

**Question for written answer E-008490/2015
to the Commission**
Rule 130
Hugues Bayet (S&D)

Subject: Action against hypercholesterolemia

Studies show that familial hypercholesterolemia is one of the commonest hereditary illnesses in the world. It causes cardiovascular disease, heart problems and AV canal defects.

Does the Commission plan to take or support initiatives for better prevention and earlier diagnosis of this illness?
