

**Question for written answer E-013529/2015
to the Commission**
Rule 130
Norica Nicolai (ALDE)

Subject: Erection of walls in Europe

In view of the seriousness of the current situation triggered by the huge influx of refugees, Hungary has decided to extend the wall it is building along its border with Serbia to include the border with Romania.

It is impossible to see how this tallies with Article 20 of Regulation No 562/2006 or with the European spirit.

Given the above, it is quite conceivable that existing walls will be extended and new ones erected in Europe.

What steps has the Commission taken to prevent this problem from worsening?
