Subject: Budget 2016 - European Supervisory Authorities (ESAs)

Given that, in certain areas, the 2016 budget for the ESAs is lower than it was in 2015, while their tasks and duties are constantly increasing, it is possible that there will be delays in the preparation of reports and the performance of tasks allocated to the ESAs.

Are preparations under way for the introduction of other forms of financing for the supervisory authorities, and what forms are under discussion?

How will it be ensured that the supervisory authorities can perform all tasks in an unhindered and timely manner?
