Subject: Efficient use of resources in Europe

In 2012 the European Parliament called on the Commission to establish joint task forces for the three key areas of food and drink, housing, and mobility, in order to develop, as soon as possible, European resource efficiency action plans with clear resource reduction actions.

In a Resolution, the Parliament urged to Commission and the Member States to remove the obstacles to a functioning European market in recycling and reuse.

What progress has been made in this connection to ensure efficient use of resources in Europe and increase the level of recycling and reuse?
