Subject: Priorities of the Luxembourg Presidency regarding the steel action plan

In its Priorities, the Luxembourg Presidency states that it 'will pursue efforts to implement a real European industrial policy'. In this sector, it will focus in particular on the steel action plan.

We are aware of the difficulties facing the stainless steel products sector, particularly unfair competition from Chinese and Taiwanese products.

What initiatives will the Luxembourg Presidency take within the framework of the steel action plan to give practical assistance to the stainless steel products sector?
