

**Question for written answer E-013491/2015
to the Commission**

Rule 130

Fulvio Martusciello (PPE) and Alberto Cirio (PPE)

Subject: Energy efficiency

The energy issue is at the top of the agenda for the EU institutions.

However, despite the focus on the issue of energy costs, there are no official statistics on the energy expenditure of companies.

Since the primary source of energy for industrial enterprises is gas, which alone covers some 40% of total energy requirements, can the Commission say what steps it will take to reduce consumption, promote energy efficiency and carry out energy audits to promote the design of technically efficient systems?
