

**Question for written answer E-013676/2015
to the Commission**
Rule 130
Francesc Gambús (PPE)

Subject: Follow-up question to E-006097/2015

In its answer to the written question E-006097/2015, the Commission mentioned that, in the last call for proposals for the Connecting Europe Facility, Spain submitted two applications for works on the Tarragona port European gauge rail connection.

It also said that the Tarragona stretch of the Mediterranean Corridor could potentially be suitable for the use of the mechanism of the action of the European Fund for Strategic Investments (EFSI).

With this in mind, I would like to ask the Commission the following questions:

What is the current status of the applications for the works on the Tarragona port European gauge rail connection?

Does the Commission have any new information on the projects that are included in the mechanism of the action of the EFSI in relation to the port of Tarragona?
