Subject: Sustaining jobs in rural areas and unfair competition

The CAP has abandoned its initial aim of ensuring food independence for France and is seeking to support the ongoing transformation of the agricultural sector. The EU would like to diversify farmers' sources of income and promote more environmentally friendly practices, but those aims will be difficult to achieve in the face of crisis after crisis on the commodities markets.

How does the Commission intend to protect the incomes of all French farmers against a backdrop of intra-EU dumping?

How is it intending to address the problem of job insecurity and the widespread use of illegal labour in the agricultural sector?
