to the Commission**  
Rule 130  
**Ivan Jakovčić (ALDE)**

Subject: Prohibition of waste disposal

One of the measures proposed in the draft report on the efficient use of resources and transition towards a circular economy is the introduction of a ban on the disposal of waste that can be recycled or is biodegradable by 2025 and the prohibition for any disposal by the year 2030.

How does the Commission intend to monitor the implementation of such a prohibition? Does it anticipate penalties for non-compliance with such prohibitions and, if so, what kind?
