

**Question for written answer E-010080/2015  
to the Commission**  
Rule 130  
**Ivan Jakovčić (ALDE)**

Subject: Property tax

Because there are excessive macroeconomic imbalances, Croatia has been placed in the group of Member States under supervision, and the Commission has issued specific recommendations for 2015 and 2016. Among the measures listed is the introduction of property tax, which for several years has been a political and economic issue and a subject of debate in Croatian public spheres.

Do the Commission recommendations set out particular requirements regarding the manner of introducing and calculating property tax, taking into account the experience of other Member States?

Where is it possible to obtain a complete summary of property tax in all the Member States?
