

**Question for written answer E-012910/2015
to the Commission**
Rule 130
Jozo Radoš (ALDE)

Subject: Increasing use of public transport

Resolution 2015/2005(INI) on the implementation of the 2011 White Paper on transport set a target of doubling the use of public transport in urban areas by 2030.

The Resolution also reached the conclusion that the use of public transport in urban areas was not clearly addressed in the White Paper on transport. In reference to the foregoing and to the estimate set out in the Resolution's explanatory statement that the urban population will increase from today's level of 74% to 85% by 2050, I should like to put the following question:

What specific measures is the Commission taking or planning to take with a view to increasing use of public transport in urban areas?
