

**Question for written answer E-015073/2015
to the Commission**

Rule 130

Dariusz Rosati (PPE)

Subject: Possible EU funding for the construction of multimodal logistics centres in the 2014-2020 period

Lubusz Voivodeship is a region on Poland's border with Germany, and is close to large cities such as Berlin and Dresden. Passing through it are a number of river transport links (the Oder), flight paths (to Babimost airport), railways (Kostrzyn station is situated there) and roads (S3 and A2). The Słubice County Office, in cooperation with the local authorities in Germany and Poland, is planning to build an international economic centre on the site of the existing border terminal and a cargo and logistics centre bringing together the four different modes of transport listed above.

What direct EU funding has the Commission earmarked for the construction of this kind of multimodal transport infrastructure in the 2014-2020 period?
