

**Question for written answer E-007980/2015
to the Commission**
Rule 130
Hugues Bayet (S&D)

Subject: Flexibility within the economic governance programme

The 'Six Pack' specifies that, after consultation with the Council, the Parliament can make adjustments to the scoreboard of macroeconomic imbalances. In spite of several requests from Parliament regarding the integration of indicators of the effectiveness of resources and social indicators, the Commission still has not updated its scoreboard.

1. Does the Commission intend updating the scoreboard so as to put social and environmental indicators on an even footing with indicators of macroeconomic imbalances?
2. Does the Commission intend correcting the asymmetric bias in the scoreboard of macroeconomic imbalances, which gives greater weight to current account deficits than to current account surpluses?
