Subject: European strategy 2010-2020 on the disabled

The 2010-2020 strategy on the disabled is now half-way through.

The efforts made in various sectors should clearly be emphasised.

Austerity has however taken a heavy toll on the disabled as regards employment and inclusion. The impact of the first part of the 2010-2020 strategy has therefore been reduced.

At the half-way point and in the light of available figures, which are seriously worrying as regards employment, how does the Commission plan to amend the second part of European strategy for 2010-2020 to help the disabled and effectively reinforce inclusion and the rights of these people?
