

**Question for written answer E-001285/2016  
to the Commission**  
Rule 130  
**Julie Girling (ECR)**

Subject: Fuel leakage

Accidents caused by fuel leakage are unfortunately too common a cause of injury or even death for cyclists and motorcyclists. Despite legislation at both EU and national levels, evidence appears to suggest that a significant gap remains between the law and reality.

Can the Commission please state whether any additional steps are to be taken to reinforce those measures already in place to minimise the risk of fuel leakage?
