border EU projects in southeast Europe, i.e. the western Balkans, which could be funded by EFSI, and which are the most important among them?
